Banji Oyelaran-Oyeyinka, Padmashree Gehl Sampath, 2016-04-29 Sustainable Industrialization in Africa explores the issues that confront development policy in the context of the MDGs and the post 2015 development agenda from an African perspective The book argues that development is an ultimate outcome of sustainable equitable industrialization and that any development agenda for the future has to ensure that industrialization is fostered in a way that makes economies independent and responsive to the needs of all citizens Future challenges for sustainable industrialization in Africa based upon the differences in its current industrialization trajectories are discussed to ensure that industrial growth results in positive economic and social outcomes in the context of the post 2015 development agenda *Strategic Purchasing and Supply Management* Roger Moser, 2007-12-11 Roger Moser analyses the relationships between business priorities and PSM strategy and shows in detail how business strategies influence PSM He develops a PSM strategy concept which enables supply managers to break down strategic priorities from a business strategy level to a PSM level and to define appropriate actions when dealing with suppliers supply markets and internal customers Nursing Theorists and Their Work Martha Raile Alligood, PhD, RN, ANEF, 2013-09-24 The most comprehensive of its kind Nursing Theorists and Their Work 8th Edition provides an in depth look at 39 theorists of historical international and significant importance Each chapter features a clear consistent presentation of a key nursing philosophy or theory Case studies critical thinking activities and in depth objective critiques of nursing theories help bridge the gap between theory and application Critical Thinking Activities at the end of each theorist chapter help you to process the theory presented and apply it to personal and hypothetical practice situations A case study at the end of each theorist chapter puts the theory into a larger perspective demonstrating how it can be applied to practice A Brief Summary in each theorist chapter helps you review for tests and confirm your comprehension A Major Concepts Definitions box included in each theorist chapter outlines the theory s most significant ideas and clarifies content specific vocabulary Each theorist chapter is written by a scholar specializing in that particular theorist s work often having worked closely with the theorists to provide the most accurate and complete information possible Beginning chapters provide a strong foundation on the history and philosophy of science logical reasoning and the theory development process Diagrams for theories help you visualize and better understand inherently abstract concepts Pictures of theorists as well as a listing of contact information for each individual enables you to contact the source of information directly Theorist chapters have been reviewed and edited by the theorist validating the accounts set forth in the text for currency and accuracy An extensive bibliography at the conclusion of each theorist chapter outlines numerous primary and secondary sources of information ideal for both undergraduate and graduate research projects NEW Quotes from the theorist make each complex theory more memorable NEW Chapter on Afaf Meleis profiles a theorist who has shaped theoretical development in nursing and explores

her transition theory NEW Need to Know Information is highlighted to streamline long complex passages and help you review key concepts NEW Points for Further Study at the end of each chapter direct you to assets available for additional information

Rational Techniques in Policy Analysis Michael Carley, 2013-10-22 Rational Techniques in Policy Analysis covers the role of rational techniques in policy making process This book is organized into two parts encompassing 12 chapters that consider the relationship of policy making and other approaches to rational analysis Part I deals with the disintegration of rational policy analysis to find out what the pieces are how they work how the parts interact and how they relate to the wider policy making environment Part II considers the types of rational analysis in more detail and serves not only as a survey of rational techniques but as an introduction to the important literature in each field This part specifically looks into the cost utility techniques social forecasting and evaluation and social indicator research This book is intended primarily for analysts researchers and students of the policy making process in university and government

Statistical Signal Processing of Complex-Valued Data Peter J. Schreier, Louis L. Scharf, 2010-02-04 Complex valued random signals are embedded in the very fabric of science and engineering yet the usual assumptions made about their statistical behavior are often a poor representation of the underlying physics This book deals with improper and noncircular complex signals which do not conform to classical assumptions and it demonstrates how correct treatment of these signals can have significant payoffs The book begins with detailed coverage of the fundamental theory and presents a variety of tools and algorithms for dealing with improper and noncircular signals It provides a comprehensive account of the main applications covering detection estimation and signal analysis of stationary nonstationary and cyclostationary processes Providing a systematic development from the origin of complex signals to their probabilistic description makes the theory accessible to newcomers This book is ideal for graduate students and researchers working with complex data in a range of research areas from communications to oceanography

Managerial Discretion and Performance in China Hagen Wülferth, 2013-04-17 The theoretical and empirical literature to date has fallen short of reaching a consensus as to whether granting more managerial discretion to managers tends to

enhance not alter or diminish organizational performance the discretion puzzle This book aims to build a bridge between these contradictory results by synthesising principal agent theory stewardship theory and managerial discretion theory into a new empirically validated model Using a representative sample of double blind interviews with managers of 467 firms in China and applying partial least squares path modelling PLS the study identifies a potential cause of the discretion puzzle the failure of the extant literature to account for granularity in the way that managers use their discretion This generates far reaching implications for theoretical and empirical research as well as practical recommendations for managing managers in multinationals and Chinese companies
