**Operations Research for Health Planning and Administration** Stephen J. Duckett,2012-12-06 Operations research aims to assist managers faced with problems of coordinating activities improving the quality of care of services delivered making optimal resource allocation decisions and generally managing services and institutions Operations research or O R was originally developed in response to the problems of the second World War It was characterised then by a unifying and clear objective clear problems that had to be solved and the use of inter disciplinary teams to analyse and solve identified problems This analysis often drew on mathematical techniques After the war operations research moved in two separate but related directions In England the emphasis on inter disciplinary approaches and problem solving teams remained The operations researcher still used mathematical techniques but these were not systematised into a volume of standard formulae The emphasis of operations research was on the approach not the tools used see for example Luckman also Luckman Smith and McLachlan 1975 In the United States the emphasis was placed on the use of mathematical techniques Operations research became a mathematically based science relying on standardised models e g queuing allocation and formulae This approach was facilitated by the availability of computers
