Quantitative Zooarchaeology Donald K. Grayson, 2014-06-28 Quantitative Zooarchaeology **Near Eastern Archaeology** Suzanne Richard, 2003 Filling a gap in classroom texts more than 60 essays by major scholars in the field have been gathered to create the most up to date and complete book available on Levantine and Near Eastern archaeology

Zooarchaeology Elizabeth J. Reitz, Elizabeth S. Wing, 1999-02-04 Zooarchaeology is a detailed reference manual for students and professional archaeologists interested in identifying and analysing animal remains from archaeological sites Drawing on material from all over the world and covering a time span from the Pleistocene to the nineteenth century AD the emphasis is on animals whose remains inform us about many aspects of the relationships between humans and their natural and social environments especially site formation processes subsistence strategies and paleoenvironments The authors discuss suitable methods and theories for all vertebrate classes and molluscs and include hypothetical examples to demonstrate these There are extensive references and illustrations to help in the process of identification **Farming, Hunting, and Fishing in the Olmec World** Amber M. VanDerwarker, 2010-01-01 The Olmec who anciently inhabited Mexico's southern Gulf Coast organized their once egalitarian society into chiefdoms during the Formative period 1400 BC to AD 300 This increase in political complexity coincided with the development of village agriculture which has led scholars to theorize that agricultural surpluses gave aspiring Olmec leaders control over vital resources and thus a power base on which to build authority and exact tribute In this book Amber VanDerwarker conducts the first multidisciplinary analysis of subsistence patterns at two Olmec settlements to offer a fuller understanding of how the development of political complexity was tied to both agricultural practices and environmental factors She uses plant and animal remains as well as isotopic data to trace the intensification of maize agriculture during the Late Formative period She also examines how volcanic eruptions in the region affected subsistence practices and settlement patterns Through these multiple sets of data VanDerwarker presents convincing evidence that Olmec and epi Olmec lifeways of farming hunting and fishing were driven by both political and environmental pressures and that the rise of institutionalized leadership must be understood within the ecological context in which it occurred Manual of Forensic Taphonomy James Pokines, Steven A. Symes, 2013-10-08 Forensic taphonomy is the study of the postmortem changes to human remains focusing largely on environmental effects including decomposition in soil and water and interaction with plants insects and other animals While other books have focused on subsets such as forensic botany and entomology Manual of Forensic Taphonomy is the first update of **Settlement and Subsistence in Early Formative Soconusco** Richard G. Lesure, 2010-12-31 The Soconusco region a narrow strip of the Pacific coast of Mexico and Guatemala is the location of some of the earliest pottery using villages of ancient Mesoamerica Mobile early inhabitants of the area harvested marsh clams in the estuaries leaving behind vast mounds of shell With the introduction of pottery and the establishment of permanent villages from 1900 B C use of the resource rich estuary changed

The archaeological manifestation of that new estuary adaptation is a dramatic pattern of inter site variability in pottery vessel forms Vessels at sites within the estuary were about seventy percent neckless jars tecomates while vessels at contemporaneous sites a few kilometers inland were seventy percent open dishes The pattern is well known but the the settlement arrangements or subsistence practices that produced it have remained unclear Archaeological investigations at El Varal a special purpose estuary site of the later Early Formative 1250 1000 B C expand possibilities for an anthropological understanding of the archaeological patterns The goal of this volume is to describe excavations and finds at the site and to propose based on a variety of analyses a new understanding of Early Formative assemblage variability *Agent of Change* Barbara Roth,E. Charles Adams,2021-03-03 Ash is an important and yet understudied aspect of ritual deposition in the archaeological record of North America Ash has been found in a wide variety of contexts across many regions and often it is associated with rare or unusual objects or in contexts that suggest its use in the transition or transformation of houses and ritual features Drawn from across the U S and Mesoamerica the chapters in this volume explore the use meanings and cross cultural patterns present in the use of ash and highlight the importance of ash in ritual closure social memory and cultural transformation Molluscs in Archaeology Michael J. Allen,2017-06-30 The subject of Molluscs in Archaeology has not been dealt with collectively for several decades This new volume in Oxbow s Studying Scientific Archaeology series addresses many aspects of mollusks in archaeology It will give the reader an overview of the whole topic methods of analysis and approaches to interpretation It aims to be a broad based text book giving readers an insight of how to apply analysis to different present and past landscapes and how to interpret those landscapes It includes Marine Freshwater and land snails studies and examines topics such as diet economy climate environmental and land use isotopes and mollusks as artifacts It aims to provide archaeologists and students with the first port of call giving them a methods and principles and b the potential information mollusks can provide It concentrates on analysis and interpretation most archaeologists and students can undertake and understand and to review the heavier science in terms of potential application and interpretational value

Cannibalism in the Linear Pottery Culture: The Human Remains from Herxheim Bruno Boulestin,Anne-Sophie Coupey,2015-10-31 This volume presents the first extensive study of the human remains found during 2005 2010 excavations of the Herxheim enclosure Germany The site is is one of the major discoveries of the last two decades regarding the Linear Pottery Culture and probably one of the most significant in advancing understanding of how this culture ended The Archaeology of CA-Mno-2122 Brooke S. Arkush,1995-07-05 CA Mno 2122 is an extensive multi component site complex in the Mono Lake basin of east central California containing 31 native encampments and 4 wing traps dating between A D 500 and 1900 This archeological study of the site provides important information regarding communal pronghorn hunting the region s Protohistoric period and cultural continuity and change among the Mono Basin Paiute **Ancient Hunting Strategies in Southern South America** Juan Bautista Belardi,Damián Leandro Bozzuto,Pablo Marcelo Fernández,Enrique Alejandro

Moreno, Gustavo Adolfo Neme, 2021-01-28 This book presents the state of the art for the studies of strategies and tactics for the procurement of preys in Argentina in different regions and chronologies from the end of the Pleistocene until historic moments. The chapters are related to the performance of these practices in hunter gatherer, shepherd and farmer societies. From the environmental point of view, they show cases in diverse areas such as plains, mountains, forests, sea coast, steppes and puna. Likewise, the range of preys considered includes ungulates, camelids and deer, runner birds, *Rhea pennata* and minor prey mammals and fish. The book is aimed at professionals and students of archaeology interested in the analysis of tactics and strategies for prey capture. Every chapter offers an important contribution in theoretical, methodological and technical terms. In addition, these works possess a high comparative value on study cases of very different chronologies and environments of the Southern hemisphere. This book is a result of the 1st Workshop 'Strategies and tactics in order to obtain preys in the past', its discussion from the integration of different lines of evidence, which was conducted in San Rafael, Mendoza, Argentina, between the 8th and 10th of August 2018. Archaeology and Bioarchaeology of Anatomical Dissection at a Nineteenth-Century Army Hospital in San Francisco P. Willey, Peter Gavette, Eric J. Bartelink, Colleen F. Milligan, 2023-12-13 This volume uses historical archaeological and bioarchaeological analysis to study and understand a nineteenth century medical waste pit discovered at the former Army hospital at Point San Jose in San Francisco. **Taking the High Ground** Atholl Anderson, Douglas J. Kennett, 2012-11-01 This volume brings the remote and little known island of Rapa firmly to the forefront of Polynesian archaeology. Thirteen authors contribute 14 chapters covering not only the basic archaeology of coastal sites, rock shelters and fortifications, but faunal remains, agricultural development and marine exploitation. The results presented within a chronology framed by Bayesian analysis are set against a background of ethnohistory and ethnology. Highly unusual in tropical Polynesian archaeology are descriptions of artefacts of perishable material. Taking the High Ground provides important insights into how a group of Polynesian settlers adapted to an isolated and in some ways restrictive environment. **Retrieving the Past** Joe D. Seger, 1996 **The Archaeology of the Sapsuk River, Alaska** Herbert D. G. Maschner, 2010 **Archaeological Investigations at 45CL1 Cathlapotle (1991-1996), Ridgefield National Wildlife Refuge, Clark County, Washington**, 1999 *Foragers of the Terminal Pleistocene in North America* Renee Beauchamp Walker, Boyce N. Driskell, 2007-01-01 These essays cast new light on Paleoindians, the first settlers of North America. Recent research strongly suggests that big game hunting was but one of the subsistence strategies the first humans in the New World employed and that they also relied on foraging and fishing. **DEBATING ARCHAEOLOGY** Lewis R. Binford, 2009-09-15 In this volume the founder of processual archaeology, Lewis R. Binford, collects and comments on the twenty-eight substantive papers published in the 1980s; the third in his set of collected papers also. Working at Archaeology and An Archaeological Perspective. This ongoing collection of self-edited papers, together with the extensive and very candid interstitial commentaries, provides an invaluable record of the development of The New

Archaeology and a challenging view into the mind of the man who is certainly the most creative archaeological theorist of our time A new 2009 foreword allows further reflections on his work **The Djief Hunters, 26,000 Years of Rainforest**

Exploitation on the Bird's Head of Papua, Indonesia Juliette M. Pasveer, 2004-07-01 Two prehistoric cave sites on the Bird's Head of western New Guinea provide a detailed narrative of 26 000 years of human occupation of this area During Late Pleistocene times lower temperatures allowed a suite of montane animal species to descend onto the lowland Ayamaru Plateau When the montane fauna receded during the subsequent climatic amelioration people switched their hunting focus to a forest wallaby known locally as Djief Detailed analysis of this species remains including the reconstruction of their age profile provides insights into why prolonged hunting of this species did not lead to its extinction The wallaby population evidently thrived at its demographic maximum throughout the early and mid Holocene suggesting that human population densities and therefore hunting pressure were low until c 5000 BP This volume of Modern Quaternary Research in Southeast Asia offers a unique perspective on sustainable hunting in prehistory and provides intriguing insights into hunter gatherer subsistence tool manufacturing and use the changing intensity of occupation of the sites and environmental exploitation from Late Pleistocene times onwards in a lowland tropical region It forms an important contribution to the current debate on the possibilities of human occupation of tropical rainforest before the advent of agriculture **Current Research in**

Archaeology of South American Pampas Gustavo Federico Bonnat, María Clara Álvarez, Diana Leonis Mazzanti, María Paula Barros, Mariano Bonomo, Verónica Puente, 2024-05-16 This volume includes a selection of papers derived from the IX Conference of the Pampas region of Argentina held virtually in 2021 in Mar del Plata Buenos Aires Argentina and organized by the National University of Mar del Plata Located in the southern cone of South America the Pampas are vast plain grasslands that range across central Argentina and are one of the largest prairies of the world The early traces of humans date back to ca 12 200 14C years BP From the Late Pleistocene up to the Spanish Conquest in the sixteenth century hunter gatherer groups occupied the Pampas Archaeological research in the region has been focused on fascinating topics such as the early peopling the mobility circuits in the past the interaction between indigenous and colonial societies and the perception of this complex past by the modern Pampean society mainly integrated by European immigrants and indigenous descendants This book gathers these themes and includes a selection of a conference of one of the keynote speakers and 18 papers that represent diverse topics on the current Pampean research The book is structured in two main axes 1 prehispanic studies using different lines of evidence 2 historical archaeology and cultural heritage
