Black and Brown Planets Isiah Lavender III, 2014-09-25. *Black and Brown Planets* embarks on a timely exploration of the American obsession with color in its look at the sometimes contrary intersections of politics and race in science fiction. The contributors, including De Witt D. Kilgore, Edward James, Lisa Yaszek, and Marleen S. Barr, among others, explore science fiction worlds of possibility: literature, television, and film lifting blacks, Latin Americans, and indigenous peoples out from the background of this historically white genre. This collection considers the role of race and ethnicity in our visions of the future. The first section emphasizes the political elements of black identity portrayed in science fiction from black America to the vast reaches of interstellar space framed by racial history. In the next section, analysis of indigenous science fiction addresses the effects of colonization, helps discard the emotional and psychological baggage carried from its impact, and recovers ancestral traditions in order to adapt in a post-Native apocalyptic world. Likewise, this section explores the affinity between science fiction and subjectivity in Latin American cultures from the role of science and industrialization to the effects of being in and moving between two cultures. By infusing more color in this otherwise monochrome genre, *Black and Brown Planets* imagines alternate racial galaxies with viable political futures in which people of color determine human destiny.

Veiled Alliances Kevin J. Anderson, 2011-12-01. Based on the legendary science fiction series *The Saga of Seven Suns*, *Veiled Alliances* is a revelatory prequel in which long-term fans will discover the origin of the green priests on Theroc, the first Roamer skymining operations on a gas giant planet, the discovery of the Klikiss robots entombed in an abandoned alien city, the initial Ildiran expedition to Earth, the rescue of the generation ship *Burton*, and the tragedy that led to sinister breeding experiments. In this volume, the human race begins its expansion into outer space only to discover that for centuries a multitude of other races has already been interacting on a cosmic scale. Eleven exploratory ships carrying humans escaping a degenerating Earth are discovered by a more advanced space-faring civilization, the Ildiran Empire. The empire helps the refugees; by now, the several generations later, offspring of the original voyagers settle suitable planets and send diplomats with a few of them to Earth to establish trade and diplomatic relations. Meanwhile, both Terran and Ildiran authorities bring hidden agendas to their first contact discussions, and as Earth attempts to become a player in this new arena, its ambassadors are thrust into a foreign world of alien life forms, backstabbing politics, bitter feuds, and a deadly struggle to become the supreme force in the universe.
