Rocket Dreams:

Rocket Dreams Marina Benjamin, 2003-05-25 In 1958 mankind's centuries long flirtation with space flight became a torrid love affair. For a decade tens of millions of people were enraptured first by the U S Soviet race to the moon and finally as America outstripped its rival by Project Apollo alone. It is now more than three decades since the last man walked on the moon more time than between the first moonwalk and the beginning of World War II. Apollo did not as had been promised by a generation of visionaries herald the beginning of the Space Age but its end. Or did it? Project Apollo like a cannonball reached its apogee and returned to earth but the trajectory of that return was complex. America's atmosphere its economic scientific and cultural atmosphere made for a very complicated reentry that produced many solutions to the trajectory problem. Rocket Dreams is about those solutions about the places where the space program landed. In Rocket Dreams an extraordinarily talented young writer named Marina Benjamin will take you on a journey to those landing sites. A visit with retired astronauts at a celebrity autograph show is a starting point down the divergent paths taken by the pioneers including Edgar Mitchell founder of the Church of Noetic Sciences. Roswell New Mexico is a landing site of a different order the magnetic north of UFO belief in the United States a belief that began its most dramatic growth precisely at the time that the path of the space program began its descent. In the vernacular the third law of motion states that what goes up must come down. Thus the tremendous motive force that energized the space program didn't just vanish it was conserved and transformed making bestsellers out of fantasy literature spawning Gaia and giving symbolism to the environmental movement. Everything from the pop cultural boom in ufology to the worldwide Search for Extra Terrestrial Intelligence SETI feeds on the energy given off by America's leap toward space. Rocket Dreams is an eloquent tour of this Apollo scarred landscape. It is also an introduction to some of the most fascinating characters imaginable. Some long dead like the crackpot visionary Alfred Lawson who saw in space flight a new stage of human evolution. Alti Man or Robert Goddard the father of rocketry whose workshop in Roswell stands only half a mile from shops selling posters of alien visitors. Others are very much alive like Stewart Brand creator of the Whole Earth Catalog and partner with Gerard O'Neill in the drive to build free floating space colonies and SETI astronomer Seth Shostak who has spent decades listening to the skies hoping for the first contact with another intelligent species. Perceptive original and wonderfully written informed by history science and an acute knowledge of popular culture. Rocket Dreams is a brilliant book by a remarkable talent.

Rocket Dreams Christian Davenport, 2025-09-16 Thrilling an important tale of how American ingenuity and entrepreneurial spirit is creating a new type of space age. Walter Isaacson New York Times bestselling author of *Elon Musk* *Musk vs Bezos* *China vs the United States* *The government vs the private sector* *Welcome to the rivalries and alliances defining the New Space Age* At stake Trillions of dollars national prestige and a place in the history books. A fine piece of reporting historians will be able to use this first draft of rocket history to craft deeper analyses of our first real steps as a space faring society. The New York Times

Moon landings and space walks once captivated the public's attention. But in recent decades the U.S. space enterprise has felt moribund. Now that's finally about to change. A fleet of powerful new rockets is poised to take humans into the cosmos more than ever before. A lunar land rush has sparked a geopolitical competition among nations. And the world's two richest men have engaged in escalating brinkmanship as NASA and the U.S. government embraces Silicon Valley innovation to jump start the nation's ambitions. Space has entered a golden age and this is just the beginning. In this gripping work award winning Washington Post writer Christian Davenport chronicles the mad scramble to shape humanity's off planet future. He takes readers behind the scenes at NASA and the Pentagon as China's aggressive moon mining plans raise alarms onto the sprawling Cape Canaveral factory where Blue Origin is working toward Amazon style lunar deliveries and onto SpaceX launch pads as Musk's engineers log 100 hour weeks leaving veteran astronauts marveling that they're now operating flying iPhones. What will happen as human ambition outpaces governmental regulation? Which country will win the race back to the moon? Was Donald Trump's much derided creation of the Space Force a surprising act of foresight and will the U.S. finally make a real push to the moon and eventually toward Mars? Masterfully paced, rigorously reported and vividly told, *Rocket Dreams* offers a riveting fly on the wall account of the grit fueled global battle to push humankind further into the cosmos, revealing that the science fiction dreams of the last century may soon become our reality. *Rocket Dreams* Christian Davenport, 2025-09-15. Superhuman Japan Marie Thorsten,2012-03-15 This book examines the imaginative narratives that shaped the attitudes of Americans and others toward Japan Focusing on cultural aspects of economic nationalism and US Japan relations during the trade war Marie Thorsten uses examples from public discourse film documentaries novels acts of racism and comparison of international education assessments to examine the way in which Japan has been constituted in a global political gaze as an economic hegemon In times of heightened rivalry we often try to find superior others so that we can motivate ourselves against an imagined future of decline During the Cold War Americans and other nations in the West took advantage of being the underdog against the perceived superiority of the Soviet Union especially by turning the Sputnik launch of 1957 into a lodestone for an educational renaissance As postwar Japanese power became increasingly threatening American policymakers again tried to fashion Japan into another Sputnik to motivate American people This book explores 1980s Bubble Japan as a Superhuman Other in the consciousness of Americans especially as reflected in popular culture and policy discourses Making Japan into a Superhuman often resorted into the same stereotyping that invented Japan as a Subhuman It was difficult for many to see that America Japan and other nations were actually sharing the same global economic circumstances affecting attitudes toward knowledge and nation This book will be of interest to students and scholars of Japanese politics International Relations and Japanese culture and society
