Rogue Trident:

Developing a Theoretical Model of Counterproliferation for the 21st Century Brian Bates, Chris McHorney, 2000

Examining counterproliferation as a global phenomenon the authors use an in depth analysis of the Counterproliferation Initiative to develop a theoretical model of counterproliferation for the 21st century Arguing that existing counterproliferation policy is the product of bureaucratic competition the authors propose several modifications of existing policy In the second half of the book they use four case studies Cuban Missile Crisis Persian Gulf War Osirak Reactor Raid and Sudan to identify factors that might contribute to an effective counterproliferation strategy More specifically the authors explore the relationship between the strength of an intelligence gathering apparatus and the successful or unsuccessful elimination of weapons of mass destruction The study concludes with observations and limited predictions regarding the future of counterproliferation
