Receptor Chemistry Towards the Third Millennium

M. Gianella, G. Marucci, W. Quaglia, U. Gulini, 2000-05-31 Receptor Chemistry Towards the Third Millennium is the result of papers presented at the 12th Camerino Noordwijkerhout Symposium held in Camerino Italy in September 1999 Although much is known about the way ligands interact with receptors which have now been isolated characterized and cloned many aspects still remain to be explored In particular differentiation into distinct subpopulations and the multiplicity of transduction processes offer more specific targets in the search for new drugs This book will be of interest to medicinal chemists pharmacologists biochemists and neurologists and will also be a valuable source of reference for medical students and postgraduate students in related fields

Chemistry at the Beginning of the Third Millennium Luigi Fabbrizzi, Antonio Poggi, 2013-03-09 This Volume is based on

the Lectures presented at the Meeting Chemistry at the Beginning of the Third Millennium which was held in Pavia Italy during the period 7-10 October 1999. The Meeting involved the participation of scientists from German and Italian Universities of the Coimbra Group. The Coimbra Group which was founded in 1987 gathers the most ancient and prestigious European Universities with the aim to promote initiatives in both research and teaching and to provide guidelines for the progress and development of the University system. German and Italian Universities within the Coimbra Group propose every year a theme for scientific discussion which originates a Meeting to be held in a German or Italian University. The Meeting in Pavia was the fifth of the series and followed those of Bologna 1995, Jena 1996, Siena 1997, Heidelberg 1998. Each Meeting is centred on a topic from either humanistic or natural sciences and consists in a series of lectures presented by distinguished scientists from the six participating Universities. For the Pavia Meeting the Steering Committee chose Chemistry as the topic and gathered researchers with experience in almost all fields of chemistry. In particular during the Meeting lectures were presented on many up-to-date subjects of chemistry including materials science, superconductors, supramolecular chemistry, bioinorganic chemistry, fullerenes, liquid crystals, photoinduced electron transfer, etc. The different topics were covered by distinguished and renowned researchers of the various fields.
