World nations for a new international economic order have thrust two relatively unknown international institutions the World Bank and the International Monetary Fund into public prominence Controversy over the IMF which helps debtor countries balance current accounts and meet debt payments enters on the conditions that the lending institution places on receiving nations Basically debtor countries are required to put their economic house in order usually by decreasing imports increasing exports and eliminating subsidies on food gasoline and other goods Often it is such subsidies that allow a government to maintain political support and control Thus meeting the requirements of the IMF can lead to domestic instability as the riots in the Dominican Republic illustrated Critics of the IMF often agree with the economic medicine but decry the side effects of the cure Is enough attention being paid to the diversity of the debt troubled nations Is there a separate set of standards for the borrowers and the lenders in the IMF decision making process Is the IMF lending process fair What are the often unintended effects of the IMF on foreign policy
