warned us about The 1970s saw the start of a new wave of science fiction that predicted environmental destruction out of control technology and escalating political crises These were not the fantastical imaginings of filmmakers they were based on rising environmental consciousness and solid scientific research The explanation of why we didn't heed these warnings might be the most important story of our time and now our future Each chapter focuses on a classic sci fi film among them Blade Runner Terminator 2 12 Monkeys Brazil Soylent Green and the Back to the Future series these films are used to consider our likely environmental technological and political future But taking sci fi seriously again could help us to regain our power to create different tomorrows guided by practical utopianism and to imagine new science fictions for a better world If you're wondering what the future holds maybe you've already seen it

Sport and Monstrosity in Science Fiction Derek J. Thiess, 2019-04-30 This book pits the imaginative sports of science fiction against our widespread suspicion of the monstrous athletic body The biopolitical nature of sport demands we see these bodies as our bodies capable of the greatest physical feats science fiction can imagine but also our worst fears of injury and death
