Lewis,2006-01-01 How did women in the early twentieth century newly arrived in North West Canada cope with their strange new lives so very different from the lives they used to lead How did they see themselves and their role in frontier life In the early twentieth century drawn west by the promise of free land economic success or religious and political freedom women

moved from eastern Canada and overseas to farms and ranches in North West Canada They discovered that it was not the utopia touted by government propaganda or land agents They also discovered that there was a select but diverse group of rural women who shared their common experiences of isolation of hard work and duty of poverty and neglect But more importantly they shared knowledge of independence and self reliance and of pride in what they had accomplished Through letters written to the women s pages in agricultural newspapers they forged a vital network that supported encouraged and educated women in ways to improve their rural lives Their letters show how these rural women made significant and vital contributions to the settlement and development of the Canadian North West      **The Church** ,1856      **God With Us - CTL**

With rapid commercialization a booming urban economy and the relaxation of state migration policies over 100 million peasants known as China s floating population have streamed into large cities seeking employment and a better life This massive flow of rural migrants directly challenges Chinese socialist modes of state control This book traces the profound transformations of space power relations and social networks within a mobile population that has broken through the constraints of the government s household registration system The author explores this important social change through a detailed ethnographic account of the construction destruction and eventual reconstruction of the largest migrant community in Beijing She focuses on the informal privatization of space and power in this community through analyzing the ways migrant leaders build their power base by controlling housing and market spaces and mobilizing social networks The author argues that to gain a deeper understanding of recent Chinese social and political transformations one must examine not only to what extent state power still dominates everyday social life but also how the aims and methods of late socialist governance change under new social and economic conditions In revealing the complexities and uncertainties of the shifting power and social relations in post Mao China this book challenges the common notion that sees recent changes as an inevitable move toward liberal capitalism and democracy
