Bradlaugh as M.P. for Northampton* William Hillier, 1885 Animals and Nature Rod Preece, 1999 In this book Rod Preece takes issue with the popular but simplistic view that the Western cultural tradition has encouraged attitudes of domination and exploitation toward the natural world particularly animals he contends that the much maligned Western tradition has far more to commend it than is customarily recognized and the much vaunted Oriental and Aboriginal orientations to animals and nature have habitually been described in a misleadingly rosy hue According to Preece the West has often been misread frequently for ideological reasons He argues that Western conceptions of objectivity and individuality have in fact resulted in a readier appreciation of the worth of animals than in some other cultures Moreover the Western anti-rationalist tradition has often treated animals and nature with a healthy respect There is a continuing disjunction between theory and practice in the non Western world as well as in the West where all too often only one side of the Aboriginal and Oriental myth and literature is reported Preece concludes that while the West has much to learn from Oriental and Aboriginal traditions so also have the Oriental and Aboriginal worlds much to learn from the West **Facts authentic, in science and religion: designed to illustrate a new tr. of the Bible** William Cowherd, 1818 *Adventures and Peregrinations of the Metaphysical Atom* Helena Petrovna Blavatsky, 2019-09-17 Fohat Cosmic Electricity by infusing energy into primordial matter electrifies into life and scatters into atoms It is through Fohat that the ideas of the Universal Mind are impressed upon matter Occultism asserts that Electricity is Matter not mere motion Force or Energy may be better names for it Electricity is

Sharma,2023-09-01 The contemporary mediation between technoscience and philosophy offers overwhelming insights into the literary critical domain of thought This book conceptualizes an enriching engagement with questions pertaining to the notion of technology and how its blend with cultural facets makes comprehensive room for the reconstitution of the literary landscape in Atwood s science fiction SF novels Ranging from the technologies of disciplinary and bio corporeal power to theorizing gender politics of cyborgian nomadic and humanoid bodies from technologizing the consumption of hybrid edibles and lingual epistemology to discerning the hyperreal dimensions of archived tech memoirs video gaming and digital sex the book takes a philosophical approach to technocultural studies a newly emerging interdisciplinary methodology It contributes

to an optimal concretization of technoscientific exploration in Margaret Atwood's literary scholarship and adds to the existing field of theoretical acumen within cosmopolitan literatures **The Christian Leader** ,1926 **The Works of Orestes A.
