### **Lucretius Iii De Rerum Natura Classical Texts Series:**

*De Rerum Natura IV* Titus Lucretius Carus, 1986      **Lucretius De Rerum Natura IV** Titus Lucretius Carus, 1986 Book IV of Lucretius great philosophical poem deals mainly with the psychology of sensation and thought The heart of this book is a new text incorporating the latest scholarship on the text of Lucretius with a clear prose facing translation The commentary concentrates on the thought of the text relating it to other philosophers beside Epicurus and the poetry of the Latin placing the text in relation to Roman literature in general and attempting to demonstrate the poetic genius of Lucretius The introduction deals with the didactic tradition in ancient literature and Lucretius place in it the structure of *De Rerum Natura* the salient features of the philosophy of Epicurus and the transmission of the text      **Lucretius** Philip de May, 2009-05-14 What is the world made of How can we be happy What happens after death Drawing on the philosophical teachings of Epicurus Lucretius ambitiously seeks to answer these and other big questions in his masterful poem On the nature of things at the same time he coats his words in the honey of the Muses to make potentially difficult material more appealing to his readers This book offers a selection of key passages from the poem in addition it gives students insight into its artistic inventiveness provides a cultural and historical frame of reference and offers access to the Epicurean philosophy that underlies it      **De Rerum Natura** Titus Lucretius Carus, 2009 For a work written more than two thousand years ago in a society in many ways quite alien to our own Lucretius *De Rerum Natura* contains much of striking even startling contemporary relevance This is true above all of the fifth book which begins by putting a strong case against what it has recently become fashionable to call intelligent design and ends with an account of human evolution and the development of society in which the limitations of technological progress form a strong and occasionally explicit subtext Along the way the poet touches on many themes which may strike a chord with the twenty first century reader the fragility of our ecosystem the corruption of political life the futility of consumerism and the desirability of limiting our acquisitive instincts are all highly topical issues for us as for the poem s original audience Book V also offers a fascinating introduction to the world view of the upper class Roman of the first century BC This edition which complements existing Aris and Phillips commentaries on books 3 4 and 6 will help to make Lucretius urgent and impassioned argument and something of his remarkable poetic style accessible to a wider audience including those with little or no knowledge of Latin Both the translation and commentary aim to explain the scientific argument of the book as clearly as possible and to convey at least some impression of the poetic texture of Lucretius Latin      *De Rerum Natura* , 1987      **List of Books Forming the Reference Library in the Reading Room of the British Museum** British Museum. Dept. of Printed Books, 1910      **The Oxford encyclopedia of ancient Greece and Rome. - Vol. 1 - 7** Michael Gagarin, 2010      **An Elementary Treatise on Solid Geometry** William Steadman Aldis, 2025-06-25 Reprint of the original first published in 1880 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to

preserve their cultural heritage      Euripides Euripides, Frederick Apthorp Paley, 1880      **Examples in algebra, by W.F. McMichael and R. Prowde-Smith. [With] Answers** William Fisher McMichael, 1879      **The Phoenissae of Euripides, with brief notes by F.A. Paley** Euripides, 1879      **Style in Latin Poetry** Paolo Dainotti, Alexandre Pinheiro Hasegawa, Stephen Harrison, 2024-02-19 Though stylistics undoubtedly plays a crucial role in the scholarship on Latin poetry from commentaries to textual criticism from intertextuality to literary criticism in recent years for various reasons it has not received the attention it deserves This book published a generation after Adams and Mayer's seminal 1999 volume *Aspects of the Language of Latin Poetry* ideally aims to complement and update it on a smaller scale offering the reader a collection of stimulating papers from international scholars on the style of some of the most significant voices of Latin poetry from early drama to the Flavian period      *Opera* Euripides, 1880      Mirrors of the Divine Emily R. Cain, 2023-01-30 *Mirrors of the Divine* examines four early Christian authors Tertullian of Carthage Clement of Alexandria Gregory of Nyssa and Augustine of Hippo and analyzes their writings on vision and knowledge of God to show how they envisioned one's relationship to the world and how they imagined the unknown Emily R Cain explores how contradictory theories of sight shaped their cosmologies theologies subjectivities genders and discursive worlds and shows that early Christian arguments about the phenomenon of visual perception are deeply intertwined with broader debates about identity agency and epistemology

**Routledge Encyclopedia of Philosophy** Edward Craig, 1998 Volume five of a ten volume set which provides full and detailed coverage of all aspects of philosophy including information on how philosophy is practiced in different countries who the most influential philosophers were and what the basic concepts are      Classical Scholarship and Its History Stephen Harrison, Christopher Pelling, 2021-04-06 It is unusual for a single scholar practically to reorient an entire sub field of study but this is what Chris Stray has done for the history of UK classical scholarship His remarkable combination of interests in the sociology of scholars and scholarship in the history of the book and of publishing and especially in the detailed intellectual contextualisation of classical scholarship as a form of classical reception has fundamentally changed the way the history of British classics and its study is viewed A generation ago the history of classical scholarship still consisted largely of accounts of particular scholars and groups of scholars written by other scholars from a broadly biographical and heroic individual perspective In these works scholars often sought to find their own place in the great tradition choosing to praise or blame those whose work they admired or deprecated and to identify with particular schools or trends and there were few attempts to provide a broader and less prosopographical perspective Almost all the chapters in the volume originated as papers at a conference in honour of the honoree and have been improved both by discussion there and by the rigorous peer review process conducted by the two experienced editors It covers various aspects of classical reception with a particular focus on the history of scholars their institutions and their writings the main focus is on the UK but there are also substantial engagements with continental Europe and especially the USA the period covered runs from the Renaissance to the present

The cast contains a number of world famous names Unusually the volume also contains an essay by the honorand but we are very keen to include this especially as it focusses on the topic of scholarly collaboration **Mirror of the World** Meg Roland,2021-07-28 In the late fifteenth century the production of print editions of Claudius Ptolemy's second century Geography sparked one of the most significant intellectual developments of the era the production of mathematically based north oriented maps The production of world maps in England however was notably absent during this Ptolemaic revival As a result the impact of Ptolemy's text on English geographical thought has been obscured and minimalized with scholars speculating a possible English indifference to or isolation from European geographic developments Tracing English geographical thought through the material culture of literary and popular texts this study provides evidence for the reception and transmission of Ptolemaic based geography in England during a critical period of geographic innovation and synthesis one that laid the foundation for modern geographical representation With evidence from prose romance book illustration theatrical performance cosmological ceilings and almanacs Mirror of the World proposes a new interdisciplinary literary and cartographic history of the influence of Ptolemaic geography in England one that reveals the lively integration of geographic concepts through narrative and non cartographic visual forms Labor Imperfectus Jacqueline Fabre-Serris,Marco Formisano,Stavros Frangoulidis,2023-11-06 Unfinishedness and incompleteness are a central feature of ancient Greek and Roman literature that has often been taken for granted but not deeply examined many texts have been transmitted to us incomplete How and to what extent has this feature of many texts influenced their aesthetic perception and interpretation and how does it still influence them today Also how do various editorial arrangements of fragmentary texts influence the reconstruction of closure These important questions offer the opportunity to bring together specialists working on Greek and Roman texts across various genres epic tragedy poetry mythographic texts rhetorical texts philosophical treatises and the novel Reading a text by focusing on its current unfinishedness or incompleteness or the textual signs suggesting an unfinished or incomplete state the contributors examine the relations between author reader and text as underscored by the verbal generic and aesthetic features of each work This edited volume brings together a broad spectrum of approaches to ancient and modern texts and aims to reach out to a broad scholarly community consisting not only of Classicists but also scholars of other literature and aesthetics **The American Year Book** ,1919 **De Rerum Natura III** Titus Lucretius Carus,1997 Lucretius poem for which Epicurean philosophy provided the inspiration attempts to explain the nature of the universe and its processes with the object of freeing mankind from religious fears The third book not only seeks to demonstrate that since the soul is mortal there can be no after life but also aims to reconcile the reader to the prospect of the end of his consciousness This edition incorporates a new text and prose translation and is designed to set the book in the context of the whole poem and of the Epicurean philosophical system to explain and elucidate its argument and at the same time to analyse some of the literary and artistic features which contribute to Lucretius poetic achievement and stature Latin
