Modern English Rhetoric And Handbook:

Modern English Rhetoric and Handbook Robert M. Gorrell, Charlton Grant Laird, Margaret Urie, 1988 **Letter-writing Manuals and Instruction from Antiquity to the Present** Carol Poster, Linda C. Mitchell, 2007 Once nearly as ubiquitous as dictionaries and cookbooks are today letter writing manuals and their predecessors served to instruct individuals not only on the art of letter composition but also in effect on personal conduct Poster and Mitchell contend that the study of letter writing theory which bridges rhetorical theory and grammatical studies represents an emerging discipline in need of definition In this volume they gather the contributions of eleven experts to sketch the contours of epistolary theory and collect the historic and bibliographic materials from Isocrates to email that form the basis for its study **The Oxford Handbook of English Prose 1500-1640** Andrew Hadfield, 2013-07-04 The Oxford Handbook of English Prose 1500 1640 is the only available overview of early modern English prose writing It considers the range and variety of the substance and types of English prose and also analyses the forms and styles of writing adopted in the early modern period Catalogue Juniata College (Huntingdon, Pa.), 1899 *The Oxford Handbook of the Age of Shakespeare* Robert Malcolm Smuts, 2016 Rather than seeking to survey the historical background to Shakespeare the essays in the collection display a variety of perspectives insights and methodologies found in current historical work that may also inform literary studies In addition to Elizabethan and early seventeenth century politics they examine such topics as the characteristics of the early modern political imagination the growth of public controversy over religion and other issues during the period and ways in which this can be related to drama attitudes about honour and shame and their relation to concepts of gender histories of crime and murder and ways in which changing attitudes were expressed through architecture printed images and the layout of Tudor gardens **University of Illinois Bulletin**, 1915 The American School Board Journal William George Bruce, William Conrad Bruce, Susanna Cocroft, 1906 A periodical of school administration Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the

ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field
