Drawing on observations and teacher interviews across Sweden, Norway and New Zealand, the book explores successful school teaching practices that promote social justice and equitable health outcomes. In particular, it draws attention to the importance of building relationships, teaching for social cohesion and explicitly teaching about and acting on social inequities as pedagogies for social justice. The book also argues that context matters and that pedagogies for social justice need to recognise how both approaches to and focus on social justice vary in different contexts. This is essential reading for academics and students interested in social justice and working in the fields of education, HPE and teacher education.
