Gods in the Global Village Lester R. Kurtz, 2012 In an era plagued by religious conflict the Third Edition of Gods in the Global Village directly responds to issues of social problems prevalent in the world today Using an engaging thought provoking style author Lester R Kurtz focuses on the relationship among the major faith traditions that inform the thinking and ethical standards of most people in the emerging global social order This book focuses on a central aspect of that common crisis A major assumption of this book is that all knowledge is shaped by the social context of the knower therefore both religious traditions and our studies of them are shaped by the context in which we construct them The author argues that religious pluralism will be a necessary precondition of the global village for the foreseeable future The question that faces us as a human community is not Which religious tradition is true or even Is any religious tradition true but rather How can we enable the various religious and secular traditions to coexist peacefully on the planet The text supports the belief that the sociology of religion itself a pluralistic discipline can provide invaluable insight into the most pressing problems of our time

Which Global Village? Valeria Lerda, 2002-01-30 The word village has the evocative power of ancient shared social values based on solidarity equality and common expectations for the betterment of life The book s title is borrowed from McLuhan s apt metaphor but questions its underlying assumptions The contributors recast some of the basic elements of the complex phenomenon of the so called globalization Trade laws industrial relations economic and political systems are analyzed in a critical perspective Moreover environment and sustainable development languages rights education mobility and migrations are discussed in view of contemporary changes that societies are undergoing throughout the world The vulnerability of societies caught up in new networks of interdependence due to reduced distances also are put to the fore in the context of the new accelerated circulation of information ideas goods and human beings Provocative reading for scholars interested in a multinational Euro Atlanticist perspective on globalization The international discourse is most recently focused on some

negative outgrowths of world economy especially after the Seattle Round December 1999 and its unexpected uprising of protests The researches of the Center for Euro Atlantic Studies University of Genoa in cooperation with scholars from Europe Canada and the United States offer in this collection of essays a multinational contribution which is part of their work in progress on the multifaceted issue of the contemporary global village The book features some optimistic outcomes and some worries about what the new millennium will not achieve despite the common and transnational efforts that is to say a fair re distribution of resources to reach what R W Fogel defines a post modern equality based on values as well as on material wealth In sum the essayists wonder if some of the hidden promises of globalization will develop in a better new century
