This book disseminates current information pertaining to the modulatory effects of foods and other food substances on
behavior and neurological pathways and importantly vice versa This ranges from the neuroendocrine control of eating to the
effects of life threatening disease on eating behavior The importance of this contribution to the scientific literature lies in the
fact that food and eating are an essential component of cultural heritage but the effects of perturbations in the food cognitive
axis can be profound The complex interrelationship between neuropsychological processing diet and behavioral outcome is
explored within the context of the most contemporary psychobiological research in the area This comprehensive
psychobiology and pathology themed text examines the broad spectrum of diet behavioral and neuropsychological
interactions from normative function to occurrences of severe and enduring psychopathological processes Neues und
