transnational dimensions of culture and post identity politics In this volume the economic political and social consequences of the focus on culture in contemporary theories of globalization are analysed around the disparate fields of architecture museum discourse satellite television dub poetry carnival and sub national theatre The discourses of hybridity diaspora cultural difference minoritization are critically interrogated and engaged with through close analysis of cultural objects and practices The essays thus intervene in the debate around modernity globalization and cultural politics and the volume as a whole provides a critical constellation through which the complexity of transnational culture can be framed Thinking through the particular the essays limn the absent universality of forms of capitalist globalization and the volume as a whole provides multiple perspectives from which to enter the singular modernity of our times in all its complexity **Teaching 21st**
