Morphogenesis In Plant Tissue Cultures:

Morphogenesis in Plant Tissue Cultures Woong-Young Soh, Sant Saran Bhojwani, 1999-11-30 This book presents a detailed analysis of up to date literature on in vitro morphogenesis at cell tissue organ and whole plant levels Its driving force is the substantial advances made in the field of morphogenesis in tissue cultures during the last 25 years *Morphogenesis in Plant Tissue Cultures* Woong-Young Soh, Sant Saran Bhojwani, 2013-11-11 Morphogenesis or developmental morphology is a dynamic process and a fascinating field of investigation Since the beginning of this century plant morphologists Eames 1961 anatomists Eames and Macdaniels 1947 and embryologists Maheshwari 1950 have studied the processes of development and differentiation by observing whole plants and their histological preparations and have generated a wealth of information on the structural changes associated with various developmental stages in the life cycle of a large number of plant species Around 1940 plant morphogenesis became an experimental field when plant physiologists initiated studies on the effect of treatments such as application of physiologically active compounds or growth regulators irradiation exposure to different day length temperature and injury on morphological and structural changes During the past two decades geneticists and molecular biologists have become interested in plant morphogenesis and extensive work is being done to understand the regulation of gene expression during morphogenesis and how the products of genetic information control the developmental processes **Morphogenesis in Plant Tissue Cultures** J. Reinert, 1962 *Plant Tissue Culture and Plant Morphogenesis* Raisa Georgievna Butenko, 1968 **Plant Cell and Tissue Culture** Indra K. Vasil, Trevor A. Thorpe, 1994-06-30 Plant Cell and Tissue Culture gives an exhaustive account of plant cell culture and genetic transformation including detailed chapters on all major field and plantation crops Part A presents a comprehensive coverage of all necessary laboratory techniques for the initiation nutrition maintenance and storage of plant cell and tissue cultures including discussions on these topics as well as on morphogenesis and regeneration meristem and shoot tip culture plant protoplasts mutant cell lines variation in tissue cultures isogenic lines fertilization control cryopreservation transformation and the production of secondary metabolites Part B then proceeds into detail on the specific in vitro culture of specific crops including cereals legumes vegetables potatoes other roots and tubers oilseeds temperate fruits tropical fruits plantation crops forest trees and ornamentals Plant Cell and Tissue Culture is and is likely to remain the laboratory manual of choice as well as a source of inspiration and a guide to all workers in the field *Introduction to Plant Tissue Culture* M.
