Morphosyntaxe De Lablatif En Latin Archaique:

Morphosyntaxe de l'ablatif en latin archaïque Louis C. Prat, 1975 Morphosyntaxe de l'ablatif en latin archaïque Louis Charles Prat, 1974 **Morphosyntaxe de l'ablatif en latin archaïque** Louis Charles Prat, 1976 **New Perspectives on Historical Latin Syntax: Constituent syntax : adverbial phrases, adverbs, mood, tense** Philip Baldi, Pierluigi Cuzzolin, 2009

New Perspectives on Historical Latin Syntax is a methodologically uniform multi authored work that traces main currents in the syntactic history of Latin. The term history of Latin or of any other ancient IE language in its most widespread usage means history of phonology and morphology as they have developed from PIE. Standard comparative grammars of Latin have concentrated primarily on the development of the phonological and morphological systems of the language with comparatively little attention paid to historical syntax. This emphasis is reflective of the Indo-European tradition in which Latin Linguistics and Linguistic Theory Harm Pinkster, 1983-01-01. The articles of this collection on Latin linguistics are representative of the kind of research that is currently carried out in the field of linguistics. Most deal with syntax or sentence structure but they vary with respect to their emphasis on theory or description. They also vary with respect to the grammatical framework with which they are formulated with some preponderance of transformational generative approaches. All papers are well informed about the major developments in contemporary linguistics and make extensive use of recent methods and types of argumentation. In the introduction the volume editor briefly reviews the present state of Latin linguistics starting with a section on the question whether it is possible to conduct up to date linguistic research for Latin at all. To be followed by a brief sketch of the impact of recent linguistic theories on Latin linguistics in general and in a final third section an outline is presented of the possible interest the contributions to this volume may have for linguists working on languages other than Latin. The Oxford Latin Syntax Harm Pinkster, 2015. This book applies contemporary linguistic theories and the findings of traditional grammar to the study of Latin syntax. It is the first full scale work of its kind in English and contains extensive examples from literary and non literary sources including Plautus and Cicero.

The Role of Semantic, Pragmatic, and Discourse Factors in the Development of Case Jóhanna Barðdal, Shobhana L. Chelliah, 2009-03-11. The aim of this volume is to bring non syntactic factors in the development of case into the eye of the research field by illustrating the integral role of pragmatics semantics and discourse structure in the historical development of morphologically marked case systems. The articles represent fifteen typologically diverse languages from four different language families i Indo European Vedic Sanskrit Russian Greek Latin Latvian Gothic French German Icelandic and Faroese ii Tibeto Burman especially the Bodic languages and Meithei iii Japanese and iv the Pama Nyungan mixed language Gurindji Kriol. The data also show considerable diversity and include elicited archival corpus based and naturally occurring data. Discussions of mechanisms where change is obtained include semantically and aspectually motivated synchronic case variation discourse motivated subject marking reduction or expansion of case marker distribution.

case syncretism motivated by semantics syntax or language contact and case splits motivated by pragmatics metonymy and subjectification **From Indo-European to Latin** Helena Kurzová,1993-09-15 This study aims to describe the typological characteristics of the original Indo European structure called the derivative flectional stage or sub type and to trace its developments to the paradigmatically organized structure of the individual Indo European languages called the paradigmatic flectional stage or sub type This development is demonstrated in Latin a language characterized by highly developed inflection which attests especially by its verbal system an alternative way of paradigmatising the original structure differing from Old Indian and Greek on which traditional reconstruction was based The notion of derivative flectional type is used to try to penetrate to the original form and historical sources of the IE flectional type without presupposing radical typological change between Proto IE and IE The author's view differs from the traditional theory of prehistoric change in IE structure from isolation to flection via agglutination in that she assumes the origins of flection lie in lexico derivative categorization The book is divided into three parts 1 The Origins and Evolution of the Indo European Flectional Type 2 The Basic Principles and Origins of the Nominal System and Inflections 3 The Indo European Origins of the Latin Verbal System

Constituent Syntax: Adverbial Phrases, Adverbs, Mood, Tense Philip Baldi,Pierluigi Cuzzolin,2010-07-19 New Perspectives on Historical Latin Syntax Constituent Syntax Adverbial Phrases Adverbs Mood Tense is the second of four volumes dealing with the long term evolution of Latin syntax roughly from the 4th century BCE up to the 6th century CE This volume along with Volume 3 comprises chapters dealing with structure and evolution of syntactic phenomena below the level of the sentence

Topics treated in this volume include adverbs adverbial phrases mood modality and tense aspect Chapters are distinguished by their depth of treatment clear style and ample illustration with original citations Their readability is enhanced by the non technical presentation which characterizes all volumes in the set Key features first publication to investigates the long term syntactic history of Latin generally accessible to linguists and non linguists theoretically coherent formulated in functional typological terms does not require reading fluency in Latin since all examples are translated into English

Introduction to Indo-European Linguistics Oswald Szemerényi,Oswald John Louis Szemerényi,1999 Professor Szemerényi's Einführung in die vergleichende Sprachwissenschaft first published in 1970 remains the standard introduction to comparative Indo European linguistics Updated and revised for its English translation it appears here in a new paperback format The introductory section presents a general survey of the principles of diachronic comparative linguistics and the remainder of the book is a thorough and detailed analysis according to those principles of the phonological and morphological structure of the Indo European group of languages Each section of the book has a detailed bibliography so that the student can progress from the general overview to a more detailed examination of particular topics

Case, Semantic Roles, and Grammatical Relations Petra Campe,1994-01-01 This is the first of a series of 6 books dealing with case phenomena in different languages both Indo and non Indo European resulting from work by a team of 20 specialists at the University of Leuven It is

the first time such a large scale investigation into case has been undertaken and a remarkable feature of the project is the use of computer corpora of authentic material This bibliography presents the many dimensions involved in research into case and case related phenomena This includes not only morphological case markers but also the crossconstituent semantic and grammatical relations expressed by morphological case or by its various counterparts morpho syntactic processes such as transitivity and passivization and pragmatic and textual considerations In addition the bibliography reflects the implications of case research for other disciplines such as foreign language teaching and artificial intelligence More than 6000 publications are listed An extensive Subject Index provides easy access to all the topics and major concepts covered A Language Index and a Guide to Languages Language Families conclude the book The other volumes in the series include The Dative 2 vols The Genitive The Nominative and Accusative and Non nuclear Cases **Studies in Archaic Latin**

Inscriptions Brent Harmon Vine,1993 *Argument Structure in Flux* Elly van Gelderen,Jóhanna Barðdal,Michela Cennamo,2013-06-15 The present volume is centered around five linguistic themes argument structure and encoding strategies argument structure and verb classes unexpressed arguments split intransitivity and existential and presentational constructions The articles also cover a variety of typologically different languages and they offer new data from under researched languages on the issues of event and argument structure In some cases novel perspectives from widely discussed languages on highly debated topics are offered also addressing more theoretical aspects concerning the predictability and derivation of linking Several contributions apply current models of the lexicon syntax interface to synchronic data Other contributions focus on diachrony and are based on extensive use of corpora Yet others although empirically and theoretically grounded privilege a methodological discussion presenting analyses based on thorough and long standing fieldwork
