Handbook of Posttraumatic Growth Lawrence G. Calhoun, Richard G. Tedeschi, 2014-07-10 Posttraumatic growth is an area in which investigations are now being undertaken in many different parts of the world The view that individuals can be changed sometimes in radically good ways by their struggle with trauma is ancient and widespread However the systematic focus by scholars and clinicians on the possibilities for growth from the struggle with crisis is relatively recent There are now a growing number of studies and scholarly papers on the antecedents correlates and consequences of posttraumatic growth and there are also theoretical models that can help guide the research further It is clear however that this phenomenon is not yet well understood The Handbook of Posttraumatic Growth Research and Practice provides both clinicians and researchers with a comprehensive and up to date view of what has been done so far In addition it uses the foundations of what has been done to provide suggestions for the next useful steps to take in understanding posttraumatic growth The book offers contributions of important and influential scholars representing a wide array of perspectives of posttraumatic growth This volume serves as an impetus for additional

work both in the academic aspects and in the possibilities for clinical applications of posttraumatic growth This Handbook will appeal to students practitioners and researchers working in a broad array of disciplines and human services **Death, Dying, and Bereavement in a Changing World** Alan Kemp,2018-11-02 In this introductory text on thanatology Alan Kemp continues to take on the central question of mortality the centrality of death coupled with the denial of death in the human experience Drawing from the work of Ernest Becker *Death Dying and Bereavement in a Changing World* provides a multidisciplinary and multidimensional approach to the study of death putting extra emphasis on the how death takes place in a rapidly changing world This new second edition includes the most up to date research data and figures related to death and dying New research on the alternative death movement natural disaster related deaths and cannabis as a form of treatment for life threatening illnesses and updated research on physician assisted suicide as well as on grief as it relates to the DSM 5 have been added *An All-Consuming Desire to Succeed* John Paul Carinci,2011-08-01 An inspirational self help book for those seeking personal fulfillment and professional success from the author of *The Power of Being Different* We are all searching for a better life more inspiration and a way to be more productive and fulfilled without the constant competition in our personal lives and workplaces wearing us down With *An All Consuming Desire to Succeed* you can learn to stand out from the crowd by discovering how to maintain a competitive edge through positive affirmations how to control negative influences the secrets of the highly successful how to plan out and achieve newfound goals and lessons on how to motivate yourself to stay true to your unique vision In the spirit of such inspirational authors as Norman Vincent Peale Napoleon Hill and W Clement Stone John Paul Carinci has written a classic self help book centered around achieving success Any reader seeking a healthy dose of positive motivation to achieve the loftiest goals or even to meet the daily challenges of life is sure to find much of value in John Paul Carinci s inspirational work Foreword Reviews **Desperately Seeking Ethics** Howard Good,2004-09-08 Trends prevailing in the media suggest a seemingly disintegrating concept of media ethics It is no surprise being ethical is hard work and could very well put a person in conflict with prevailing trends Many of the people cited within the 13 essays of *Desperately Seeking Ethics* illustrate this from Socrates and Martin Luther King Jr who both died for their principles to reporter David Kidwell of the Miami Herald who chose jail over testifying for the prosecution in a murder trial This is not just another media ethics book Engaging and non conventional it breaks away from the usual text practice of presenting the ethical theories of well known philosophers in watered down form Instead the contributors all of whom teach media ethics select a poem movie song speech or other cultural document analyze it for implied or explicit ethical lessons and then apply the lessons of that work to a specific case that involved controversial media conduct In addition to endnotes each chapter contains questions for discussion and a list of further readings Where possible the contributors have included all or part of the poems speeches and other documents they analyze as sources of ethical instruction and inspiration
