Mortality And Migration In The Modern World:

Mortality and Migration in the Modern World Ralph Shlomowitz, Lance Brennan, John McDonald, 1996 This is a collection of previously published essays on the mortality suffered by British convicts and free emigrants on the voyage to Australia and by Indian Chinese African and Pacific Islander indentured labourers on their voyages to a variety of destinations across the world The success of various administrative measures in reducing mortality at sea during the 19th century is documented and shown to have a bearing on current debates on the explanation of the 19th century mortality decline in western societies

Mortality and Migration in the Modern World Ralph Shlomowitz, 2024-10-28 The term relocation cost has been coined by Philip Curtin to refer to the increased mortality associated with the migration of people from their childhood disease environments to new ones He and others have quantified this cost for a number of migrant populations notably Africans in the transatlantic slave trade and European troops posted overseas The papers in this volume extend this research agenda by quantifying and analyzing the mortality suffered by other migrant groups both on their voyage and after their arrival at their destination The first three studies deal with free and convict European migration to Australia the following ones with movements of indentured labour from the mid 19th to the present century Chinese African Pacific Islander and above all the migration of Indian labour across half of the globe The collection is introduced by a new essay setting out the historical context and significance of this research

The Dutch Slave Trade, 1500-1850, 2006 Dutch historiography has traditionally concentrated on colonial successes in Asia However the Dutch were also active in West Africa Brazil New Netherland the present state of New York and in the Caribbean In Africa they took part in the gold and ivory trade and finally also in the slave trade something not widely known outside academic circles P C Emmer one of the most prominent experts in this field tells the story of Dutch involvement in the trade from the beginning of the 17th century much later than the Spaniards and the Portuguese and goes on to show how the trade shifted from Brazil to the Caribbean He explains how the purchase of slaves was organized in Africa records their dramatic transport across the Atlantic and examines how the sales machinery worked Drawing on his prolonged study of the Dutch Atlantic slave trade he presents his subject clearly and soberly although never forgetting the tragedy hidden behind the numbers the dark side of the Dutch Golden Age which makes this study not only informative but also very readable

Doctors at Sea R. Haines, 2005-11-22 In this engaging tale of movement from one hemisphere to another we see doctors at work attending to their often odious and demanding duties at sea in quarantine and after arrival The book shows in graphic detail just why a few notorious voyages suffered tragic loss of life in the absence of competent supervision Its emphasis however is on demonstrating the extent to which the professionalism of the majority of surgeon superintendents even on ships where childhood epidemics raged led to the extraordinary saving of life on the Australian route in the Victorian era

industrialization world wars and the rise of nation states Disease and the Modern World: 1500 to the Present Day Mark Harrison, 2013-05-02 Mark Harrison's book illuminates the threats posed by infectious diseases since 1500. He places these diseases within an international perspective and demonstrates the relationship between European expansion and changing epidemiological patterns. The book is a significant introduction to a fascinating subject. Gerald N Grob, Rutgers State University. In this lively and accessible book, Mark Harrison charts the history of disease from the birth of the modern world around 1500 through to the present day. He explores how the rise of modern nation states was closely linked to the threat posed by disease and particularly infectious epidemic diseases. He examines the ways in which disease and its treatment and prevention changed over the centuries under the impact of the Renaissance and the Enlightenment and with the advent of scientific medicine. For the first time, the author integrates the history of disease in the West with a broader analysis of the rise of the modern world as it was transformed by commerce, slavery and colonial rule. Disease played a vital role in this process, easing European domination in some areas, limiting it in others. Harrison goes on to show how a new environment was produced in which poverty and education rather than geography became the main factors in the distribution of disease. Assuming no prior knowledge of the history of disease, *Disease and the Modern World* provides an invaluable introduction to one of the richest and most important areas of history. It will be essential reading for all undergraduates and postgraduates taking courses in the history of disease and medicine and for anyone interested in how disease has shaped and has been shaped by the modern world.
