Demographic Responses to Economic Adjustment in Latin America Georges Photios Tapinos,Andrew Mason,Jorge Bravo,1997 Contains a collection of papers on the impact of economic fluctuations on mortality fertility and labour markets in Latin America during the 1980s **Population Matters** Nancy Birdsall,Allen C. Kelley,Steven W. Sinding,2001 The effect of demography on economic performance has been the subject of intense debate in economics for nearly two centuries In recent years opinion has swung between the Malthusian views of Coale and Hoover and the cornucopian views of Julian Simon Unfortunately until recently data were too weak and analytical models too limited to provide clear insights into the relationship As a result economists as a group have not been clear or conclusive This volume which is based on a collection of papers that heavily rely on data from the 1980s and 1990s and on new analytical approaches sheds important new light on demographic economic relationships and it provides clearer policy conclusions than any recent work on the subject In particular evidence from developing countries throughout the world shows a pattern in recent decades that was not evident earlier countries with higher rates of population growth have tended to see less economic growth An analysis of the role of

demography in the Asian economic miracle strongly suggests that changes in age structures resulting from declining fertility create a one time demographic gift or window of opportunity when the working age population has relatively few dependants of either young or old age to support Countries which recognize and seize on this opportunity can as the Asian tigers did realize healthy bursts in economic output But such results are by no means assured only for countries with otherwise sound economic policies will the window of opportunity yield such dramatic results Finally several of the studies demonstrate the likelihood of a causal relationship between high fertility and poverty While the direction of causality is not always clear and very likely is reciprocal poverty contributes to high fertility and high fertility reinforces poverty the studies support the view that lower fertility at the country level helps create a path out of poverty for many families Population Matters represents an important further step in our understanding of the contribution of population change to economic performance As such it will be a useful volume for policymakers both in developing countries and in international development agencies *Population of Peru; Estimates and Projections: 1962-2002* Martha Bargar, Peter Gardiner, 1971 Compilation of statistical tables and forecasts of population trends in Peru from 1962 to 2002 includes information thereon by sex and age group etc Maps
