Violence and Warfare among Hunter-Gatherers Mark W Allen, Terry L Jones, 2016-07-01 How did warfare originate Was it human genetics Social competition The rise of complexity Intensive study of the long term hunter gatherer past brings us closer to an answer The original chapters in this volume examine cultural areas on five continents where there is archaeological ethnographic and historical evidence for hunter gatherer conflict despite high degrees of mobility small populations and relatively egalitarian social structures Their controversial conclusions will elicit interest among anthropologists archaeologists and those in conflict studies

The Archaeology of Inequality Orlando Cerasuolo, 2021-09-01 The Archaeology of Inequality explores the different aspects of social boundaries and articulation by comparing several interdisciplinary approaches for the analysis of the archaeological data as well as actual case studies from the Prehistory to the Classical world The book explores slavery gender ethnicity and economy as intersecting areas of study within the larger framework of inequality and exemplifies to what degree archaeologists can identify and analyze different patterns of inequality

People of the Middle Fraser Canyon Anna Marie Marie Prentiss, Ian Kuijt, 2012-05-15 The Middle Fraser Canyon contains some of the most important archaeological sites in British Columbia including the remains of ancient villages that supported hundreds if not thousands of people How and why did these villages come into being Why were they abandoned In search of answers to these questions Prentiss and Kuijt take readers on a voyage of discovery into the ancient history of the St t imc or Upper Lillooet a people whose struggles and successes are brought to vivid life through photographs artistic and fictionalized reconstructions of life in the villages and discussions of evidence from archaeological surveys and excavations

Hunter-Gatherer Archaeology as Historical Process Kenneth E. Sassaman, Donald H. Holly, 2016-10-01 The remains of hunter gatherer groups are the most commonly discovered archaeological resources in the world and their study constitutes much of the archaeological research done in North America In spite of paradigm shifting discoveries elsewhere in the world that may indicate that hunter gatherer societies were more complex than simple remnants of a prehistoric past North American archaeology by and large hasn't embraced these theories instead maintaining its general neoevolutionary track This book will change that Combining the

latest empirical studies of archaeological practice with the latest conceptual tools of anthropological and historical theory this volume seeks to set a new course for hunter gatherer archaeology by organizing the chapters around three themes The first section offers diverse views of the role of human agency challenging the premise that hunter gatherer societies were bound by their interactions with the natural world The second section considers how society and culture are constituted Chapters in the final section take the long view of the historical process examining how cultural diversity arises out of interaction and the continuity of ritual practices A closing commentary by H Martin Wobst underscores the promise of an archaeology of foragers that does not associate foraging with any particular ideology or social structure but instead invites inquiry into counterintuitive alternatives Hunter Gatherer Archaeology as Historical Process seeks to blur the divisions between prehistory and history between primitive and modern and between hunter gatherers and people in other societies Because it offers alternatives to the dominant discourse and contributes to the agenda of hunter gatherer research this book will be of interest to anyone involved in the study of foraging peoples

The Oxford Handbook of the Archaeology of Death and Burial Sarah Tarlow, Liv Nilsson Stutz, 2013-06-06 This Handbook reviews the state of mortuary archaeology and its practice with forty four chapters focusing on the history of the discipline and its current scientific techniques and methods Written by leading scholars in the field it derives its examples and case studies from a wide range of time periods and geographical areas

Indigenous Archaeologies Claire Smith, H. Martin Wobst, 2004-11-10 With case studies from North America to Australia and South Africa and covering topics from archaeological ethics to the repatriation of human remains this book charts the development of a new form of archaeology that is informed by indigenous values and agendas This involves fundamental changes in archaeological theory and practice as well as substantive changes in the power relations between archaeologists and indigenous peoples Questions concerning the development of ethical archaeological practices are at the heart of this process
