Mosaics Of Piazza Armerina The Hunting S:

Mosaics of the Greek and Roman World Katherine M. D. Dunbabin, 1999 This book provides a comprehensive account of mosaics in the ancient world from the early pebble mosaics of Greece to the pavements of Christian churches in the East Separate chapters in Part I cover the principal regions of the Roman Empire in turn in order to bring out the distinctive characteristics of their mosaic workshops Questions of technique and production of the role of mosaics in architecture and of their social functions and implications are treated in Part II The book discusses both well known works and recent finds and balances consideration of exceptional masterpieces against standard workshop production Two main lines of approach are followed throughout first the role of mosaics as a significant art form which over an unbroken span illuminates the evolution of pictorial style better than any comparable surviving medium and secondly their character as works of artisan production closely linked to their architectural context

The Jeweled Style Michael J. Roberts, 2018-09-05 In *The Jeweled Style* Michael Roberts offers a new approach to the Latin poetry of late antiquity one centering on an aesthetic quality common to both the literature and the art of the period the polychrome patterning of words and phrases or of colors and shapes In Roberts's view the writer or artist of this period works as a jeweler carefully setting compositional units in a geometric framework consistently demonstrating a preference for effects of patterning over realistic representation and for a unity situated at a higher level than the literal historical sequence of the narrative Roberts's introductory chapter is followed by an anthology of representative narrative and descriptive poetry from the fourth and fifth centuries A.D. Next Roberts traces the use of jewels as a literary metaphor from the first century A.D. to late antiquity He then compares the works of late antique literature to wall and floor mosaics

ivory diptychs Christian sarcophagi and contemporary styles of dress Emphasizing that the poetry of this period is not uniform he differentiates the main genres of Christian narrative poetry biblical and hagiographical epic from secular examples of the jeweled style such as the poetry of Ausonius and Sidonius Roberts concludes by examining the influence of late antique aesthetics on the medieval poetics of Matthew of Vendôme and Geoffrey of Vinsauf Elegantly written and augmented by twenty three illustrations The Jeweled Style will be welcomed by many readers including Latinists and other classicists medievalists and Renaissance scholars specializing in literature Byzantinists and art historians Cave Canem Iain Ferris, 2018-02-15 Lavishly illustrated this book examines both written and archaeological sources particularly visual evidence in the form of sculptures coins mosaics wall paintings and decorated everyday items in order to shed light on animals in Roman culture **Filosofiana, the Villa of Piazza Armerina** Andrea Carandini, Andreina Ricci, Mariette De Vos, Maura Medri, 1982 **A History of Roman Art** Steven L. Humphrey, 1986-01-01 **The Oxford History of Western Art** Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by

explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated. The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis. Another key feature of the narrative is the redefinition of traditional period boundaries. Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities. The art of classical antiquity from c 600 BC to the fall of Rome in AD 410. The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome. European visual regimes from 1527 to 1770. The era of revolutions 1770 to 1914. Modernism and after 1914 to 2000. This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write. The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians. Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations. Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada. Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints. The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students.

Roman Art in the Private Sphere Elaine K. Gazda, Anne E. Haeckl, 1991 This is a stimulating book and should be compulsory reading for all students of Roman art Classical Review For all the authors attention to the ensemble a sense of the relation between the formal and the iconographic and the desire to historicize their material contribute to making this anthology unusual in its rigorous and creative attention to the way that art and architecture participate in the construction of the image of the Roman elite Art Bulletin Roman Art in the Private Sphere presents an impressive case for the social and art historical importance of the paintings mosaics and sculptures that filled the private houses of the Roman elite The six essays in this volume range from the first century B C E to the fourth century C E and from the Italian peninsula to the Eastern Empire and North African provinces The essays treat works of art that belonged to every major Roman housing type the single family atrium houses and the insula apartment blocks in Italian cities the dramatically sited villas of the Campanian coast and countryside and the palatial mansions of late antique provincial aristocrats In a complementary fashion the essays consider domestic art in relation to questions of decorum status wealth social privilege and obligation Patrons emerge as actively interested in the character of their surroundings artists appear as responsive to the desire of their patrons The evidence in private art of homosexual conduct in high society is also set forth Originality of subject matter sophisticated appreciation of stylistic and compositional nuance and philosophical perceptions of the relationship of humanity and nature are among the themes that the essays explore Together they demonstrate that Roman domestic art must be viewed on its own terms Elaine K. Gazda is Professor of the History of Art and Curator of Hellenistic and Roman Antiquities at the Kelsey Museum of Archaeology University of Michigan

Diversity and Dominion Kyle S. Van Houtan, Michael S. Northcott, 2010-02-15 This book records a set of dialogues between scientists theologians and philosophers on what can be done to prevent a global slide into ecological collapse It is a uniquely multidisciplinary book that exemplifies the kinds of cultural and scholarly dialogue urgently needed to address the threat to the earth represented by our super industrial civilization The authors debate the conventional account of nature conservation as protection from human activity In contrast to standard accounts they argue what is needed is a new relationship between human beings and the earth that recovers a primal respect for all things This approach seeks to recover forgotten resources in ancient cultures and in the foundational narratives of Western civilization contained in the Bible and in the culture of classical Greece

Images of the Byzantine World Angeliki Lymberopoulou, 2016-12-05 The main themes of this volume are the identification of visions messages and meanings in various facets of Byzantine culture and the possible differences in the perception of these visions messages and meanings as seen by their original audience and by modern scholars The volume addresses the methodological question of how far interpretations should go whether there is a tendency to read too much into too little or whether not enough attention is paid to apparent minutiae that may have been important in their historical context As the essays span a wide chronological era they also present a means of assessing the relative degrees of continuity and change in Byzantine visions messages and meanings over time Thus as highlighted in the concluding section the book discusses the validity of existing notions regarding the fluidity of Byzantine culture when continuity was a matter of a rigid adherence to traditional values and when a manifestation of the ability to adapt old conventions to new circumstances and it shows that in some respects Byzantine cultural history may have been less fragmented than is usually assumed Similarly by reflecting not just on new interpretations but also on the process of interpreting itself the contributors demonstrate how research within Byzantine studies has evolved over the past thirty years from a set of narrowly defined individual disciplines into a broader exploration of interconnected cultural phenomena

The Art of the Roman Empire Jas Elsner, 2018-05-02 The passage from Imperial Rome to the era of late antiquity when the Roman Empire underwent a religious conversion to Christianity saw some of the most significant and innovative developments in Western culture This stimulating book investigates the role of the visual arts the great diversity of paintings statues luxury arts and masonry as both reflections and agents of those changes Jas Elsner's ground breaking account discusses both Roman and early Christian art in relation to such issues as power death society

acculturation and religion By examining questions of reception viewing and the culture of spectacle alongside the more traditional art historical themes of imperial patronage and stylistic change he presents a fresh and challenging interpretation of an extraordinarily rich cultural crucible in which many fundamental developments of later European art had their origins This second edition includes a new discussion of the Eurasian context of Roman art an updated bibliography and new full colour illustrations

Urban Centers and Rural Contexts in Late Antiquity Thomas S. Burns, John W. Eadie, 2012-01-01 Recent publications on urbanism and the rural environment in Late Antiquity most of which explore a single region or narrow chronological niche have emphasized either textual or archeological evidence None has attempted the more ambitious task of bringing together the full range of such evidence within a multiregional perspective and around common themes Urban Centers and Rural Contexts seeks to redress this omission While ancient literature and the physical remains of cities attest to the power that urban values held over the lives of their inhabitants the rural areas in which the majority of imperial citizens lived have not been well served by the historical record Only recently have archeological excavations and integrated field surveys sufficiently enhanced our knowledge of the rural contexts to demonstrate the continuing interdependence of urban centers and rural communities in Late Antiquity These new data call into question the conventional view that this interdependence progressively declined as a result of governmental crises invasions economic dislocation and the success of Christianization The essays in this volume require us to abandon the search for a single model of urban and rural change to reevaluate the cities and towns of the Empire as centers of habitation rather than archeological museums and to reconsider the evidence of continuous and pervasive cultural change across the countryside Deploying a wide range of material as well as literary evidence the authors provide access not only into the world of elites but also to the scarcely known lives of those without a voice in the literature those men and women who worked in the shops labored in the fields and humbled themselves before their gods They bring us closer to the complexity of life in late ancient communities and in consequence closer to both urban and rural citizens
