Mosquito The Story Of Mans Deadliest Foe:

Mosquito Andrew Spielman, 2025-05-01 Now in paperback a fascinating work of popular science from a world renowned expert on mosquitoes and a prize winning reporter In this lively and comprehensive portrait of the mosquito its role in history and its threat to mankind Spielman and D Antonio take a mosquito s eye view of nature and man They show us how mosquitoes breed live mate and die and introduce us to their enemies both natural and man made The authors present tragic and often grotesque examples of how the mosquito has insinuated itself into human history from the malaria that devastated invaders of ancient Rome to the current widespread West Nile fever panic Filled with little known facts and remarkable anecdotes that bring this tiny being into larger focus Mosquito offers fascinating alarming and convincing evidence that the sooner we get to know this pesky insect the better off we ll be

Mosquito Hunters (A history of hostilities against man's deadiest foe - the mosquito - since 1881) B. K. Tyagi, 2021-01-12 The book also tells the story of some of the mosquito species that contribute to human diseases such as malaria filariasis dengue Zika chikungunya and Japanese encephalitis These diseases have played an important role in slowing down the national progress through depleted economy health and intelligentsia The country spends almost 50% of its health budget in fighting against these ailments Therefore it emerges that besides the brutal facts of how the mosquito has insinuated itself into human history from the malaria that devastated invaders of ancient Rome Alexander The Great had reportedly died due to Plasmodium falciparum malaria while returning home after the battle with the Indian king Poru in the malaria infested Punjab region the story of man s struggle to live with the mosquito from the early 19th Century malaria defeat in Mian Mir under direct charge of Dr Samuel Rickard Christophers who advocated to Dr Ronald Ross s theory of environment sanitation to the malaria deaths of hundreds of rural inhabitants living in The Thar Desert s irrigated Command Area under the world famous Indira Gandhi Nahar Pariyojana in the early 1990s and to the recent panic over the chikungunya virus in Kerala as well as many other States and Union Territories crippling thousands of people in 2006 and deaths from dengue all over the country during 2012-14 need to be told to the modern generation of medical entomologists and vector borne disease specialists to relive the moments of victories and defeats in this vicious age old battle between man and mosquito At the end we find that we have only ourselves to be blamed to a great extent for accelerating the spread of mosquitoes and the diseases they transmit with climate change and increased international travel mosquito borne illnesses are flaring up all over the globe Catastrophic failures of mosquito control have ensured that worldwide even now one person dies of malaria every twelve seconds This book describes in a mosquito s eye view how mosquito breeds rests feeds flies mate and dies besides interaction with her natural enemies The book also deals with the current constraints and future control prospects of mosquito control In view of the increasing resistance to insecticides and chemotherapy the book throws light on the subject of greatest promise to ending mosquitoes deadly assault on man by rendering them impotent by genetic manipulation by replacing them through paratransgenesis

involving micro organisms such as bacteria and fungi
