Most Offending Soul Alive Tom Harribon And His Remarkable Life:

The Most Offending Soul Alive Judith M. Heimann, 1999-11-01 An English eccentric and adventurer Tom Harrisson 1911 1976 sought knowledge and renown in a dizzying number of fields while breaking most of the rules of civilized society He was a precursor in the field of modern market research he won the DSO for his World War II service in Borneo he led efforts to save the orangutan the green sea turtle and other endangered species he discovered the oldest modern human skull known at the time This hugely enjoyable story of Harrisson s extravagant controversial life offers a sympathetic and insightful look at a charismatic figure who offended as many people as he impressed at the twilight of colonialism on the fringes of the British empire

The Most Offending Soul Alive Judith M. Heimann, 2002 An English eccentric and adventurer Tom Harrison 1911 1976 sought knowledge and renown in a number of fields while breaking most of the rules of civilized society He was a precursor in the field of modern market research he won the DSO for his World War II service in Borneo he led efforts to save the orangutan the green sea turtle and other endangered species and he discovered the oldest human skull known at the time This story of Harrisson s extravagant controversial life offers an insightful look at a charismatic figure who offended as many people as he impressed at the twilight of colonialism on the fringes of the British empire

[In Search of the Rain Forest](#) Candace Slater, 2004-03-22 Collection of essays offers a multi layered understanding of the social complexities of rainforest practice and representation

[Worktown](#) David Hall, 2015-08-13 In the late 1930s the Lancashire town of Bolton witnessed a ground breaking social experiment Over three years a team of ninety observers recorded in painstaking detail the everyday lives of ordinary working people at work and play in the pub dance hall factory and on holiday Their aim was to create an anthropology of ourselves The first of its kind it later grew into the Mass Observation movement that proved so crucial to our understanding of public opinion in future generations The project attracted a cast of larger than life characters not least its founders the charismatic and unconventional anthropologist Tom Harrisson and the surrealist intellectuals Charles Madge and Humphrey Jennings They were joined by a disparate band of men and women students artists writers and photographers unemployed workers and local volunteers who worked tirelessly to turn the idle pleasure of people watching into a science Drawing on their vivid reports photographs and first hand sources David Hall relates the extraordinary story of this eccentric short lived but hugely influential project Along the way he creates a richly detailed fascinating portrait of a lost chapter of British social history and of the life of an industrial northern town before the world changed for ever

[Special Force](#) Alastair MacKenzie, 2011-10-30 The exploits of the British Army s elite 22nd Special Air Service Regiment the regiment of the SAS that forms part of the Regular army are shrouded in mystery and myths abound about its members But what is the truth behind the public facade of clinical professionalism How has such a small regiment attracted so many weighty legends And what is the purpose of the SAS in the 21st century Special Force provides an original and unusually critical overview of the activities of the SAS from the Malayan Emergency of 1950 to the present day In the context of a detailed and often

controversial analysis of the post war activities of the Regiment MacKenzie establishes that the Regiment's almost legendary professional competence is often not backed up by reality Far from being part of a structured deployment of strategic military assets MacKenzie argues that the use of the SAS in recent years has been primarily driven by the entrepreneurial actions of a few SAS commanding officers Special Force not only offers a revelatory history of the SAS in the modern period it is also a disturbing expose of the truth behind the myth It will be essential reading for anyone with an interest in the British military past present and future Scotland's Harvest Richie McCaffery, 2023-07-24 This study is the first exploration of the impact of World War Two on Scottish poets of both the front line and the home front World War One has always been thought of as a poet's war one of horror and futility The poetry of World War Two by contrast has long languished in its shadow though there was a much greater amount of it written This book asks whether these poets felt they were grown for war or rather that they grew through war experience with an emphasis on the possibilities of the future instead of cataloguing the senseless horror of the battlefield How were the hopes of Scottish poets different from their English counterparts How was their poetry different and how did it impact on their later lives Out of Eden: The Peopling of the World Stephen Oppenheimer, 2012-03-01 In a brilliant synthesis of genetic archaeological linguistic and climatic data Oppenheimer challenges current thinking with his claim that there was only one successful migration out of Africa In 1988 Newsweek headlined the startling discovery that everyone alive on the earth today can trace their maternal DNA back to one woman who lived in Africa 150 000 years ago It was thought that modern humans populated the world through a series of migratory waves from their African homeland Now an even more radical view has emerged that the members of just one group are the ancestors of all non Africans now alive and that this group crossed the mouth of the Red Sea a mere 85 000 years ago It means that not only is every person on the planet descended from one African Eve but every non African is related to a more recent Eve from that original migratory group This is a revolutionary new theory about our origins that is both scholarly and entertaining a remarkable account of the kinship of all humans Further details of the findings in this book are presented at www.bradshawfoundation.com/stephenoppenheimer *Keeping Up Appearances* Catherine Horwood, 2011-06-01 The British have always been concerned about accent appearance and class but at no time during the twentieth century was keeping up appearances more important than during the 1920s and 1930s From the impecunious youth anxious to create a favourable impression at the local tennis club dance to female office workers advised by the Daily Mail that women in business kept their position partly if not chiefly by appearance we peer into the intimate lives and anxieties of the middle classes as they dressed to impress Choices were influenced as much by the advent of mass production economic stringency snobbery and the influence of America as by personal aesthetics Seemingly insignificant items such as ties braces gloves and hats could convey a lack of breeding if worn incorrectly This engagingly written and illustrated book explores the social mores behind one of society's most popular activities and reveals not only how we dressed but why

Identities and Social Change in Britain since 1940 Mike Savage, 2010-05-13 *Identities and Social Change in Britain since 1940* examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves. It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life. The book shows that these methods were part of a wider remaking of British national identity in the aftermath of decolonisation in which measures of the rational managed nation eclipsed literary and romantic ones. It also links the emergence of social science methods to the strengthening of technocratic and scientific identities amongst the educated middle classes and to the rise in masculine authority which challenged feminine expertise. This book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain. It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation. Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike.

Nine Wartime Lives James Hinton, Mass-Observation, 2010-01-14 A fascinating re evaluation of the social history of the second world war looking at the diaries kept by nine ordinary people in wartime Britain for the Mass Observation social research organization.
