Der Kapitan Markus F. Robinson,Gertrude J. The Coal Black Sea Stuart Heaver,2022-06-23 On the morning of 22 September 1914 just six weeks into the First World War three Royal Navy armoured cruisers were sunk by a

German U boat in the southern North Sea The action lasted less than 90 minutes but the lives of 1 459 men and boys were lost more than the British losses at the Battle of Trafalgar or in the sinking of RMS Lusitania Yet curiously few have ever heard of the incident The Coal Black Sea tells the extraordinary true story of the disaster from the perspectives of the men serving on HMS Aboukir Hogue and Cressy and the German submariners who orchestrated the attack It also examines how the ignominious loss provoked widespread criticism of the highly ambitious First Lord of the Admiralty the 39 year old Winston Churchill While the families of the victims grieved Churchill succeeded in playing down the significance of the disaster and shifted the blame to those serving at sea to save his faltering career Using a range of official and archival records Stuart Heaver exposes this false narrative and corrects over a century of misinformation to honour those who lost their lives in the worst naval catastrophe of the First World War Anti-Submarine Warfare in World War I John

Abbatiello,2006-05-02 Investigating the employment of British aircraft against German submarines during the final years of the First World War this new book places anti submarine campaigns from the air in the wider history of the First World War The Royal Naval Air Service invested heavily in aircraft of all types aeroplanes seaplanes airships and kite balloons in order to counter the German U boats Under the Royal Air Force the air campaign against U boats continued uninterrupted Aircraft bombed German U boat bases in Flanders conducted area and hunting patrols around the coasts of Britain and escorted merchant convoys to safety Despite the fact that aircraft acting alone destroyed only one U boat during the war the overall contribution of naval aviation to foiling U boat attacks was significant Only five merchant vessels succumbed to submarine attack when convoyed by a combined air and surface escort during World War I This book examines aircraft and weapons technology aircrew training and the aircraft production issues that shaped this campaign Then a close examination of anti submarine operations bombing patrols and escort yields a significantly different judgment from existing interpretations of these operations This study is the first to take an objective look at the writing and publication of the naval and air official histories as they told the story of naval aviation during the Great War The author also examines the German view of aircraft effectiveness through German actions prisoner interrogations official histories and memoirs to provide a comparative judgment The conclusion closes with a brief narrative of post war air anti submarine developments and a summary of findings Overall the author concludes that despite the challenges of organization training and production the employment of aircraft against U boats was largely successful during the Great War This book will be of interest to historians of naval and air power history as well as students of World War I and military history in general Conquer We Must Robin

Prior,2022-12-13 A major new account of Britain s military strategy between 1914 1945 including the two world wars and everything between The First and Second World Wars were separated by a mere two decades making the period 1914 1945 an unprecedentedly intense and violent era of history But how did Britain develop its complex military strategy during these wars and how were decisions made by those at the top Robin Prior examines the influence politicians had on military

operations in the first history to assess both world wars together Drawing uniquely on both military and political archives and previously unexamined sources Prior explores the fraught relationships between civilian and military leaders from Lloyd George's remarkably interventionist stance on military tactics during the First World War to Churchill's near constant arguments with American leaders during the Second Conquer We Must tells the complex story of this military decision making revealing how politicians attempted to control strategy but had little influence on how the army navy and air force actually fought

Air and Sea Power in World War I Maryam Philpott, 2013-05-30 The Great War tore the fabric of Europe apart killing over 35 million men and challenging the notion of heroism in war Air and Sea Power in World War I focuses on the experience of World War I from the perspective of British pilots and sailors themselves to demonstrate that the army centric view of war studies has been too limited The Royal Flying Corps created in 1912 adapted quickly to the needs of modern warfare driven by the enthusiasm of its men In contrast the lack of modernisation in the Royal Navy despite the unveiling of HMS Dreadnought in 1906 undermined Britain's dominance of the seas By considering five key aspects of the war experience this book analyses how motivation was created and sustained What training did men receive and how effectively did this prepare them for roles that were predominantly non combative How was motivation affected by their individual relationship with weaponry development and how different was defensive service on the Home Front when in close proximity to ordinary civilian life Finally Air and Sea Power in World War I looks at the changing reputation of the services during and after the conflict and the extent to which these notions were created by the memoirs of pilots and sailors Featuring new primary source material including the journals of service men themselves this book will be essential reading for students and scholars of World War I and of Naval Aviation and Military History

Churchill and Fisher Barry Gough, 2017-10-06 A vivid study of the politics and stress of high command this book describes the decisive roles of young Winston Churchill as political head of the Admiralty during the First World War Churchill was locked together in a perilous destiny with the ageing British Admiral Jacky Fisher the professional master of the British Navy and the creator of the enormous battleships known as Dreadnoughts Upon these Titans at the Admiralty rested British command of the sea at the moment of its supreme test the challenge presented by the Kaiser's navy under the dangerous Admiral Alfred von Tirpitz Churchill and Fisher had vision genius and energy but the war unfolded in unexpected ways There were no Trafalgars no Nelsons Press and Parliament became battlegrounds for a public expecting decisive victory at sea An ill fated Dardanelles adventure by ships alone as Churchill determined on top of the Zeppelin raids on Britain brought about Fisher's departure from the Admiralty in turn

The Submarine Duncan Redford, 2010-07-30 Underhand and damned un English was the view of submarines in Edwardian Britain Yet by the 1960s the new nuclear powered submarines were seen by the Royal Navy as being the hallmark of a first class navy In this book Duncan Redford a retired Royal Navy submarine officer explores how and why attitudes to the submarine changed in Britain between 1900 and 1977 Using a wide array of previously unpublished sources Redford sheds light on what the British thought about submarines both their own and those that were used against them Rather than providing an operational history of Britain s submarines this book looks at naval and civilian conceptions of what submarine warfare was imagined to be like in the context of unrestricted submarine warfare the world wars and the development of nuclear weaponry With chapters on the coronation and jubilee reviews at Spithead the submarine in novels and films as well as coverage of the Royal Navy s and civilian views of submarines and submarine warfare this book gives a comprehensive

view of the British regard or lack of it for the submarine Through the examination of the British relationship with submarines since 1900 it is possible to see changing patterns in acceptance and tensions between different sub cultures both civil and maritime Since 1900 the meaning constructed around submarines has changed as the submarine has progressed along a road from perdition as the weapon of the weaker power and morally weaker power too to a form of redemption as a major capital unit This book will be essential for naval historians students and those interested in aspects of submarine development and use
