characteristics with a discussion of the wider context in which such objects were commissioned made used adapted and exchanged The book is intended as an introduction to the historical study of Islamic objects employing perspectives from the fields of art history archaeology numismatics ethnography and epigraphy Written with a minimum of technical language and supported by a critical introduction an extensive glossary a timeline and guide for further reading the book is aimed at students and general readers who are interested in the political economic social cultural religious and intellectual histories of **The Penguin Dictionary of Islam** Azim Nanji,2008-04-24 Islam today is a truly global faith yet it remains somewhat of an enigma to many of us Each and every day our newspapers are saturated with references to Islam Quran Taliban Hijab Fatwa Allah Sunni Jihad Shia the list goes on But how much do we really understand Are we in fact misunderstanding The Penguin Dictionary of Islam provides complete impartial answers It includes extensive coverage of the historical formations of the worldwide Muslim community and highlights key modern Muslim figures and events Understanding Islam is vital to understanding our world and this text is the definitive authority designed for both general and academic readers Routledge Revivals: Medieval Islamic Civilization (2006) Josef Meri, 2018-01-12 Islamic civilization flourished in the Middle Ages across a vast geographical area that spans today s Middle and Near East First published in 2006 Medieval Islamic Civilization examines the socio cultural history of the regions where Islam took hold between the 7th and 16th centuries This important two volume work contains over 700 alphabetically arranged entries contributed and signed by international scholars and experts in fields such as Arabic languages Arabic literature architecture history of science Islamic arts Islamic studies Middle Eastern studies Near Eastern studies politics religion Semitic studies theology and more Entries also explore the importance of interfaith relations and the permeation of persons ideas and objects across geographical and intellectual boundaries between Europe and the Islamic world This reference work provides an exhaustive and vivid portrait of Islamic civilization and brings together in one authoritative text all aspects of Islamic civilization during the Middle Ages Accessible to scholars students and non specialists this resource will be of great use in research and understanding of the roots of today s Islamic society as well as the rich and vivid culture of medieval Islamic civilization Gifts in the Age of Empire Sinem Arcak Casale, 2023-07-28 Explores the Safavid and Ottoman empires through the lens of gifts When the Safavid dynasty founded in 1501 built a state that championed Iranian identity and Twelver Shi ism it prompted the more established Ottoman Empire to align itself definitively with Sunni legalism The political religious and military conflicts that arose have since been widely studied but little attention has been paid to their diplomatic relationship Sinem Arcak Casale here sets out to explore these two major Muslim empires through a surprising lens gifts Countless treasures such as intricate carpets gilded silver cups and ivory tusk knives flowed from the Safavid to the Ottoman Empire throughout the sixteenth century While only a handful now survive records of these gifts exist in court chronicles treasury records poems epistolary documents ambassadorial reports and travel narratives Tracing this elaborate archive Casale treats

gifts as representative of the complicated Ottoman Safavid coexistence demonstrating how their rivalry was shaped as much by culture and aesthetics as it was by religious or military conflict Gifts in the Age of Empire explores how gifts were no mere accessories to diplomacy but functioned as a mechanism of competitive interaction between these early modern Muslim The Last Great War of Antiquity James Howard-Johnston, 2021-05-13 The last and longest war of classical antiquity was fought in the early seventh century It was ideologically charged and fought along the full length of the Persian Roman frontier drawing in all the available resources and great powers of the steppe world. The conflict raged on an unprecedented scale and its end brought the classical phase of history to a close Despite all this it has left a conspicuous gap in the history of warfare This book aims to finally fill that gap The war opened in summer 603 when Persian armies launched co ordinated attacks across the Roman frontier Twenty five years later the fighting stopped after the final forlorn counteroffensive thrusts of the Emperor Heraclius into the Persians Mesopotamian heartland James Howard Johnston pieces together the scattered and fragmentary evidence of this period to form a coherent story of the dramatic events as well as an introduction to key players Turks Arabs and Avars as well as Persians and Romans and a tour of the vast lands over which the fighting took place The decisions and actions of individuals particularly Heraclius a general of rare talent and the various immaterial factors affecting morale take centre stage yet due attention is also given to the underlying structures in both belligerent empires and to the Middle East under Persian occupation in the 620s The result is a solidly founded critical history of a conflict of immense significance in the final episode of classical history **Sufi Bodies** Shahzad Bashir, 2013-09-01 Bashir weaves a rich history of Sufi Islam around the depiction of bodily actions in Sufi literature and miniature paintings produced circa 1300 1500 CE Focusing on the Persianate societies of Iran and Central Asia he explores medieval Sufis conception of the human body as the primary shuttle between interior batin and exterior zahir realities with particular attention to three arenas religious activity in the form of rituals rules of etiquette asceticism and a universal hierarchy of saints the deep imprint of Persian poetic paradigms on the articulation of love desire and gender and the reputation of Sufi masters for working miracles which empowered them in all domains of social activity Bashir ultimately offers a new methodology for extracting historical information from religious narratives Cover p 4 Deeds of Artists Mustafa b. Ahmad 'Alī,2011-08-11 This critical edition of Mustafa li s Epic Deeds of Artists about the lives and works of calligraphers and painters offers insight into the artistic cultural social and religious traditions that produced the great artists of the Ottoman and Persianate worlds **Arab Painting** Anna Contadini, 2010 Arab painting preserved mainly in manuscript illustrations of the 12th to 14th centuries is here treated as an artistic corpus fully deserving of appreciation in its own terms and not as a mere precursor to Persian painting The book assembles papers by a distinguished list of scholars that illuminate the variety of material that survives in scientific as well as literary manuscripts Because of the contexts in which the paintings appear a major theoretical concern is precisely the relationship of painting to text It rejects

earlier scholarly habits of analysing paintings in isolation and proposes the integration of text and image as a more satisfactory framework within which to elucidate the characteristics and functions of this impressive body of work This second revised edition includes addenda and corrigenda Cities and the Shaping of Memory in the Ancient Near East Ömür Harmanşah,2013-03-18 This book investigates the practice of constructing cities in the ancient Near East bringing together architecture and cultural history In-Between: Architectural Drawing and Imaginative Knowledge in Islamic and Western Traditions Hooman Koliji, 2016-03-09 Contemporary technical architectural drawings in establishing a direct relationship between the drawing and its object tend to privilege the visible physical world at the expense of the invisible intangible ideas and concepts including that of the designer's imagination As a result drawing may become a utilitarian tool for documentation devoid of any meaningful value in terms of a kind of knowledge that could potentially link the visible and invisible This book argues that design drawings should be recognized as intermediaries mediating between the world of ideas and the world of things spanning the intangible and tangible The notion of the Imaginal as an intermediary between the invisible and visible is discussed showing how architectural drawings lend themselves to this notion by performing as creative agents contributing not only to the physical world but also penetrating the realm of concepts The book argues that this in between quality to architectural drawing is essential and that it is critical to perceive drawings as subtle bodies that hold physical attributes for example form proportion color highly evocative yet with no matter Focusing on Islamic geometric architectural drawings both historical and contemporary it draws on key philosophical and conceptual notions of imagination from the Islamic tradition as these relate to the creative act In doing so this book not only makes important insights into the design process and act of architectural representation but more broadly it adds to debates on philosophies of the imagination linking both Western and Islamic traditions **Islamic Arts and Crafts** Marcus Milwright, 2017-02-03 Islamic art is justly famed for its technological sophistication varied approaches to ornament and innovative employment of the written word But what do we know about the skilled artisans who spent their lives designing and creating the paintings objects and buildings that are so admired today This anthology of written sources dating from the seventh to the twentieth centuries explores numerous aspects of the crafts of the Middle East from the processing of raw materials to the manufacture of finished artefacts You will learn about the legal and ethical dimensions of the arts and crafts the organisation of labour in urban and rural contexts the everyday lives of artisans the gendered dimensions of making things and the impact of industrialisation upon traditional methods of manufacture Each chapter begins with an introduction providing a wider context for the primary sources There are also suggestions for further reading
