## **Mot Ngay Tai Ha Noi One Day In Hanoi:**

*Wards of Hanoi* David Wee Hock Koh, 2006 In this book the author marshals evidence to support an arena specific approach towards viewing Vietnam's state society relations In practice the Vietnamese party state's relations with society vary from the hard and uncompromising state with the bureaucracy getting its way to society's ability to negotiate the state's boundaries and regimes to make them less harsh Any analysis of Vietnam's state society relations needs to recognize and demonstrate both elements of dominance and accommodation as well as specify the context in which either or both are seen Alone neither is adequate In particular the idea of the state needs to be disaggregated because state is not a singular actor that is coherent or uniform through time and space To demonstrate how state disaggregation can make our view more nuanced this book analyses state society interaction at the ward level of Hanoi an urban local authority

**Making Two Vietnams** Olga Dror, 2018-11-29 North and South Vietnamese youths had very different experiences of growing up during the Vietnamese War The book gives a unique perspective on the conflict through the prism of adult youth relations By studying these relations including educational systems social organizations and texts created by and for children during the war Olga Dror analyzes how the two societies dealt with their wartime experience and strove to shape their futures She examines the socialization and politicization of Vietnamese children and teenagers contrasting the North's highly centralized agenda of indoctrination with the South which had no such policy and explores the results of these varied approaches By considering the influence of Western culture on the youth of the South and of socialist culture on the youth of the North we learn how the youth cultures of both Vietnams diverged from their prewar paths and from each other

**Vietnamese Language, Education and Change In and Outside Vietnam** Phan Le Ha, Dat Bao, Joel Windle, 2024-05-21 This open access edited book attempts to break new ground in investigating multiple facets of Vietnamese language education and change in global contexts engaging with global Vietnam through complex lenses of language and education Issues of language globalization and global identities have often been framed through the lens of hierarchical binary power relations and or through a dichotomy between hyper central languages such as English and revisualized or marginalized local language and cultures In this book this dichotomy is turned on its head by considering how Vietnam and Vietnamese are constructed in and outside Vietnam and enacted in global spaces of classrooms textbooks student mobility community engagement curriculum and intercultural contacts Vietnamese is among the world s most spoken languages and is ranked in the top 20th in terms the number of speakers Yet at the same time as a peripheral or southern global language as often seen in the Global North Global South spectrum the dynamics of multilingual and multicultural encounters involving Vietnamese generate distinctive dilemmas and tensions as well as pointing to alternative ways of thinking about global phenomena from a fresh angle Rather than being outside of the global Vietnamese like many other non central global languages is present in diasporas commercial and transnational structures of higher education schooling and in the more conventional settings of primary and secondary school in which visions of culture and language also evoke notions of heritage and tradition as well as bring to the fore deep seated ideological conflicts across time space communities and generations Relevant to students and scholars researching language education identity multiculturalism and their intersections particularly related to Vietnam but also in Southeast Asia and beyond this volume is a pioneering investigation into overlooked contexts and languages from a global southern oriented perspective This book presents an eclectic collection of 15 chapters unified by an interest in developing and teaching the Vietnamese language To my knowledge there has been no previous attempt to make the national language of Vietnam a focus for as many perspectives as are documented in the book In this regard the book makes an original and intriguing contribution to the literature on Vietnamese culture including the culture of Vietnam s expanding diaspora The book is pioneering in the extent to which it draws attention to the many roles played by a national language in a nation s political social and cultural development It also documents the challenges of preserving a national language in settings where it is at risk of being marginalized It is pleasing that so many of the contributing authors are young Vietnamese scholars who can provide a distinctly Vietnamese perspective on concepts and practices of global significance Dr Martin Hayden Emeritus Professor of

Higher Education Southern Cross University Australia Vietnamese Language Education and Change In and Outside Vietnam brings together an excellent collection of chapters that highlight the diverse and important but under explored roles Vietnamese language plays in different settings within and outside Vietnam The fifteen chapters of this much needed book provide unique insights into various aspects and meanings of Vietnamese language Collectively the volume contributes to broadening our view about the evolution and transformation of Vietnamese language under the impacts of local national regional and global forces The book invites readers to engage in a reflective and intersectional approach to rethinking and re examining our understandings of the changes and developments of Vietnamese language over the history of the country Dr Ly Tran Professor Centre for Research for Educational Impact REDI Deakin University Australia and Founder Australia Vietnam International Education Centre
