*The Political Economy of Narcotics* Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition

**Lone Pursuit** Sandra Susan Smith,2007-08-09 Unemployment among black Americans is twice that of whites Myriad theories have been put forward to explain the persistent employment gap between blacks and whites in the U S Structural theorists point to factors such as employer discrimination and the decline of urban manufacturing Other researchers argue that African American residents living in urban neighborhoods of concentrated poverty lack social networks that can connect them to employers Still others believe that African American culture fosters attitudes of defeatism and resistance to work In Lone Pursuit sociologist Sandra Susan Smith cuts through this thicket of competing explanations to examine the actual process of job searching in depth Lone Pursuit reveals that unemployed African Americans living in the inner city are being let down by jobholding peers and government agencies who could help them find work but choose not to Lone Pursuit is a pioneering ethnographic study of the experiences of low skilled black urban residents in Michigan as both jobseekers and jobholders Smith surveyed 105 African American men and women between the ages of 20 and 40 each of whom had no more than a high school diploma She finds that mutual distrust thwarts cooperation between jobseekers and jobholders Jobseekers do not lack social capital per se but are often unable to make use of the network ties they have Most jobholders express reluctance about referring their friends and relatives for jobs fearful of jeopardizing their own reputations with employers Rather than finding a culture of dependency Smith discovered that her underprivileged subjects engage in a discourse of individualism To justify denying assistance to their friends and relatives jobholders characterize their unemployed peers as lacking in motivation and stress the importance of individual responsibility As a result many jobseekers wary of being demeaned for their needy condition hesitate to seek referrals from their peers In a low skill labor market where employers rely heavily on personal referrals this go it alone approach is profoundly self defeating In her observations of a state job center Smith finds similar distrust and non cooperation between jobseekers and center staff members who assume that young black men are unwilling to make an effort to find work As private contractors hired by the state the job center also seeks to meet performance quotas by screening out the riskiest prospects black male and female jobseekers who

face the biggest obstacles to employment and thus need the most help The problem of chronic black joblessness has resisted both the concerted efforts of policymakers and the proliferation of theories offered by researchers By examining the roots of the African American unemployment crisis from the vantage point of the everyday job searching experiences of the urban poor Lone Pursuit provides a novel answer to this decades old puzzle Resilience Process and Its Personal and Social Bases Chau Kiu Cheung,2024-10-30 This book is to elucidate personal and social bases for personal resilience thus addressing the issue concerning the predominance of social factors in shaping resilience Essentially the book starts with a clarification of resilience as a phenomenon rather than a trait The clarification also identifies the personal bases in terms of the resilience process which specifies belief about resilience as a precursor to learning about resilience action for resilience and resilience successively To justify the personal and social bases the book expounds the analytical functionalist framework to specify voluntaristic and deterministic mechanisms to perform the four requisite functions of goal attainment adaptation integration and latency Equipped with the conceptual and theoretical grounds the book proceeds to scrutinize the effects of personal and social factors on resilience and its process The personal factors include personal background characteristics personality functional disability and various beliefs whereas the social factors include experiences of caring peace violence and social exclusion in society kindness sociability and aid from other people and social capital The scrutiny engages five databases about 6 948 Chinese people in Hong Kong and neighboring Chinese cities composed of the public service users older adults students and people with visual impairment Overall the book presents ample theoretical and empirical substances to clarify the genesis of resilience **Consciousness-Based Leadership and Management, Volume 1** Anil K. Maheshwari,2023-03-09 This two volume set examines the need for a consciousness based view of leadership which emphasizes universal human flourishing as opposed to a resource based view which focuses on sustaining a competitive advantage This approach is built around three main principles 1 Paradigm Consciousness is primary including complementary existence of opposites 2 Interpersonal focusing on empathy and compassion and 3 Individual experiencing Oneness and expressing creativity Volume One is divided into three sections The first section focuses on Consciousness based approaches to Inclusive Purposeful Quantum and Vedic leadership The second section focuses on leadership principles from Vedic scriptures such as Ramayana and Vedanta The third section includes leadership principles from other scriptures such as Buddhism Confucianism Daoism and Thirukural Aligning leadership practices with the notion of unbounded consciousness this edited collection will extend the literature on organizational culture leadership and sustainability contributing to solving the grand challenges facing humanity
