The Political Economy of Narcotics Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America s strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition

The Oxford History of Anglicanism Anthony Milton, Jeremy Gregory, Rowan Strong, William L. Sachs, Jeremy Morris, 2017 The Oxford History of Anglicanism provides a global study of

Anglicanism from the sixteenth century to the twenty first The five volumes in the series look at how Anglican identity was constructed and contested since the English Reformation of the sixteenth century and examine its historical influence during the past six centuries They consider not only the ecclesiastical and theological aspects of global Anglicanism but also the political social economic and cultural influences of this form of Christianity that has been historically significant in Western culture and a burgeoning force in non Western societies since the nineteenth century Written by international experts in their various historical fields each volumes analyses the varieties of Anglicanism that have emerged The series also highlights the formal political institutional and ecclesiastical forces that have shaped a global Anglicanism and the interaction of Anglicanism with informal and external influences which have both moulded Anglicanism and been fashioned by it Volume five of The Oxford History of Anglicanism considers the global experience of the Church of England in mission and in the transitions of its mission Churches towards autonomy in the twentieth century The Church developed institutionally yet more than the institutional history of the Church of England and its spheres of influence is probed The contributors focus on what it has meant to be Anglican in diverse contexts What spread from England was not simply a religious institution but the religious tradition it intended to implant The volume addresses questions of the conduct of mission its intended and unintended consequences It offers important insights on what decolonization meant for Anglicans as the mission Church in various global locations became self reliant This study breaks new ground in describing the emergence of an Anglicanism shaped more contextually than externally It illustrates how Anglicanism became enculturated across a broad swath of cultural contexts The influence of context and the challenge of adaption to it framed Anglicanism s twentieth century experience

The Oxford History of Anglicanism, Volume V William L. Sachs, 2017-12-15 The Oxford History of Anglicanism provides a global study of Anglicanism from the sixteenth century to the twenty first The five volumes in the series look at how Anglican identity was constructed and contested since the English Reformation of the sixteenth century and examine its historical influence during the past six centuries They consider not only the ecclesiastical and theological aspects of global Anglicanism but also the political social economic and cultural influences of this form of Christianity that has been historically significant in Western culture and a burgeoning force in non Western societies since the nineteenth century Written by international experts in their various historical fields each volumes analyses the varieties of Anglicanism that have emerged The series also highlights the formal political institutional and ecclesiastical forces that have shaped a global Anglicanism and the interaction of Anglicanism with informal and external influences which have both moulded Anglicanism and been fashioned by it Volume five of The Oxford History of Anglicanism considers the global experience of the Church of England in mission and in the transitions of its mission Churches towards autonomy in the twentieth century The Church developed institutionally yet more than the institutional history of the Church of England and its spheres of influence is probed The contributors focus on what it has meant to be Anglican in diverse contexts What spread from England was not

simply a religious institution but the religious tradition it intended to implant The volume addresses questions of the conduct of mission its intended and unintended consequences It offers important insights on what decolonization meant for Anglicans as the mission Church in various global locations became self reliant This study breaks new ground in describing the emergence of an Anglicanism shaped more contextually than externally It illustrates how Anglicanism became enculturated across a broad swath of cultural contexts The influence of context and the challenge of adaption to it framed Anglicanism s twentieth century experience **Late Hellenistic Greek Literature in Dialogue** Jason König,Nicolas Wiaters,2022-04-27

Late Hellenistic Greek literature both prose and poetry stands out for its richness and diversity Recent work has tended to take an author by author approach that underestimates the interconnectedness of the literary culture of the period The chapters assembled here set out to change that by offering new readings of a wide range of late Hellenistic texts and genres including historiography geography rhetoric and philosophy together with many verse texts and inscriptions In the process they offer new insights into the various ways in which late Hellenistic literature engaged with its social cultural and political contexts while interrogating and revising some of the standard narratives of the relationship between late Hellenistic and imperial Greek literary culture which are too often studied in isolation from each other As a whole the book prompts us to rethink the place of late Hellenistic literature within the wider landscape of Greek and Roman literary history *Creeping Thyme* Ronald Pies,2004-02 This collection of works offers a rare journey through the poet s experience as a psychiatrist and as a man Each poem in this collection has its depth space and flowering height as do the Hyacinth and Late Tulip that Pies tends in his garden This is a world of pain loss joy and growing older where the physician s keen observation meets the poet s compassionate heart and where each line is rich with tension music and maturity In these poems there is a powerful faith in man and his ability to prevail *The Technological Fix* Lisa Rosner,2013-02-01

The term technological fix should mean a fix provided by technology a solution for all of our problems from medicine and food production to the environment and business Instead technological fix has come to mean a cheap quick fix using inappropriate technology that usually creates more problems than it solves This collection sets out the distinction between a technological fix and a true technological solution Bringing together scholars from a variety of disciplines the essays trace the technological fix as it has appeared throughout the twentieth century Addressing such fixes as artificial hearts industrial agriculture and climate engineering these essays examine our need to turn to technology for solutions to all of our problems On Twenty-Five Years of Social Epistemology James H. Collier,2016-03-16 This edited collection charts the development of and prospects for conceiving knowledge as a social phenomenon The origin aims and growth of the journal Social Epistemology founded in 1987 serves to anchor each of the book s contributions Each contribution offers a unique but related insight on current issues affecting the organization and production of knowledge In addition each contribution proposes necessary questions practices and frameworks relevant to the rapidly changing landscape of our conceptions of knowledge The book examines the commercialization of science the

neoliberal university the status and conduct of philosophy the cultures of computer software and social networking the practical political and anthropological applications of social epistemology and how we come to define what human beings are and what activities human beings can and should sustain A diverse group of noted international scholars lends necessary original and challenging perspectives on our collective approach to knowledge This book was originally published as a special issue of Social Epistemology

Lone Pursuit Sandra Susan Smith, 2007-08-09 Unemployment among black Americans is twice that of whites Myriad theories have been put forward to explain the persistent employment gap between blacks and whites in the U S Structural theorists point to factors such as employer discrimination and the decline of urban manufacturing Other researchers argue that African American residents living in urban neighborhoods of concentrated poverty lack social networks that can connect them to employers Still others believe that African American culture fosters attitudes of defeatism and resistance to work In Lone Pursuit sociologist Sandra Susan Smith cuts through this thicket of competing explanations to examine the actual process of job searching in depth Lone Pursuit reveals that unemployed African Americans living in the inner city are being let down by jobholding peers and government agencies who could help them find work but choose not to Lone Pursuit is a pioneering ethnographic study of the experiences of low skilled black urban residents in Michigan as both jobseekers and jobholders Smith surveyed 105 African American men and women

between the ages of 20 and 40 each of whom had no more than a high school diploma She finds that mutual distrust thwarts cooperation between jobseekers and jobholders Jobseekers do not lack social capital per se but are often unable to make use of the network ties they have Most jobholders express reluctance about referring their friends and relatives for jobs fearful of jeopardizing their own reputations with employers Rather than finding a culture of dependency Smith discovered that her underprivileged subjects engage in a discourse of individualism To justify denying assistance to their friends and relatives jobholders characterize their unemployed peers as lacking in motivation and stress the importance of individual responsibility As a result many jobseekers wary of being demeaned for their needy condition hesitate to seek referrals from their peers In a low skill labor market where employers rely heavily on personal referrals this go it alone approach is profoundly self defeating In her observations of a state job center Smith finds similar distrust and non cooperation between jobseekers and center staff members who assume that young black men are unwilling to make an effort to find work As private contractors hired by the state the job center also seeks to meet performance quotas by screening out the riskiest prospects black male and female jobseekers who face the biggest obstacles to employment and thus need the most help The problem of chronic black joblessness has resisted both the concerted efforts of policymakers and the proliferation of theories offered by researchers By examining the roots of the African American unemployment crisis from the vantage point of the everyday job searching experiences of the urban poor Lone Pursuit provides a novel answer to this decades old puzzle
