Owls The Natural History Collections:

General Guide to the Natural History Collections National Museum of Ireland, 1908 Report Upon Natural History Collections Made in Alaska Between the Years 1877 and 1881 Edward William Nelson, 1887 Birds mammals fishes lepidoptera *Catalogue of the Trowbridge Collection of Natural History in the Museum of the University of Michigan* University of Michigan. Museum of Zoology, 1861 **The Natural History of Edward Lear, New Edition** Robert McCracken Peck, 2021-04-13 Edward Lear is well known as the brilliant writer of nonsense poetry children's books and travel books who popularized the limerick and wrote verses such as *The Owl and the Pussycat* But few people are aware that Lear was one of the most talented and accomplished painters of natural history subjects in the nineteenth century and worked with British scientists collectors and publishers to make Britain the nexus for scientific investigation and its circulation One of the best ornithological artists of his generation Lear published his first book a monograph on the parrot family at age 18 and established a format that would be followed by decades by such publishers as John Gould with whom he worked closely and often anonymously Over his career Lear produced a multitude of drawings of birds and mammals from around the world for scientific publications public institutions and individual patrons not just of English species but of birds and mammals from Australia New Zealand and the Americas He is also the Lear in the name of the rare species Lear's Macaw In this book Peck has assembled the first comprehensive view of this important part of Lear's career Featuring over 200 illustrations and a foreword by Sir David Attenborough the book also examines the influence Lear had on modern artists such as Walton Ford and Tony Foster This new edition includes a new chapter that addresses Lear's continued fascination with wildlife and the natural world after giving up his career as a scientific illustrator and his fascination with domestic pets from his own beloved cat which he cartooned repeatedly to the portraits of dogs owned by his family and friends alongside thirteen never before published illustrations including fully finished watercolors rough preliminary sketches and whimsical cartoons Life Histories of North American Birds of Prey: Orders Falconiformes and Strigiformes Arthur Cleveland Bent, 1961 Bulletin, 1938 **The Poetics of Natural History** Christoph Irmscher, 2019-09-08 Newly expanded and in full color this groundbreaking book argues that early American natural historians had a distinctly poetic sensibility producing work that had a visionary intensity Covering naturalists from John James Audubon to PT Barnum it considers not only natural history writing but also illustrations photographs and actual collections of flora and fauna Photography and all associated expenses made possible by a generous grant from Furthermore a program of the J M Kaplan Fund **Life Histories of North American Birds of Prey** Arthur Cleveland Bent, 1937 Owls of the World Claus König, Friedhelm Weick, Jan-Hendrik Becking, 2009-01-01 Owls are enduringly popular birds but due to their nocturnal habits most species are difficult to see well The plumages of many species are cryptic and difficult to separate by plumage alone This problem is compounded by the different morphs that many adopt This book fully describes every known species and subspecies of owl as well as presenting

the latest evidence on owl taxonomy based on DNA work and vocalisations Because voice is vital in owl identification much emphasis is placed on it in the book and sonograms are provided for many species A CD of owl vocalisations will accompany the book Cabinet of Curiosities Colleen Josephine Sheehy, Frederick R. When things move things change Starting from this deceptively simple premise Silvia Spitta opens a fascinating window onto the profound displacements and transformations that have occurred over the six centuries since material objects and human subjects began circulating between Europe and the Americas This extended reflection on the dynamics of misplacement starts with the European practice of collecting objects from the Americas into Wunderkammern literally cabinets of wonders Stripped of all identifying contexts these exuberant collections including the famous Real Gabinete de Historia Natural de Madrid upset European certainties forcing a reorganization of knowledge that gave rise to scientific inquiry and to the epistemological shift we call modernity In contrast cults such as that of the Virgin of Guadalupe arose out of the reverse migration from Europe to the Americas The ultimate marker of mestizo identity in Mexico the Virgin of Guadalupe is now fast crossing the U S Mexico border and miracles are increasingly being reported Misplaced Objects then concludes with the more intimate and familial collections and recollections of Cuban and Mexican American artists and writers that are contributing to the Latinization of the United States Beautifully illustrated and radically interdisciplinary Misplaced Objects clearly demonstrates that it is not the awed viewer but rather the misplaced object itself that unsettles our certainties allowing new meanings to emerge **The History of the Collections Contained in the Natural History Departments**
