Putting Food On What Was The Soviet Table:

Putting Food on what was the Soviet Table Michael P. Claudon, Tamar L. Gutner, 1992 Discontent and economic disintegration in this troubled Soviet winter of 1991-92 are everywhere Shelves in state food stores offer little choice or are empty Republics ban the export of scarce goods to fellow republics Price increases threaten to overwhelm the average Soviet family which is already spending 80 percent of its income and many hours in line each week for food Boris Yeltsin the first popularly elected president of Russia hears demands from former supporters that his government resign because his radical economic reforms are a failure What is to be done Putting food on the Soviet table is an essential first step But correcting 60 years of misguided agricultural and economic policies will not be done in a winter or a year or two Reforming the agricultural system will take decades Breaking up inefficient state and collective farms into smaller individual farms or cooperatives improving roads storage facilities and processing plants and creating free markets that will give producers incentives to respond to consumer needs at reasonable prices will take decades The task is enormous But the resources of the former Soviet Union as the following papers by Soviet and Western agricultural experts indicate are great The country produced more wheat dairy products vegetables and small grains than the United States did in 1990 The country does have the potential to feed itself but not by producing more The country's current food crisis results not from poor harvests though they are a factor but from an inability to get food efficiently from the field to the table Anywhere from 20 to 50 percent of Soviet food crops is lost in this process If agrarian reform is to succeed however it must also be coupled with comprehensive economic reform the acceptance of private property free market pricing and the elimination of central bureaucracies In the short run contributors agree the West will need to provide humanitarian food aid to meet emergency needs and to support emerging and fragile democratic governments But the West can best aid the former Soviet Union by providing long term technical assistance and people to people programs that help the Soviets develop a market economy and the skills to run small independent farms What is clear from these papers is that there is no quick fix for the agricultural problems of the former Soviet Union But what is also clear is the country does have the potential to put food on the table and feed its people well

The Ambivalence of Power in the Twenty-First Century Economy Vadim Radaev,Zoya Kotelnikova,2022-07-07 The Ambivalence of Power in the Twenty First Century Economy contributes to the understanding of the ambivalent nature of power oscillating between conflict and cooperation public and private global and local formal and informal and does so from an empirical perspective It offers a collection of country based cases as well as critically assesses the existing conceptions of power from a cross disciplinary perspective The diverse analyses of power at the macro meso or micro levels allow the volume to highlight the complexity of political economy in the twenty first century Each chapter addresses key elements of that political economy from the ambivalence of the cases of former communist countries that do not conform with the grand narratives about democracy and markets to the dual utility of new technologies such as face recognition thus providing mounting evidence for the centrality of an understanding of ambivalence in the analysis of power especially in the modern state power driven capitalism Anchored in economic sociology and political economy this volume aims to make visible the dimensions of power embedded in economic practices The chapters are predominantly based on post communist practices but this divergent experience is relevant to comparative studies of how power and economy are interrelated **The Soviet Union and Global Environmental Change** Jonathan D. Oldfield,2021-05-26 This book argues that the Soviet Union was a highly influential actor in furthering understandings of society nature interaction on the international stage and played a key role in helping to shape conceptualize and assess the relationship between humankind and the Earth system It considers how humankind s capacity to affect physical and biological systems at a global scale was acknowledged and studied by Soviet scientists discusses how the interaction between Soviet and Western scientists stimulated the development of new technologies and insights which simultaneously facilitated a more profound understanding of the Earth s physical and biological systems and explores how Soviet scientists drew upon pre revolutionary intellectual traditions in order to make sense of society nature interaction and did so in collaboration with a range of international initiatives Overall the book provides a deep analysis of how Soviet scientists conceptualized society nature interaction and influenced the understanding of global physical and biological systems Furthermore it is argued that this intellectual legacy remains of importance today with respect to the activities of Russian science and contemporary global environmental challenges Agriculture and the State in Soviet and Post-Soviet Russia Stephen Wegren,2010-11-23 Winner 1999 Edward A Hewett Book Prize from AAASS A comprehensive original and innovative analysis of the social economic and political factors affecting contemporary Russian reform the book is organized around the central question of the role of the state and its effect on the course of Russian agrarian reform In the wake of the collapse of the USSR contemporary conventional wisdom holds the the Russian state is

weak Stephen Wegren feels that the traditional approach to the weak strong state suffers from measurement and circular logic problems believing that the Russian state thought weaker than in its Soviet past is still relatively stronger than other actors The state s strength allows it to intervene in the rural sector in ways that other power contender cannot Specifically as a measure of state intervention Wegren analyzes how the state has influenced urban rural relations rural rural relations and the nonstate private agricultural sector Several dilemmas arose that have complicated successful agrarian reform as a result of the nature of state interventions how reform policies were defined and the incentives rhar arose from state sponsored policies During contemporary Russian agrarian reform urban rural differences have widened marked by a deterioration in rural standards of living and increased alienation of rural political groups from urban alliances At the same time within the rural sector reform failed to reverse rural egalitarianism In addition the nature of state interventions has undermined attempts to create a vibrant productive private rural sector based on private farming Wegren s research is based upon extensive field work interviews archival documents and published and unpublished source material conducted over a six year period and he demonstrates the link between agrarian reform and the success of overall reform in Russia This learned and often controversial volume will interest political scientists policy makers and scholars and students of contemporary Russia

Bibliography of Agriculture with Subject Index ,1993-03 **Markets Versus Hierarchies** Ekaterina Brancato,2009-01-01 Historians have often debate why political factors have dominated economic developments in Russian history but never as systematically as in this ambitious interdisciplinary study An excellent highly original work It will interest a broad scholarly audience including economists historians free market advocates business historians management specialists and public policy experts This well written volume is an essential holding for research libraries Highly recommended J P McKay Choice This unique book uses a transaction cost perspective to illustrate how hierarchies influenced the structure of markets and behaviour of individual businesses and cartels in pre revolutionary Soviet and present day Russia Ekaterina Brancato exposes the devastating effects of self interested decision making of government officials on economic growth and highlights the inefficiencies of the legal system in Russia She demonstrates that throughout Russian history considerable state involvement in the economy has meant that some markets were highly regulated for most of the 20th century open markets were suppressed by the political regime and entrepreneurial success has been dependent on networking The general population the author argues has exhibited an inadequate propensity to self govern In addition the laws of contract and private property crucial for development of markets have been ineffective The book concludes that

consequently the cost of market transactions has been high and the cost of social networking through hierarchies relatively low This book will strongly appeal to academics and students specializing in industrial organization public choice transition entrepreneurship social networks and cultural studies as well as Russian economic history and political economy Business and management students focusing on transition economies will also find this book to be of particular interest *World Agricultural Economics and Rural Sociology Abstracts* ,1993
