Putting Power In Its Place Create Community Control:

Violence Explained John Wear Burton, 1997 Burton argues that the sources of conflict and violence are on the one hand the denial to many of their personal needs for development social recognition and identity and on the other the social expectation of compliance and the means used to enforce it Social protest terrorism revolution self appointed leaderships ethnic conflicts industrial strife street gangs of unemployed youth and even some family violence can be explained within this frame of structural violence He examines the adversarial institutions of society leadership legislatures the work place the legal system and the international relations system and considers what each would be like if designed to solve basic problems rather than to contain them This provocative and challenging book will be of interest to students lecturers and practitioners of politics administration and management industry law and law enforcement education and social work World 1985 .1984 At the Edge Ann Dale, 2007-10-01 At the Edge is a rich and evocative call to action at a time when new ideas are urgently needed Mandatory reading for policy analysts and decision makers in the public private and volunteer sectors it will be equally useful to scholars teachers students and others interested in creating sustainable societies Throughout the world biophysical evidence is mounting that human growth and activity patterns are slowly destroying the earth This ecological deterioration is accompanied by similar social and economic decline with potentially grave consequences for the continued existence of human societies Yet as Ann Dale compassionately argues it is not too late to take action Hope lies in sustainable development the fundamental human imperative of the 21st century Sustainable development in Dale's view is the process of reconciling three imperatives the ecological the social and the economic Equitable access to resources in all three spheres is fundamental to the global realization of sustainable development This will not be realized without strong leadership by governments at all levels Ultimately needed is a new framework for governance based on human responsibility and a recognition of the interconnectedness of human and natural systems Policymaking and Prosperity Stuart S. Nagel, 2003-01-01 Policymaking and Prosperity is the second volume of a three volume set that examines the multidimensional role of policy in the development and promotion of democracy prosperity and peace The prosperity volume discusses the relationship between democratic practices and economic prosperity Its chapters consider questions of bi and multilateral trade policy relations the impact of economic pluralism sustainable development the global agricultural economy international environmental politics and bioregionalism Counter Culture Anthology Patrick Harrington, Terry Burgoyne, 2006-08-01 First published in 1992 Counter Culture was conceived as part of a War of Position against capitalism It represents a vibrant alternative view of popular culture through reviews debate and commentary This anthology is an introduction to a radical new way of looking at our world www altculture org **Dwellers in the Land** Kirkpatrick Sale,2000 Imagine a world structured around ecological and cultural diversity rather than national and political parameters In response to present and impending ecological and economic crises Kirkpatrick Sale offers a definitive introduction to the

He emphasizes among many other factors the concept of regionalism through natural population division settlement near and stewardship of watershed areas and the importance of communal ownership of and responsibility for the land Dwellers in the Land focuses on the realistic development of these bioregionally focused communities and the places where they are established to create a society that is both ecologically sustainable and satisfying to its inhabitants.
