between Alice in Wonderland and Walt Disney even dates back to 1923 when he founded the famous film studio due to a distribution contract for his first completed short film called Alice's Wonderland. This thesis however focuses on the Disney adaptation from 1951 a 2 D cartoon animation as well as the most recent film adaptation from 2010 a combination of live action film and computer generated animation. Thus the main part of this thesis constitutes a comparative analysis of both adaptations regarding the following aspects: the evolution of the visualisations, the different characters of the heroine Alice, the influences of Walt Disney and Tim Burton on the story lines and the styles of the adaptations and the responses to both films. Thereby the following research questions should be answered: What are the specificities of Carroll's novels? Why did it attract so many filmmakers? Why did both adaptations employ the medium of animation? Did the medium get implemented successfully? How did Walt Disney and Tim Burton affect the story lines and the styles of the adaptations? How did the heroine's character change under their influence? How did the audiences react to the adaptations? What are the reasons for that? The first theoretical part hence starts with a description of the literary model which aims at defining the novels' specificities respectively the essence Carroll tried to convey. Chapter 2 outlines the most important issues of today's adaptation discourse since the theory of adaptation serves as the theoretical basis for the comparative analysis. In chapter 3 an overview of the medium of animation will be given including the medium's possibilities and challenges as well as its techniques.
