## **Pythagoras Trousers God Physics And The Gender War:**

**Pythagoras' Trousers** Margaret Wertheim, 1997 An immensely accessible tour which tells how the physics lab became another Vatican with a no girls allowed sign on its door Susan Faludi this spirited look at the relationship between physics and religion argues that gender inequity in physics is a result of the religious origins of the enterprise **Seduced by Science** Steven Goldberg, 2000-10 American religion Steven Goldberg claims has fallen into a trap Just at the moment when it has amassed the political strength and won the legal right to participate effectively in public debate it has lost its distinctive voice Instead of speaking of human values goals and limits it speaks in the language of science In the United States science has extraordinary influence and respect American religious leaders seeking prestige for their point of view regularly couch their responses to technological developments or defend their faith in scientific terms They claim for instance that medical studies demonstrate the power of prayer that science validates the Bible including its account of creation and that patenting the genetic code is dangerous because genes are the essence of who we are But when ministers priests and rabbis expound on double blind studies and the genetic causes of behavior they do not elevate religion Goldberg maintains they trivialize it **Seduced by Science** examines how by allowing scientific discourse to set the terms of the debate American religious leaders facilitate religion's move away from its more appropriate and important concerns of values morality and humility Science can tell us a lot about what is but precious little about what ought to be and our religious leaders often miss the chance to add an important voice from a faith based perspective to the public debate that follows scientific advances Discussing the most recent and pressing collisions between science and religion such as the medicinal benefits of prayer the human genome project and cloning Goldberg raises the timely question of what the appropriate role of religion might be in public life today Tackling the legal aspects of religious debate Goldberg suggests ways that religious leaders might confront new scientific developments in a more meaningful fashion **The Triumph of Evolution** Niles Eldredge, 2025-06-25 Eldredge presents the most up to date examination of the creation evolution confrontation available

**Challenging Future Practice Possibilities** Joy Higgs, Steven Cork, Debbie Horsfall, 2019-03-25 What might the futures of practice be like is far from a straightforward question Emphasising the before the word future implies one future But futures thinkers have identified a range of futures that people think about In this book we reflect on possible probable and preferable futures in relation to practice and work Readers are invited to consider how their own engagement in shaping possible futures will support ways of working that they deem preferable even those they can hardly imagine **Challenging Future Practice Possibilities** also examines influences that are maintaining the status quo and others that are pushing interest driven change Authors consider the major challenges that practice and practitioners face today such as wicked problems fears for the future and complex demands and opportunities posed by the digital revolution A number of examples of future oriented work directions such as protean careers and artificial intelligence enhancing or even replacing human

workforces are considered along with concerns like the vulnerability of many work situations and workers In some cases workers and employers alike are unprepared for these challenges while others see adapting to these situations as yet another pathway of practice futures evolution

**Uniquely Human: the Basis of Human Rights** Gabriel Moran,2013-08-21 The basis of human rights remains in need of exploration The effectiveness of the language of human rights is threatened by its widespread but uncritical use This book is neither a sermon to believers nor an attack by a skeptic It is a critical look at the basis of those few rights that are genuinely universal for example a right not to be tortured or a right to basic subsistence A human right is a claim that every human being can make on the whole human race The rights that are specifically human arise from a human respect for all living beings There is still a widespread assumption that human rights is just another name for the confused idea of natural rights from the eighteenth century rights that were promulgated by and for adult white males The authors of the UNs Universal Declaration of Human Rights in 1948 assumed that they were reformulating an old idea Instead they were beginning a new idea Human rights can be realized only through conversations across differences within gender age culture and religion This book traces those continuing conversations that fill out the diversity within the unity of the human race The convergence of many particular traditions creates a human tradition that can sustain human rights as a standard of moral conduct for all nations

Reader's Guide to Women's Studies Eleanor Amico,1998-03-20 The Reader s Guide to Women s Studies is a searching and analytical description of the most prominent and influential works written in the now universal field of women s studies Some 200 scholars have contributed to the project which adopts a multi layered approach allowing for comprehensive treatment of its subject matter Entries range from very broad themes such as Health General Works to entries on specific individuals or more focused topics such as Doctors

**Gender, Sex, and Sexualities** Nancy Dess,Jeanne Marecek,Leslie Bell,2018-01-15 For decades the field of gender sex and sexualities has been a focal point of increasing interest This inquiry has been ignited by successive waves of dramatic social change chief among them the re emergence of feminist movements in the U S and Europe in the late 1960s the sustained and increasingly successful bids for legal social and religious acceptance of non heterosexual sexualities in many parts of the world and the burgeoning number of people whether cisgendered gender variant trans or questioning whose individual and collective experiences of gender and sexuality warrant deeper understanding and further progress toward a fuller realization of human potential and civil rights In psychology the intellectual project of understanding gender sex and sexualities encompasses a variety of subfields spanning neuroscience and developmental cognitive social and cultural psychology as well as critical theory As such these approaches have inspired new and different psychological questions as well as increased interest in previously unfamiliar topics of investigation Edited by Nancy K Dess Jeanne Marecek and Leslie C Bell Gender Sex and Sexualities offers both students and scholars the tools they need to consider and approach such questions as how do children come to embrace or repudiate gendered activities and identities how do people experience intimacy desire and sexual

arousal and what strategies can psychologists use to de center their own points of view and effectively contribute to a decolonial psychology As a result this volume will open new avenues of inquiry as well as cross disciplinary conversations for readers everywhere **Gendering European History: 1780- 1920** Barbara Caine,Glenda Sluga,2002-07-16 Gendering

European History covers the period from the French Revolution to the end of the First World War Organised both chronologically and thematically its central theme is the issue of gender and citizenship The book encompasses the late eighteenth century revolutionary period nineteenth century developments concerning work urban and domestic life national politics gender in the fin de siecle and imperialism and concludes with the gender crisis of the First World War Caine and Sluga explore the question of sexual difference in relation to class ethnicity and race and the development of key historical debates about identity work home politics and citizenship in specific national contexts and across Europe At the same time they provide readers new to European history with general information about the social and political contexts in which those debates arose Intended both as an introductory work for tertiary students and one that offers new interpretations for scholars in the field this study is a synthesis bringing together the extensive but often fragmented existing literature on gender in European history It also raises new questions and introduces new sources particularly in relation to the history of gender and nation building The result is a challenging view of the contours of European history in the period from the Enlightenment to the 1920 s Barbara Caine is Professor of History Monash University Victoria Australia Glenda Sluga is Senior Lecturer in History and Director of European Studies University of Sydney New South Wales Australia *Events*

*That Formed the Modern World* Frank W. Thackeray,John E. Findling,2012-05-31 This comprehensive five volume set contains readable essays that describe and interpret the most important global events since the European Renaissance some accompanied by related document excerpts and primary source materials What were the effects of the Age of Exploration on today s ethnic groups and social structure How did the development of moveable type pave the way for Facebook and Twitter Why is the Reformation so critical for understanding today s religious controversies This set will help readers answer these questions by exploring the most significant historical events of the modern world This five volume set covers times from the Renaissance to the present Each volume focuses on a specific historic period and examines 12 events within those time frames that changed the world Each entry provides an introduction that lays out factual material in a chronological manner an in depth essay interpreting the event s significance and an annotated bibliography of the most important current works on the topic Select entries are followed by primary sources pertaining to the event under consideration such as diary entries Targeted to both general readers as well as entry level university students this book also directly supports high school and undergraduate curricula allowing students to identify and contextualize events in order to think critically about their causes aftermath and legacy *Gender and Apocalyptic Desire* Brenda E. Brasher, Lee Quinby,2014-12-18 The female body has

been an object of oppression and control throughout history *Gender and Apocalyptic Desire* exposes the often hidden links

between the struggles of women and the conflict of good versus evil The essays examine the collisions between feminist and apocalyptic thought the ways in which apocalyptic belief functions as bodily discipline and cultural practice and how some currents of apocalyptic desire can enable women's equality A wide range of issues are examined from anti abortion terrorism to the stigmata of Christ and visions of Mary

**Domesticity in the Making of Modern Science** Donald L. Opitz, Staffan Bergwik, Brigitte Van Tiggelen, 2016-01-26 The history of the modern sciences has long overlooked the significance of domesticity as a physical social and symbolic force in the shaping of knowledge production This book provides a welcome reorientation to our understanding of the making of the modern sciences globally by emphasizing the centrality of domesticity in diverse scientific enterprises

*The Science Education of American Girls* Kim Tolley, 2014-04-08 The Science Education of American Girls provides a comparative analysis of the science education of adolescent boys and girls and analyzes the evolution of girls' scientific interests from the antebellum era through the twentieth century Kim Tolley expands the understanding of the structural and cultural obstacles that emerged to transform what in the early nineteenth century was regarded as a girl's subject As the form and content of pre college science education developed Tolley argues direct competition between the sexes increased Subsequently the cultural construction of science as a male subject limited access and opportunity for girls

*The Skeptic Encyclopedia of Pseudoscience* Michael Shermer, 2002-11-14 A thorough objective and balanced analysis of the most prominent controversies made in the name of science from the effectiveness of proposed medical treatments to the reality of supernatural claims Edited by Michael Shermer editor and publisher of The Skeptic magazine this truly unique work provides a comprehensive introduction to the most prominent pseudoscientific claims made in the name of science Covering the popular the academic and the bizarre the encyclopedia includes everything from alien abductions to the Bermuda Triangle crop circles Feng Shui and near death experiences Fifty nine brief descriptive summaries and 23 investigations from The Skeptic magazine give skeptical analyses of subjects as far ranging as acupuncture chiropractic and Atlantis The encyclopedia also gives for and against debates on topics such as evolutionary psychology and case studies on topics like police psychics and the medical intuitive Carolyn Myss Finally the volumes include five classic works in the history of science and pseudoscience including the speech William Jennings Bryan never delivered in the Scopes trial and the first scientific and skeptical investigation of a paranormal spiritual phenomenon by Benjamin Franklin and Antoine Lavoisier

**The Gender and Science Reader** Muriel Lederman, Ingrid Bartsch, 2001 The Gender and Science Reader brings together key articles in a comprehensive investigations of the nature and practice of science

*Nurturing Our Humanity* Riane Eisler, Douglas P. Fry, 2019-07-05 Nurturing Our Humanity offers a new perspective on our personal and social options in today's world showing how we can build societies that support our great human capacities for consciousness caring and creativity It brings together findings largely overlooked from the natural and social sciences debunking the popular idea that we are hard wired for selfishness

war rape and greed Its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule Moving past right vs left religious vs secular Eastern vs Western and other familiar categories that do not include our formative parent child and gender relations it looks at where societies fall on the partnership domination scale On one end is the domination system that ranks man over man man over woman race over race and man over nature On the other end is the more peaceful egalitarian gender balanced and sustainable partnership system Nurturing Our Humanity explores how behaviors values and socio economic institutions develop differently in these two environments documents how this impacts nothing less than how our brains develop examines cultures from this new perspective including societies that for millennia oriented toward partnership and proposes actions supporting the contemporary movement in this more life sustaining and enhancing direction It shows how through today s ever more fearful frenzied and greed driven technologies of destruction and exploitation the domination system may lead us to an evolutionary dead end A more equitable and sustainable way of life is biologically possible and culturally attainable we can change our course

The Earth Is Our Home Nelson Rivera,2016-11-14 This book demonstrates that Mary Midgley s philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views

**The Madame Curie Complex** Julie Des Jardins,2010-03-01 The historian and author of Lillian Gilbreth examines the Great Man myth of science with profiles of women scientists from Marie Curie to Jane Goodall Why is science still considered to be predominantly male profession In The Madame Curie Complex Julie Des Jardin dismantles the myth of the lone male genius reframing the history of science with revelations about women s substantial contributions to the field She explores the lives of some of the most famous female scientists including Jane Goodall the eminent primatologist Rosalind Franklin the chemist whose work anticipated the discovery of DNA s structure Rosalyn Yalow the Nobel Prize winning physicist and of course Marie Curie the Nobel Prize winning pioneer whose towering mythical status has both empowered and stigmatized future generations of women considering a life in science With lively anecdotes and vivid detail The Madame Curie Complex reveals how women scientists have changed the course of science and the role of the scientist

throughout the twentieth century They often asked different questions used different methods and came up with different groundbreaking explanations for phenomena in the natural world      The Scientific Revolution William E. Burns,2001-10-23 An encyclopedic collection of key scientists and the tools and concepts they developed that transformed our understanding of the physical world Many are familiar with the ideas of Copernicus Descartes and Galileo But here the reader is also introduced to lesser known ideas and contributors to the Scientific Revolution such as the mathematical Bernoulli Family and Andreas Vesalius whose anatomical charts revolutionized the study of the human body More marginal characters include the magician Robert Fludd The encyclopedia also discusses subjects like Arabic science and the bizarre history of blood transfusions and institutions like the Universities of Padua and Leiden which were dominant forces in academic medicine and science      The Real Wealth of Nations Riane Eisler,2008-11-03 Eisler exposes the economic double standard that devalues anything stereotypically associated with women and femininity and shows how this distorts not only a society s values but individual s lives as well
