Q Journal A Treatment Diary:

Recovering Bodies G. Thomas Couser, 1997-11-01 This is a provocative look at writing by and about people with illness or disability in particular HIV AIDS breast cancer deafness and paralysis who challenge the stigmas attached to their conditions by telling their lives in their own ways and on their own terms Discussing memoirs diaries collaborative narratives photo documentaries essays and other forms of life writing G Thomas Couser shows that these books are not primarily records of medical conditions they are a means for individuals to recover their bodies or those of loved ones from marginalization and impersonal medical discourse Responding to the recent growth of illness and disability narratives in the United States such works as Juliet Wittman's Breast Cancer Journal John Hockenberry's Moving Violations Paul Monette's Borrowed Time An AIDS Memoir and Lou Ann Walker's A Loss for Words The Story of Deafness in a Family Couser addresses questions of both poetics and politics He examines why and under what circumstances individuals choose to write about illness or disability what role plot plays in such narratives how and whether closure is achieved who assumes the prerogative of narration which conditions are most often represented and which literary conventions lend themselves to representing particular conditions By tracing the development of new subgenres of personal narrative in our time this book explores how explicit consideration of illness and disability has enriched the repertoire of life writing In addition Couser's discussion of medical discourse joins the current debate about whether the biomedical model is entirely conducive to humane care for ill and disabled people With its sympathetic critique of the testimony of those most affected by these conditions Recovering Bodies contributes to an understanding of the relations among bodily dysfunction cultural conventions and identity in contemporary America

The Practice of Autonomy Carl Schneider, 1998 Exploring what patients do want gives direction to the author's inquiry into what they should want What patients want he believes is properly more complex and ambiguous than being empowered In this book he charts that ambiguity to take the autonomy principle past current pieties into the uncertain realities of the sick room and the hospital ward The Practice of Autonomy is a sympathetic but trenchant study of the animating principle of modern bioethics It speaks with freshness insight and even passion to bioethicists and moral philosophers about their theories to lawyers about their methods to medical sociologists about their subject to policy makers about their ambitions to doctors about their work and to patients about their lives

How to Have Theory in an Epidemic Paula A. Treichler, 1999 A collection of essays on the AIDS epidemic by a leading feminist cultural theorist of science

AIDS Narratives Steven F. Kruger, 2013-10-28 This is the first book length study of the rich fiction that has emerged from the AIDS crisis Examining first the ways in which scientific discourse on AIDS has reflected ideologies of gender and sexuality such as the construction of AIDS as a disease of gay men part of a battle over masculinity and thus largely excluding women with AIDS from public attention the book considers how such discourses have shaped narrative understandings of AIDS On the one hand AIDS is seen as an invariably fatal weakening of an individual's bodily defenses a depiction often used to reconfirm

an identification between disease and a weak and vulnerable gayness On the other hand AIDS is understood in terms of an epidemic attributable to gay immorality or unnaturalness The fiction of AIDS depends upon these two narratives with one major subgenre of AIDS novel presenting narratives of personal illness decline and death and a second focusing on epidemic spread These novels also question the narrative structures upon which they depend intervening particularly against the homophobia of those structures though also sometimes reinforcing it

American Literature in Transition, 1990-2000 Stephen J. Burn,2017-12-28 Written in the shadow of the approaching millennium American literature in the 1990s was beset by bleak announcements of the end of books the end of

postmodernism and even the end of literature Yet as conservative critics marked the century's twilight hours by launching elegies for the conventional canon American writers proved the continuing vitality of their literature by reinvigorating inherited forms by adopting and adapting emerging technologies to narrative ends and by finding new voices that had remained outside that canon for too long By reading 1990s literature in a sequence of shifting contexts from independent presses to the AIDS crisis and from angelology to virtual reality American Literature in Transition 1990-2000 provides the fullest map yet of the changing shape of a rich and diverse decade's literary production It offers new perspectives on the period's well known landmarks Toni Morrison Thomas Pynchon David Foster Wallace but also overdue recognition to writers such as Ana Castillo Evan Dara Steve Erickson and Carole Maso
