the questions of who exactly was Gaddafi and what was the relation between his execution the country's wealthy oil resources and the Western involvement including the US British France and Israel This book unravels the important facts behind the execution of Gaddafi in the Arab Spring Empirical studies on this revolution have shown that his assassination was strategically planned by the superpower countries through sponsorship and training of Libyan rebel forces against Gaddafi Britain and France spent millions of dollars daily in their investments in Libya to eliminate Gaddafi by providing weapons and war equipment to the Libyan people who opposed Gaddafi The plot to assassinate Gaddafi was carried out in retaliation on the basis of the anti imperialism approach that he imposed *Edinburgh Companion to the Arab Novel in English* Nouri Gana,2013-09-07 The novel is a largely imported European genre coming relatively late to the history of Arab letters It should therefore perhaps come as no surprise that the first novel to have been written by an Arab was written in English Ameen Rihani's *The Book of Khalid* 1911 However subsequent years saw the flourishing of first Arabic novels then the Francophone Arab novel Only in the last two decades has the Anglophone Arab novel experienced a second coming and it is this re emergence of literary activity that is the focus of this collection Opening up the field of diasporic Anglo Arab literature to critical debate the Companion presents a range of critical responses and pedagogical approaches to the Anglo Arab novel It offers both classroom friendly essays and critically sophisticated analyses bringing together original critical studies of the major Anglo Arab novelists from established and emerging scholars in the field *From the Local to the Global* Gerard McCann,Stephen McCloskey,2015-05-20 The international development sector has found itself confronting new challenges to poverty eradication and the promotion of human rights Climate change has loomed large as a crisis for development practitioners and environmentalists affecting the most vulnerable in the Global South The ongoing financial crisis has created recurrent recessions in the global North while causing budget lines to be reduced for development aid This textbook highlights the extent to which the local and global are interconnected in today's globalised economy It questions the legitimacy of the neoliberal model of development which propelled us into the crisis Including chapters on Latin America China and sub Saharan Africa and topics such as debt injustice gender and migration this completely revised third edition takes stock of the international development environment as it embarks on new policy frameworks to confront new challenges [The Impact of Foreign Interventions on Democracy and Human Rights](#) Ana Magdalena Figueroa,2022-01-28 The Impact of Foreign Interventions on Democracy and Human Rights provides holistic studies exploring the relationship between military and economic interventions and the policies methods intentions and consequences of the various American French and Chinese interventions in the case studies they present *African Institutions* Ali A. Mazrui,Francis Wiafe-Amoako,2015-11-12 Every political system either developed or adopted has an impact on the structure of society and the level of development This book analyzes the evolution and nature of political institutions and their effect on Africa's development The challenges Africa face in developing viable institutions are not limited to the adoption of foreign institutions

but are also rooted in domestic norms that define society itself Sometimes these challenges have to do with the incompatibility between foreign and domestic institutions The fundamental issue then is to understand the African societies cultures and other dynamics that have ensured stability in the past and that need to be recognized when adopting contemporary foreign institutions This comprehensive text examines three key issue areas in Africa politics society and economy It demonstrates how the lack of consideration for domestic norms and societal realities explain the weaker institutions and lack of development on the African continent The chapters examine critical issues such as gender ethnicity and constitution development legitimacy and the state the correlation between abundant resources and instability the dilemmas of political dynasties international economic regimes and Africa s economy and more Featuring many case studies including Kenya South Africa Senegal Ghana Nigeria Tanzania Morocco Togo DRC Ethiopia Rwanda the book provides some explanation of underdevelopment in Africa linking the historical and colonial realities that hinder democratic consolidation to contemporary African politics society and economy

*Causes of War* Thomas Lindemann,2024-08-22 Theories on the origins of war are often based on the premise that the rational actor is in pursuit of material satisfaction such as the quest for power or for wealth These perspectives disregard the need for homo symbolicus the preservation of a positive self image for both emotional and instrumental reasons A good reputation ensures authority and material resources Non recognition can be as much as an explanation of war as that of other explicative variables Two empirical studies examining the role of non recognition in great power conflicts and in international crises will demonstrate the value of this symbolic approach

**A History of Global**

**Capitalism** Sambit Bhattacharyya, 2020-10-31 The book sets out to explore the economic motivations of imperial expansion under capitalism This undoubtedly is related to two fundamental research questions in economic sciences First what factors explain the divergence in living standards across countries under the capitalist economic system Second what ensures internal and external stability of the capitalist economic system The book adopts a unified approach to address these questions Using the standard growth model it shows that improvements in living standards are dependent on access to raw materials labour capital technology and perhaps most importantly economies of scale Empires ensure scale economy through guaranteed access to markets and raw materials The stability of the system depends on growth and distribution and it is not possible to have one without the other However the quest for growth and imperial expansion implies that one empire invariably comes into conflict with another This is perhaps the most unstable and potentially dangerous characteristic of the capitalist system Using extensive historical accounts the book shows that this inherent tension can be best managed by acknowledging mutual spheres of influence within the international system along the lines of the 1815 Vienna Congress This timely publication addresses not only students and scholars of economics geography political science and history but also general readers interested in a better understanding of economic development international relations and the history of global capitalism
