The Effect of the 1958 New York Convention on Foreign Arbitral Awards in the Arab Gulf States Reyadh Mohamed Seyadi, 2017-08-21 In the second half of the twentieth century alongside the evolution of the global economy modern technology rapid transportation and multinational enterprises there was an increased demand for a dispute resolution mechanism that met the needs of traders international trade and economic policy makers Arbitration as an alternative dispute resolution has significantly gained in popularity in the Arab Gulf States over the past two decades or so This is no doubt reason enough to take a closer look at the main theme that defines arbitration in this region National courts of the Arab Gulf states are invariably seen as not very arbitration friendly some possibly even hostile to arbitration Public order alongside the Islamic legal traditions is seen as unruly horse that could possibly undermine the development of international commercial arbitration in this region The contribution in this book will go some way toward dissipating the concerns that are routinely raised about the procedural and practical soundness of arbitration in the Arab Gulf states In addition the book serves to place arbitration in the Arab Gulf states in its present legal systems national laws and courts practices *Freedom of Overflight* Merinda E. Stewart, 2021-10-25 Freedom of overflight is in large part uncontroversial However several recent international disputes and subsequent scrutiny of the exercise of coastal State jurisdiction in international airspace have highlighted the problematic legal nature of this freedom namely how a State s creeping jurisdiction may encroach upon the rights of other States This groundbreaking book examines in depth the ambiguous areas

at the nexus of air law and the law of the sea with respect to the balance between coastal State jurisdiction and freedom of overflight thus providing greater legal certainty regarding State actions involving overflight in international airspace The author identifies and thoroughly examines three highly salient matters impacting overflight in international waters the right of a State to establish safety zones around maritime constructions and the legitimacy of extending these safety zones to the airspace what if anything under international civil aviation law specifically prohibits a State from discriminating against the aircraft of another State in international airspace within its flight information region and whether air defence identification zones can be justified as customary international law Also considered is the law of the sea concerning transit passage through international straits and archipelagic sea lanes as applied to airspace users This is the first detailed study of overflight to combine the perspectives of international civil aviation law and the law of the sea As such it presents a comprehensive analysis of the legality of attempts by coastal States to exercise jurisdiction in international airspace over aircraft registered in other States thus taking a giant step towards determining what freedom of overflight entails by establishing its legitimate limitations It will be welcomed by practitioners policymakers and academics concerned with international transportation national defence international trade and other areas of international law
