Qi Lai Mobilizing One Billion Chinese The Chinese Communication System:

Qi Lai Robert L. Bishop, 1989-01-01 **Qi Lai!** Robert L. Bishop, 1989 **Chinese Communication Theory and Research** Wenshan Jia, Xing Lu, D. Ray Heisey, 2002-06-30 A systematic examination of Chinese communication scholarship and comprehensive critique of its theories and methodologies are long overdue and in this new collection of essays by a multicultural group of scholars both aims are achieved Focusing on such relatively new fields as Chinese health communication and Chinese communication on the internet the volume addresses key questions about the state and the future of its field Both challenging and complementing the Western views of communication it advances theories of cultural and intercultural communication while at the same time broadening our understanding of the relevance of Chinese communication studies to communication studies overall and the ways in which this subdiscipline points the way toward a new and more complicated future The essayists whose origins include the United States Taiwan Hong Kong and China bring their many perspectives to bear on what is the most comprehensive and inclusive review of Chinese communication research literature published in English Of great benefit to Western and Eastern communication theorists philosophers of social science and Asian studies scholars Chinese Communication Theory and Research is an invaluable guide to an increasingly complex and significant field of study **Critical Readings on the Communist Party of China (4 Vols. Set)** Kjeld Erik Brodsgaard, 2016-12-12 The Chinese Communist Party CCP with nearly 90 million members is the largest ruling political party in the world Its power and influence reach into every corner of state society and economy in China Given the CCP's omnipresence in depth knowledge of how the CCP is organised and managed and how it will likely evolve is of paramount importance and is a basic prerequisite for understanding China's rise By bringing together the best scholarship on the CCP covering areas such as organisation cadre management recruitment and training ideology and propaganda factions and elites reform and adaptation corruption and law this collection provides a key to open the black box of Chinese politics **China Turned On** James Lull, 2013-06-19 The years following the Cultural Revolution saw the arrival of television as part of China's effort to modernize and open up to the West Endorsed by the Deng Xiaoping regime as a bridge between government and the people television became at once the official mouthpiece of the Communist Party and the most popular form of entertainment for Chinese people living in the cities But the authorities failed to realize the unmatched cultural power of television to inspire resistance to official ideologies expectations and lifestyles The presence of television in the homes of the urban Chinese strikingly broadened the cultural and political awareness of its audience and provoked the people to imagine better ways of living as individuals families and as a nation Originally published in 1991 set within the framework of China's political and economic environment in the modernization period this insightful analysis is based on ethnographic data collected in China before and after the Tiananmen Square disaster From interviews with leading Chinese television executives and nearly one hundred families in Beijing Shanghai Guangzhou and Xian the author outlays how Chinese

television fosters opposition to the government through the work routines of media professionals television imagery and the role of critical active audience members **Qi Lai!** Robert L. Bishop,1989 The Chinese Journalist Hugo

Burgh,2004-03-01 The Chinese Journalist provides an intriguing introduction to Chinese journalists and their roles within society for both students of Media and Asian Studies The book initially offers a background history of journalists and the media in Communist China before examining the origins and development of Chinese journalism in the nineteenth century

The New Communications Landscape Anura Goonasekera,Jan Servaes,Georgette Wang,2003-09-02 New Communications Landscape explores the theories of media globalization with emphasis on the areas of cultural and local television markets It focuses on the industry content and strategy audience policy and future research HIV / AIDS, Health and the Media in China Johanna Hood,2011-01-25 HIV AIDS is an increasingly serious problem in China with an increasing number of new cases every year As a result HIV organizations have boomed with both state and non governmental organisations responding to the threat with campaigns to increase public awareness of the disease utilising the media as the primary tool to reshape citizens understandings and views of HIV AIDS This book explores how HIV AIDS is portrayed in China s media It argues that despite increasing education campaigns media coverage and social and academic openness towards HIV AIDS many Chinese of the majority Han ethnic group regard infection as a distant possibility believing themselves to be immune and infection a problem only for certain non Han ethnic groups with perceived lower moral standards in particular black Africans The book explores how HIV AIDS is reported analysing the language used in constructing and encoding the health narrative its subjects and ideas about the disease It demonstrates how China s media frequently employs negative events to present the most extreme possibilities of poverty danger disasters and disease with black Africa portrayed as an antiquated distant and socioculturally and politically backward place uniquely unsuitable for the containment of disease in contrast with the progressive scientifically sophisticated and morally upstanding Chinese It argues that this discourse has had the effect of distancing many Chinese from the perceived possibility of infection thus compromising the effectiveness of public health campaigns on HIV AIDs It suggests that the key to combating the spread of the disease lies in challenging the racialised narratives through which the disease is portrayed in China s media rather than simply by aiming to educate greater numbers of people **New Media for a New China** James F. Scotton,William A. Hachten,2010-03-16 New Media for a New China is a timely introduction to thecurrent state of the mass media in China and it s growingrole in the 21st Century global communication system Brings together an international cast of scholars to analyse thediverse roles of China s media covering all the majorindustries advertising newspapers broadcasting magazines film TV PR Considers the position of China s media in the middle ofthe country s tremendous social economic and politicalchanges Explores the concept of the 21st century as China sCentury because of the nation s unprecedentedgrowth *The Internet and Rural Development in China* Jinqiu Zhao,2008 Despite its low penetration in China s vast rural areas the Internet is generally perceived as a new engine for

rural empowerment By examining five Internet application initiatives in rural China this book offers a unique view of the diffusion and usage of the Internet and its implications on the lives of rural people Placed in the political socioeconomic and infrastructure contexts of rural China the book departs from the classical diffusion of innovations model and extends the existing knowledge on the adoption and usage of the Internet by rural people In addition to testing the applicability of the diffusion of innovations theory to the diffusion of Information and Communications Technologies in the rural areas today the study provides rich empirical evidence regarding the actual impact of the Internet on the livelihood of rural people It also shows some innovative uses of the Internet in rural development

Linguistic Engineering Ji Fengyuan, 2003-11-30 When Mao and the Chinese Communist Party won power in 1949 they were determined to create new revolutionary human beings Their most precise instrument of ideological transformation was a massive program of linguistic engineering They taught everyone a new political vocabulary gave old words new meanings converted traditional terms to revolutionary purposes suppressed words that expressed incorrect thought and required the whole population to recite slogans stock phrases and scripts that gave correct linguistic form to correct thought They assumed that constant repetition would cause the revolutionary formulae to penetrate people's minds engendering revolutionary beliefs and values In an introductory chapter Dr Ji assesses the potential of linguistic engineering by examining research on the relationship between language and thought In subsequent chapters she traces the origins of linguistic engineering in China describes its development during the early years of communist rule then explores in detail the unprecedented manipulation of language during the Cultural Revolution of 1966-1976 Along the way she analyzes the forms of linguistic engineering associated with land reform class struggle personal relationships the Great Leap Forward Mao worship Red Guard activism revolutionary violence Public Criticism Meetings the model revolutionary operas and foreign language teaching She also reinterprets Mao's strategy during the early stages of the Cultural Revolution showing how he manipulated exegetical principles and contexts of judgment to frame his alleged opponents The work concludes with an assessment of the successes and failures of linguistic engineering and an account of how the Chinese Communist Party relaxed its control of language after Mao's death

Pop Culture China! Kevin Latham, 2007-07-27 This exciting title in ABC-CLIO's Popular Culture in the Contemporary World series offers the nonspecialist reader the only up-to-date introduction to all facets of popular culture in China China's release from Maoist austerity has produced an explosion in popular culture The Chinese have embraced such technologies as television and cell phones and shaped them to their own social context Understanding modern China requires a thorough knowledge of daily life there This book presents readers from high school and college students to the inquisitive tourist with that knowledge The author a scholar of Chinese culture draws on his own fieldwork along with authoritative scholarship and reporting to give the reader a comprehensive lively and accessible introduction to all aspects of Chinese popular culture The book begins with an introduction to understanding popular culture in China and covers mass media print media cinema film

and video the Internet and also discusses the rise of consumption and consumerism From the modernization of traditional theater to the traditional uses of modern technology this book presents a guide to the emerging culture of a country that will inevitably become increasingly influential in coming years

Communication and Culture D. Ray Heisey, Wenxiang Gong, 1998 This volume offers unique interdisciplinary views on issues in communication and culture with a central focus on Chinese perspectives as China and the world face the 21st century These perspectives are based upon comparative data and East West cross cultural experience Seventeen chapters plus an introductory chapter that places the topics in perspective report and interpret data here for the first time The majority of the contributors are Chinese scholars from various disciplines who now share their research on communication with Western as well as Eastern readers The common thread of the essays is the way in which communication influences culture and cultural dimensions impact the processes of communication The authors represent scholars from education communication studies mass communication intercultural communication sociology rhetoric literature law linguistics telecommunications international relations journalism and sociolinguistics Part I presents cultural perspectives on ethics East West relations translation issues cross cultural competence persuasion journalistic acculturation and gender representation in advertisements Part II addresses international and intercultural communication as seen in comparative campus cultures cross cultural interaction between Chinese and Americans the practice of taijiquan the media depiction of watching the legal implications of the internet and the issues of nation building Part III focuses on mediated communication issues in Chinese films China s media campaign for the olympics Chinese youth s use of Western media talk radio in China and the use of new technologies in the post Cold War era

The Belt and Road Initiative and Australian Mainstream Media Jon Yuan Jiang, 2024-04-01 This book focuses on Australian mainstream media narratives about the Belt and Road Initiative BRI from 2013 to 2020 Set against the background of Sino Australian relations and taking into account the different media systems of China and Australia this book also critically investigates the Chinese public diplomacy narratives of the BRI Drawing on my analysis and semi structured interviews with prominent experts in this area the book addresses an important but under explored question how have Australian mainstream media narratives portrayed the BRI of the Chinese Government from 2013 to 2020 This book fills a gap regarding the portrayal of the BRI in Australian mainstream media and provides new insights into the reasons for narrative shifts in the coverage of the BRI More concretely the book finds that the public diplomacy narratives of the BRI were not explained well by Chinese officials thus allowing Australian journalists and commentators to project their own negative fearful narratives of China onto the BRI project particularly from 2017 onwards More importantly this book argues that the Australian Federal Government s policy towards China had a significant impact on the Australian media s coverage of the BRI that the media clearly followed the Australian Federal Government s lead and not vice versa Thus in many ways Australian mainstream media narratives of the BRI have had a similar outcome as China s ostensibly much more restrictive and propagandistic state dominated media

system Noticeably this book not only has academic significance in the international research community but also holds practical importance in the real world benefiting Australian business leaders media professionals think tank specialists and policymakers

Innovations in Communication Theories Yanru Chen,2021-03-01 This book offers a novel approach to innovations in theories of communication and social development It proposes that the man is the message It argues that communication is woven into the fabric of people s daily lives and a scholar with a keen eye an open heart and an inquiring mind should be able to capture the ubiquitous phenomena of communication and turn them into theoretical observations and even innovations Although most of the propositions in this book cannot be tested empirically at least for now owing to the limitations inherent in current research methods they complement the empirical studies of communication based on measurement With due understanding that Western social sciences including communication studies focus on analytical thinking and the fine division of disciplines this book takes a more synthetic approach to analyzing communication often integrating and contextualizing its various factors and channels and categories in analysis and writing Providing a holistic picture of communication that features the crux of the matter how to reach and capture the heart and soul of people without any attempt to manipulate their minds it is more humanistic than many other books on communication studies Although much of the thinking in the book is seemingly Chinese it nevertheless has a universal appeal

Covering China Ralph Izard,2018-01-18 The relationship between China and the United States has been marked by a lack of mutual comprehension that stretches from America s missionary paternalism in the early twentieth century to the fears and fascinations of the present Throughout the twentieth century China has attracted the attention of American journalists from the first China hands who covered an

ancient country lurching into the modern world to the chroniclers of World War II and the Chinese civil war to the reporters who today explore the contradictions of China's economy. *Covering China* looks at the questions, concerns, and conceptions of all the generations of American reporters against the backdrop of Chinese history and China's own media. *Covering China* is divided into three sections. *Histories* takes up the events, anniversaries, and processes that have shaped Chinese and American media coverage over the century. Included here are chapters focusing on the civil war and analyzing American reporting in the 1930s and 1940s in their many viewpoints as well as in the decades when China was closed to American journalists. Other chapters consider the influence on journalism of various political movements from the anti-Western May 4th movement of 1918 to the Tiananmen Square protests of 1989. *Communicating* explores the challenges of explaining China to Americans and America to the Chinese. Among the topics covered here are the Chinese media reaction to the Clinton scandal, the status of Hong Kong as a window between China and the West, Communist efforts to control public opinion in the media, and the pioneering role of Pearl S. Buck in interpreting China for American readers. The concluding section, *Issues*, examines important stories now emerging in China that will matter to both journalists and China watchers, including the changing roles of Chinese women, little-covered instances of ethnic unrest, and the complexities of economic and environmental stories. The variety of points of view expressed in *Covering China* is a testament to the vigor of contemporary writing on China. As one contributor notes, American media coverage of China needs to challenge existing assumptions and be ready for the unexpected. By doing so, journalists can minimize the sense of shock that erupts in America at each swing of Chinese history. *Covering China* will be of interest to China area specialists, journalists, and cultural historians.

Robert W. Snyder is managing editor of the *Media Studies Journal*, a historian, and author of *Transit Talk*. New York's Bus and Subway Workers Tell Their Stories. He has taught at Princeton University and New York University.

Tibetan Nation Warren Smith, 2019-07-31

This detailed history offers the most comprehensive account available of Tibetan nationalism, Sino-Tibetan relations, and the issue of Tibetan self-determination. Warren Smith explores Tibet's ethnic and national origins, the birth of the Tibetan state, the Buddhist state, and its relations with China, Tibet's quest for independence, and the Chinese takeover of Tibet after 1950. Focusing especially on post-1950 Tibet under Chinese Communist rule, Smith analyzes Marxist-Leninist and Chinese Communist Party nationalities theory and policy, their application in Tibet, and the consequent rise of Tibetan nationalism. Concluding that the essence of the Tibetan issue is self-determination, Smith bolsters his argument with a comprehensive analysis of modern Tibetan and Chinese political histories.
