Qing Colonial Enterprise Ethnography And Cartography In Early Modern China:

Qing Colonial Enterprise Laura Hostetler, 2005-12-15 In *Qing Colonial Enterprise* Laura Hostetler shows how Qing China 1636-1911 used cartography and ethnography to pursue its imperial ambitions. She argues that far from being on the periphery of developments in the early modern period, Qing China both participated in and helped shape the new emphasis on empirical scientific knowledge that was simultaneously transforming Europe and its colonial empires at the time. Although mapping in China is almost as old as Chinese civilization itself, the Qing insistence on accurate to-scale maps of their territory was a new response to the difficulties of administering a vast and growing empire. Likewise, direct observation became increasingly important to Qing ethnographic writings, such as the illustrated manuscripts known as Miao albums, from which twenty color paintings are reproduced in this book. These were intended to educate Qing officials about various non-Han peoples so that they could govern these groups more effectively. Hostetler's groundbreaking account will interest anyone studying the history of the early modern period and colonialism.

Science In China, 1600-1900: Essays By Benjamin A Elman Benjamin A Elman, 2015-05-07 Distinguished historian Benjamin A Elman's collective volume on the history of science in imperial China brings together over 30 years of historical literature on the subject. With updates to the literature and new material including transcripts of podcasts and translated interview articles, *Science in China* takes the reader on a journey starting in the early 17th century with the missionary efforts of the Jesuits in China and ending with the Protestant missions in the 19th century. These two milestone encounters brought Western sciences to local Chinese scholars with great success in shaping modern Chinese science. Elman studies the interaction between Western and Chinese sciences through philological research and evidence and treats the two encounters not as separate events but as a continuum of creative exchange of scientific knowledge and discourse.

The Far East and the English Imagination, 1600-1730 Robert Markley, 2006-01-12 A 2006 investigation of the idea of the powerful Asian empires in the works of Milton, Dryden, Defoe, and Swift.

China's Borderlands under the Qing, 1644-1912 Daniel McMahon, 2020-12-30 This book explores new directions in the study of China's borderlands. In addition to assessing the influential perspectives of other historians, it engages innovative approaches in the author's own research. These studies probe regional accommodations, the intersections of borderland management, martial fortification, and imperial culture, as well as the role of governmental discourse in defining and preserving restive boundary regions. As the issue of China's management of its borderlands grows more pressing, the work presents key information and insights into how that nation's contested fringes have been governed in the past.

Guihai Yuheng Zhi Chengda Fan, 2010 This important work of twelfth-century Chinese scholarship is at once a gazetteer, an ethnography, and a natural history of south China, mainly Guangxi and Hainan, and its indigenous people. Now for the first time in English, a complete and annotated translation captures its charm and significance for new generations of scholars. James M Hargett is professor of Chinese at the State University of New York Albany.

The Invention of China Bill Hayton,2020-10-02 A smart take on modern Chinese nationalism Foreign Policy this provocative account shows that China and its 5 000 years of unified history is a national myth created only a century ago with a political agenda that persists to this day China s current leadership lays claim to a 5 000 year old civilization but China as a unified country and people Bill Hayton argues was created far more recently by a small group of intellectuals In this compelling account Hayton shows how China s present day geopolitical problems the fates of Hong Kong Taiwan Tibet Xinjiang and the South China Sea were born in the struggle to create a modern nation state In the late nineteenth and early twentieth centuries reformers and revolutionaries adopted foreign ideas to invent a new vision of China By asserting a particular politicized version of the past the government bolstered its claim to a vast territory stretching from the Pacific to Central Asia Ranging across history nationhood language and territory Hayton shows how the Republic s reworking of its past not only helped it to justify its right to rule a century ago but continues to motivate and direct policy today

Empire and the Social Sciences Jeremy Adelman,2019-08-22 This thought provoking and original collection looks at how intellectuals and their disciplines have been shaped halted and advanced by the rise and fall of empires It illuminates how ideas did not just reflect but also moulded global order and disorder by informing public policies and discourse Ranging from early modern European empires to debates about recent American hegemony Empire and the Social Sciences shows that world history cannot be separated from the empires that made it and reveals the many ways in which social scientists constructed empires as we know them Taking a truly global approach from China and Japan to modern America the contributors collectively tackle a long dur e of the modern world from the Enlightenment to the present day Linking together specific moments of world history it also puts global history at the centre of a debate about globalization of the social sciences It thus crosses and integrates several disciplines and offers graduate students scholars and faculty an approach that intersects fields crosses regions and maps a history of global social sciences

Edge of Empires John M. Carroll,2005-04-30 In an engaging revisionist study John M Carroll argues that in the century after the Opium War Hong Kong's colonial nature helped create a local Chinese business elite By the end of the nineteenth century the colonial government saw Chinese businessmen as allies in establishing Hong Kong as a commercial center The idea of a commercially vibrant China united them Chinese and British leaders cooperated on issues of mutual concern such as the expansion of capitalism and political and economic directions for an ailing China These Chinese also found opportunities in the colonial system to develop business and commerce In doing so they used Hong Kong's strategic position to underscore their own identity as a distinctive group unlike their mainland counterparts Nationalism took on a specifically Hong Kong character At the same time by contributing to imperial war funds organizing ceremonies for visiting British royalty and attending imperial trade exhibitions the Chinese helped make Hong Kong an active member of the global British Empire In *Edge of Empires* Carroll situates Hong Kong squarely within the

framework of both Chinese and British colonial history while exploring larger questions about the meaning and implications of colonialism in modern history

Taiwan's Imagined Geography Emma Jinhua Teng, 2020-03-23 Until 300 years ago the Chinese considered Taiwan a land beyond the seas a ball of mud inhabited by naked and tattooed savages The incorporation of this island into the Qing empire in the seventeenth century and its evolution into a province by the late nineteenth century involved not only a reconsideration of imperial geography but also a reconceptualization of the Chinese domain The annexation of Taiwan was only one incident in the much larger phenomenon of Qing expansionism into frontier areas that resulted in a doubling of the area controlled from Beijing and the creation of a multi ethnic polity The author argues that travelers accounts and pictures of frontiers such as Taiwan led to a change in the imagined geography of the empire In representing distant lands and ethnically diverse peoples of the frontiers to audiences in China proper these works transformed places once considered non Chinese into familiar parts of the empire and thereby helped to naturalize Qing expansionism By viewing Taiwan China relations as a product of the history of Qing expansionism the author contributes to our understanding of current political events in the region

geography Corporate Conquests C. Patterson Giersch,2020-04-07 Tenacious patterns of ethnic and economic inequality persist in the rural largely minority regions of China's north and southwest. Such inequality is commonly attributed to geography, access to resources and recent political developments. In *Corporate Conquests* C. Patterson Giersch provides a desperately needed challenge to these conventional understandings by tracing the disempowerment of minority communities to the very beginnings of China's modern development. Focusing on the emergence of private and state corporations in Yunnan Province during the late 1800s and early 1900s, the book reveals how entrepreneurs centralized corporate power even as they expanded their businesses throughout the Southwest and into Tibet, Southeast Asia and eastern China. Bringing wealth and cosmopolitan lifestyles to their hometowns, the merchant owners also gained greater access to commodities at the expense of the Southwest's many indigenous minority communities. Meanwhile, new concepts of development shaped the creation of state-run corporations which further concentrated resources in the hands of outsiders. The book reveals how important new ideas and structures of power, now central to the Communist Party's repertoire of rule and oppression, were forged not along China's east coast but along the nation's internal borderlands. It is a must-read for anyone wishing to learn about China's unique state capitalism and its contribution to inequality.

Building New China, Colonizing Kokonor Gregory Rohlf,2016-03-04 *Building New China: Colonizing Kokonor* Resettlement to Amdo and Qinghai in the 1950s examines rural resettlement to the Sino-Tibetan cultural borderlands in the 1950s. More than 100,000 eastern Han and Hui Chinese were sent to Qinghai province, known in Mongolian as Kokonor, and Amdo to Tibetans to plow up new fields in areas that were being incorporated into the Chinese state for the first time. The settlers were to bring their skilled labor, literacy and modern thinking to backward Qinghai to fully exploit its natural resources of oil, natural gas, gold and empty lands for the benefit of the industrializing nation. The book is a social and political history of resettlement focusing on the people who were moved and the overall impact the program had on the province. It is a frontier history but it also narrates a story of state building in modern China that spans the twentieth century and the opening years of the twenty-first.

The Routledge Handbook of Science and Empire Andrew Goss,2021-07-05 *The Routledge Handbook of Science and Empire* introduces readers to important new research in the field of science and empire. This compilation of inquiry into the inextricably intertwined history of science and empire reframes the field, showing that one could not have grown without the other. The volume expands the history of science through careful attention to connections, exchanges and networks beyond the scientific institutions of Europe and the United States. These 27 original essays by established scholars and new talent examine scientific and imperial disciplines, networks of science, scientific practice within empires and decolonised science. The chapters cover a wide range of disciplines from anthropology and psychiatry to biology and geology. There is global coverage with essays about China, Southeast Asia, the Pacific, Australia and New Zealand, India, the Middle East, Russia, the Arctic and North and South America. Specialised essays cover Jesuit science, natural history, collecting, energy systems and science in

UNESCO With authoritative chapters by leading scholars this is a guiding resource for all scholars of empire and science Free of jargon and with clearly written essays the handbook is a valuable path to further inquiry for any student of the history of science and empire The Making of the Human Sciences in China Howard Chiang, 2019-05-07 This volume provides a history of how the human has been constituted as a subject of scientific inquiry in China from the seventeenth century to the present Organized around four themes Parameters of Human Life Formations of the Human Subject Disciplining Knowledge and Deciphering Health it scrutinizes the development of scientific knowledge and technical interest in human organization within an evolving Chinese society Spanning the Ming Qing Republican and contemporary periods its twenty four original synthetic chapters ground the mutual construction of China and the human in concrete historical contexts As a state of the field survey a definitive textbook for teaching and an authoritative reference that guides future research this book pushes Sinology comparative cultural studies and the history of science in new directions
