Quality In Child Care:

What is Quality Child Care? Bettye M. Caldwell,Asa G. Hilliard,1985 **Evaluating the Quality of Family Day Care** Ed. D. P. Burns Bellamy,2001-10 Based on the research and experience of Dr Bellamy this definitive reference work months in the making is one of the most complete and authoritative evaluations of early care and education made available to the public As welfare reforms put more mothers back to work and off public assistance the need for quality child care in the new millennium will reach an all time high Cities throughout the country are facing the ultimate question How does the government help families become self sufficient and productive without jeopardizing quality care and development of the children This book provides a critical look at welfare reforms and at families who struggle to comply with policy guidelines without compromising the care and development of their young children Here in a warm and jargon free style a single work offers families all the practical information needed to select the best quality in child care for their young children Educators and child care officials will find in this work a reservoir of information designed for excellence in early care and education Policymakers will find this work a priceless source in shaping welfare reforms **KidsFirst** Wisconsin. KidsFirst: Quality Counts for Kids Task Force,2004 **Quality Child Care Makes Good Business Sense** ,1989 **Assessing the Validity of the Qualistar Early Learning Quality Rating and Improvement System as a Tool for Improving Child-Care Quality** Gail L. Zellman,Michal Perlman,Vi-Nhuan Le,Claude Messan Setodji,2008-06-26 As a result of the generally low quality of child care in the United States quality rating and improvement systems QRISs are proliferating in the child care arena This study examines the QRIS developed by Qualistar Early Learning a nonprofit organization based in Colorado evaluating how reliable the system s components are whether the QRIS process helped providers to improve and whether and how much children benefit from such improvement Understanding Quality in Child Care Sharmeen Charania,2015 Definitions of quality child care are subjective depending on who is defining quality and constructions of quality remain a contested issue in the early childhood field There are multiple ways of defining quality child care most of which are from the perspectives of researchers policymakers and professionals Few studies of child care quality take into consideration parents perspectives of what quality child care means to them and what they deem as important for the wellbeing of their children Ceglowski and Davis 2004 Duncan et al 2004 Harrist et al 2007 and Liu et al 2004 This study compared parent perspectives to criteria for assessing child care used in Quality First a statewide quality improvement and rating system for providers of center based or home based early care and education to better understand the gaps drawing from ecological theory and discuss the consequences of these different perspectives This study utilized a comparative qualitative analysis of ways in which parents and state agencies view determinants of child care quality The data for this study were collected from interview responses to open ended questions on a larger mixed method study with parents of children under the age of 6 from the central Arizona area The quality indicators used by Quality First included the Infant Toddler Environment Rating

Scale ITERS R Early Childhood Environment Rating Scale ECERS R Family Child Care Environment Rating Scale FCCERS R and the Classroom Assessment Scoring System CLASS which were analyzed and compared to parent descriptions of quality factors in child care The findings of this study contribute to the discussion of ways in which parents perspectives are similar and different to that of quality rating scales in this case those used by Quality First and how the gap may be contributing to unintended consequences In the study I noticed that parents were more inclined toward affect qualities as quality indicators whereas the Quality First had more structural qualities as quality indicators This led to the addressing of the need to bridge this gap to have a more comprehensive understanding of quality child care to meet different needs as identified by parents and professionals

observations indicate that QRIS work best when they help child care providers improve quality on an ongoing basis by providing financial mentoring and other support and when they effectively align with other high quality early childhood and after school systems To that end NWLC and CLASP recommend that state and local policy makers

- 1 Set quality rating standards that appropriately reflect elements essential to the quality of care
- 2 Establish a quality assessment process that is reliable and responsive
- 3 Provide sufficient sustained incentives and support for improving quality
- 4 Design QRIS to meet the needs of all children
- 5 Educate parents about QRIS and high quality care and
- 6 Align QRIS with other high quality programs and components within the early childhood system
