Quality of Service in Wireless Networks Over Unlicensed Spectrum Klara Nahrstedt, 2022-06-01 This Synthesis Lecture presents a discussion of Quality of Service QoS in wireless networks over unlicensed spectrum The topic is presented from the point of view of protocols for wireless networks e g 802 11 rather than the physical layer point of view usually discussed for cellular networks in the licensed wireless spectrum A large number of mobile multimedia wireless applications are being deployed over WiFi IEEE 802 11 and Bluetooth wireless networks and the number will increase in the future as more phones tablets and laptops are equipped with these unlicensed spectrum wireless interfaces Achieving QoS objectives in wireless networks is challenging due to limited wireless resources wireless nodes interference wireless shared media node mobility and diverse topologies. The author presents the QoS problem as 1 an optimization problem with different constraints coming from the interference mobility and wireless resource constraints and 2 an algorithmic problem with fundamental algorithmic functions within wireless resource management and protocols Table of Contents Preface Basics of Quality of Service in Wireless Networks QoS Aware Resource Allocation Bandwidth Management Delay Management Routing Acknowledgment References Author Biography Quality of Service in the Emerging Networking Panorama Josep Solé-Pareta, Michael Smirnov, Piet Van Mieghem, Jordi Domingo-Pascual, Edmundo Monteiro, Peter Reichl, Burkhard Stiller, Richard J.
