Interdisciplinarity in Technology Assessment M. Decker,2013-03-09 Technology Assessment processes can be taken as a

paradigm for interdisciplinary research It is expected that interdisciplinary Technology Assessment is able to find solutions for actual sociopolitical problems that go beyond those expected from one individual scientific discipline alone The common notion that for tasks like this different disciplinary perspectives should be brought together confronts the fact that there is no common notion on how interdisciplinary research should be done In the present volume European experts of Technology Assessment present their perspectives on interdisciplinary research Many focus on methodology policy consulting and participation of stakeholders non experts and citizens Others present concrete case studies concerning climate change and health care Each contribution is commented by an other scientist The result is a discussion like examination of the connection between interdisciplinarity and the main subjects of Technology Assessment

Landslide Hazard and Risk

Thomas Glade, Malcolm G. Anderson, Michael J. Crozier, 2005-04-15 With the increasing need to take an holistic view of landslide hazard and risk this book overviews the concept of risk research and addresses the sociological and psychological issues resulting from landslides Its integrated approach offers understanding and ability for concerned organisations landowners land managers insurance companies and researchers to develop risk management solutions Global case studies illustrate a variety of integrated approaches and a concluding section provides specifications and contexts for the next generation of process models

Quantitative Risk Assessment James M. Humber, Robert F. Almeder, 1987-05-15 The National Science Foundation The National Institute of Occupational Safety and Health and the Center for Technology and Humanities at Georgia State University sponsored a two day national conference on Moral Issues and Public Policy Issues in the Use of the Method of Quantitative Risk Assessment QRA on September 26 and 27 1985 in Atlanta Georgia The purpose of the conference was to promote discussion among practicing risk assessors senior government health officials extensively involved in the practice of QRA and moral philosophers familiar with the method The conference was motivated by the disturbing fact that distinguished scientists ostensibly employing the same method of quantitative risk assessment to the same substances conclude to widely varying and mutually exclusive assessments of safety depending on which of the various assumptions they employ when using the method In short the conference was motivated by widespread concern over the fact that QRA often yields results that are quite controversial and frequently contested by some who in professedly using the same method manage to arrive at significantly different estimates of risk
