Charlotte Bruun,2007-05-19 This book is based on presentations at AE 2006 Aalborg Denmark the second symposium on Artificial Economics As a new constructive simulation method Agent Based Computational Economics ACE has in recent years proven its strength and applicability Coverage in this volume extends to well known questions of economics like the existence of market efficiency and to questions raised by new analytical tools for example networks of social interaction

Real Options and Intellectual Property Philipp N. Baecker,2007-08-06 This book proposes an integrated approach to patent risk and capital budgeting in pharmaceutical research and development R and D developing an option based view OBV of imperfect patent protection which draws upon contingent claims analysis stochastic game theory as well as novel numerical methods The text re initiates a discussion about the contribution of quantitative frameworks to value based R and D management     Union Wage Bargaining and Economic Growth Jörg Lingens,2012-09-03 Writing a book is not possible

without the generous input of many people It is a pleasure to have the opportunity to thank at least some of these people Prof Dr Jochen Michaelis the supervisor of my dissertation taught me how to do economic analysis and initiated my interest in labour market issues Discussions with him have always been enlightening and have greatly improved the analysis in this book Moreover he always encouraged me when I experienced a slump in my motivation He never lost his calmness and good temper not even in situations when my need for discussion must have been bothering him Thanks for that Jochen I am indebted to Prof Dr Peter Weise for taking over the job as the second referee of my thesis He gave very valuable comments and sacrificed his christmas holiday to write the referee report as fast as possible I also want to thank Prof Stefan Voigt and Prof Dr Reinhold Kosfeld the other two members of the dissertation committee for the discussion during the defence of the thesis     *Learning in Economic Systems with Expectations Feedback* Jan Wenzelburger,2006-09-22 Recently economists

have more and more focussed on scenarios in which agents views of the world may be erroneous These notes introduce the concept of perfect forecasting rules which provide best least squares predictions along the evolution of an economic system The framework for nonparametric adaptive learning schemes is developed and it is argued that plausible learning schemes should aim at estimating a perfect forecasting rule taking into account the correct feedback structure of an economy A link is

provided between the traditional rational expectations view and recent behavioristic approaches

**Economic Dynamics and Information** Jaroslav Zajac, 2007-08-01 This book analyzes the existence of equilibria in economies having a measured space of agents and a continuum of agents and commodities Excessive homogeneity with respect to agent productivity leads to instability and non uniqueness of a given stationary state and the indeterminacy of the corresponding stationary state equilibrium Sufficient heterogeneity leads to global saddle path stability uniqueness of a given stationary state and the global uniqueness of the corresponding equilibrium

**Agent-Based Modeling** Norman Ehrentreich, 2007-10-25 This book reconciles the existence of technical trading with the Efficient Market Hypothesis By analyzing a well known agent based model the Santa Fe Institute Artificial Stock Market SFI ASM it finds that when selective forces are weak financial evolution cannot guarantee that only the fittest trading rules will survive Its main contribution lies in the application of standard results from population genetics which have widely been neglected in the agent based community

*International Trade and Multinational Activity* Julian Emami Namini, 2006-10-28 During the last 25 year the neoclassical Heckscher Ohlin trade theory has been extended to the new trade theory by including imperfect competition and fixed costs into the analysis of trade relations Furthermore these micro oriented trade models are increasingly used to analyze macro oriented questions Chapter 2 of this study investigates the dynamic welfare effects of exposure to trade in a new trade model which is extended by firm heterogeneity It is analyzed under which conditions exposure to trade with firm heterogeneity increases or decreases steady state welfare of a country Chapter 3 uses a new trade model to explore which country specific conditions give rise to horizontal or vertical multinational activity Finally chapter 4 combines the Heckscher Ohlin model and a new trade model with horizontal multinational firms with the macro oriented real business cycle model and analyzes the role of goods trade and horizontal multinational firms in international business cycle transmission

**Understanding Supply Chains : Concepts, Critiques, and Futures** Steve New, Roy Westbrook, 2004-09-23

**Circular Economy and Sustainability** Alexandros Stefanakis, Ioannis Nikolaou, 2021-09-14 The concept of circular economy is based on strategies practices policies and technologies to achieve principles related to reusing recycling redesigning repurposing remanufacturing refurbishing and recovering water waste materials and nutrients to preserve natural resources It provides the necessary conditions to encourage economic and social actors to adopt strategies toward sustainability However the increasing complexity of sustainability aspects means that traditional engineering and management economics alone cannot face the new challenges and reach the appropriate solutions Thus this book highlights the role of engineering and management in building a sustainable society by developing a circular economy that establishes and protects strong social and cultural structures based on cross disciplinary knowledge and diverse skills It includes theoretical justification research studies and case studies to provide researchers practitioners professionals and policymakers the appropriate context to work together in promoting sustainability and circular economy thinking Volume 1 Circular Economy and Sustainability Management and Policy
