## **Quantitative Methods For Planning And Urban Studies Hardcover:**

**Quantitative Methods for Planning and Urban Studies** Barry J. Simpson, 1985      **Advanced Quantitative Research Methods for Urban Planners** Reid Ewing, Keunhyun Park, 2020-03-12

Advanced Quantitative Research Methods for Urban Planners provides fundamental knowledge and hands on techniques about research such as research topics and key journals in the planning field advice for technical writing and advanced quantitative methodologies This book aims to provide the reader with a comprehensive and detailed understanding of advanced quantitative methods and to provide guidance on technical writing Complex material is presented in the simplest and clearest way possible using real world planning examples and making the theoretical content of each chapter as tangible as possible Hands on techniques for a variety of quantitative research studies are covered to provide graduate students university faculty and professional researchers with useful guidance and references A companion to Basic Quantitative Research Methods for Urban Planners Advanced Quantitative Research Methods for Urban Planners is an ideal read for researchers who want to branch out methodologically and for practicing planners who need to conduct advanced analyses with planning data      **Basic Quantitative Research Methods for Urban Planners** Reid Ewing, Keunhyun Park, 2020-02-24

In most planning practice and research planners work with quantitative data By summarizing analyzing and presenting data planners create stories and narratives that explain various planning issues Particularly in the era of big data and data mining there is a stronger demand in planning practice and research to increase capacity for data driven storytelling Basic Quantitative Research Methods for Urban Planners provides readers with comprehensive knowledge and hands on techniques for a variety of quantitative research studies from descriptive statistics to commonly used inferential statistics It covers statistical methods from chi square through logistic regression and also quasi experimental studies At the same time the book provides fundamental knowledge about research in general such as planning data sources and uses conceptual frameworks and technical writing The book presents relatively complex material in the simplest and clearest way possible and through the use of real world planning examples makes the theoretical and abstract content of each chapter as tangible as possible It will be invaluable to students and novice researchers from planning programs intermediate researchers who want to branch out methodologically practicing planners who need to conduct basic analyses with planning data and anyone who consumes the research of others and needs to judge its validity and reliability      Fundamentals of Plan Making Edward J. Jepson, Jr., Jerry Weitz, 2020-12-14

Urban and regional planning programs aspire to prepare practitioners to write and implement comprehensive plans Yet academic planning programs often place greater emphasis on theory than practice To help address this gap Fundamentals of Plan Making gives planning students an understanding of research and methods of analysis that apply to comprehensive planning Its informative text and examples will help students develop familiarity with various data sources and acquire the knowledge and ability to conduct basic planning analyses such as population projections housing

needs assessments development impact analyses and land use plans Students will also learn how to implement the various citizen participation methods used by planners and develop an appreciation of the values and roles of practicing planners In this revised second edition Edward Jepson and Jerry Weitz bring their extensive experience as practicing planners and teaching faculty to give planning students the practical hands on tools they need to create and implement real plans and policies With an entirely new census data set expanded discussions of sustainability and other topics as well as new online resources including a companion website the book is now more accessible and more informative and its updated chapters on transportation housing environment economic development and other core planning elements also make it a handy reference for planning practitioners

*Ideology, Political Transitions and the City* Aleksandra Djurasovic, 2016-06-10 Recent history has seen Bosnian and Herzegovinian BiH cities undergoing several transitions Their cities have developed under socialism 1945 1992 have suffered through the civil war during the 1990s and during the last twenty years have been undergoing a slow and multifaceted transition to an indeterminate end point Focusing on the post socialist postwar and neoliberal transitions experienced in BiH the book shows that planning systems deviated from control oriented and top down regulation to flexible approaches for more open for informal development The book analyzes several levels of planning related processes the former Yugoslavia BiH the city of Mostar and three urban zones the Industrial Zone Bi e Polje the City Zone Rondo and the Historic District and the Old Town Zone in order to offer insights into the new planning systems in the late phase of post socialist transition

**Spatial Justice and Planning** Shaoxu Wang, Kai Gu, 2023-07-25 Despite the significance of urban justice in planning research and practice how just societies and cities can be organised and achieved remains contested Spatial justice provides an integrative and unifying theory concerning place policies people and their interplay but ambiguities about its practical bases have undermined its application in planning Through creating and substantiating a new conceptual framework comprising a morphological study policy analysis and embodiment research this book crystallises the spatiality of in justice and in justice of spatiality in the context of social housing redevelopment Like many countries around the world social housing in Aotearoa New Zealand is an area of contention especially at the building and redevelopment stages Protecting community character and human rights has been used by social housing tenants to resist changes but the primary focus on material outcomes neglects broadening access to planning processes Compact mixed tenure and sustainable re developments are regarded as the just built environment as they enable equal accessibility to all But there are contradictions between the planned spatiality of justice and individuals socialised sensory space Reconciliation of morphological differentiations in built forms and social cohesion remains a challenging task This book focuses on the re examination integration and transferability of spatial justice It makes a new contribution to urban justice theory by strengthening spatial justice and planning Social housing areas are expected to adapt to changing social and economic demands while retaining much valued established community character This book also provides practical strategies for

tackling complex planning problems in social housing redevelopment

**The Urban Ecologies of Divided Cities** Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affects the fabric of cities and people's sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers

**Economic Incentives in Sub-Saharan African Urban Planning** Kwasi Gyau Baffour Awuah, 2021-04-19 This book explores incentives capable of enhancing the effectiveness of urban planning systems in Sub Saharan Africa using economic theory as a framework It argues that urban planning is fundamental to the achievement of sustainable and resilient cities but against the backdrop of rising levels of urbanisation and growth poverty informal development and climate change such systems are failing to be promoted and successfully maintained in the region Across ten chapters it analyses the connection between urban planning and socio economic development indicators of effective urban planning systems and the role and influence of incentives with real world evidence It develops quantitative models to estimate the costs and benefits of urban planning systems focussing on the developing world where organised data is less accessible Using Ghana as a case study it demonstrates a step by step approach on how to implement the quantitative models discussed Economic Incentives in Sub Saharan African Urban Planning will be useful reading for researchers policy makers development agencies and students in urban planning sustainable development and economics

*Analysis of Urban Growth and Sprawl from Remote Sensing Data* Basudeb Bhatta,2010-03-03 This book provides a comprehensive discussion on urban growth and sprawl and how they can be analyzed using remote sensing imageries It compiles views of numerous researchers that help in understanding the urban growth and sprawl their patterns process causes consequences and countermeasures how remote sensing data and geographic information system techniques can be used in mapping monitoring measuring analyzing and simulating the urban growth and sprawl and what are the merits and demerits of available methods and models This book will be of value for the scientists and researchers engaged in urban geographic research especially using remote sensing imageries This book will serve as a rigours literature review for them Post graduate students of urban geography or urban regional planning may refer this book as additional studies This book may help the academicians for preparing lecture notes and delivering lectures Industry professionals may also be benefited from the discussed methods and models along with numerous citations

**Integrating Knowledge Through Interdisciplinary Research** Dominic Holland,2013-08-22 In this important new text Holland seeks to explain by means of social scientific and philosophical inquiry the difficulties that researchers often experience when attempting to integrate knowledge from different academic disciplines either individually or as part of a team of subject specialists It is argued that the difficulty of integrating knowledge from different academic disciplines is the result of firstly an inadequate justification of the nature of scientific integration and differentiation and secondly the dominance of disciplinary specialization in scientific inquiry By focusing on both the theoretical justification for and the practical feasibility of integrating knowledge through interdisciplinary research this book asks what properties of reality make the integration of knowledge from different academic disciplines possible and to what extent it is feasible to integrate knowledge through interdisciplinary research within a traditional disciplinary context Accordingly the text is both philosophical and social scientific in content philosophical in the sense that it presents a theory of causal determination which will help researchers to understand how reality is both differentiated and interconnected

social scientific in the sense that it presents the results of three case studies of collaborative interdisciplinary research projects. The book is heavily informed by the philosophy of critical realism. The philosophical argument about the possibility of integration and specialization in science draws explicitly on some of the key concepts of critical realism, particularly those comprising the theory of integrative pluralism, while critical realist assumptions underpin the social scientific argument about the causal influence of the social system of knowledge production. By exploring researchers' conceptions of knowledge and of reality on the one hand and their decisions about what sort of knowledge to produce on the other, Holland shows how the difficulty of scientific integration is both a problem of knowledge and a problem of knowledge production. This book is essential reading for students and academics interested in the emerging topic of knowledge integration and interdisciplinarity.

**Introduction to Space Syntax in Urban Studies** Akkelies van Nes, Claudia Yamu, 2021-07-31. This open access textbook is a comprehensive introduction to the space syntax method and theory for graduate students and researchers. It provides a step-by-step approach for its application in urban planning and design. This textbook aims to increase the accessibility of the space syntax method for the first time to all graduate students and researchers who are dealing with the built environment, such as those in the field of architecture, urban design and planning, urban sociology, urban geography, archaeology, road engineering, and environmental psychology. Taking a didactical approach, the authors have structured each chapter to explain key concepts and show practical examples, followed by underlying theory and provided exercises to facilitate learning in each chapter. The textbook gradually eases the reader into the fundamental concepts and leads them towards complex theories and applications. In summary, the general competencies gained after reading this book are: to understand, explain, and discuss space syntax as a method and theory; be capable of undertaking various space syntax analyses, such as axial analysis, segment analysis, point depth analysis, or visibility analysis; be able to apply space syntax for urban research and design practice; be able to interpret and evaluate space syntax analysis results and embed these in a wider context; be capable of producing new original work using space syntax. This holistic textbook functions as compulsory literature for spatial analysis courses where space syntax is part of the methods taught. Likewise, this space syntax book is useful for graduate students and researchers who want to do self-study. Furthermore, the book provides readers with the fundamental knowledge to understand and critically reflect on existing literature using space syntax.
