Rock Garden And Its Plants From Grotto To Alpine House:

The Rock Garden and Its Plants Graham Stuart Thomas, 1989 The Rock Garden Gail Harland, 2025-03-15 Explore this lavishly illustrated celebration of the beautiful and fascinating world of rock gardens **Ornamental Grasses for Western Gardens** Marilyn Raff, 2006 Ornamental Grasses for Western Gardens by Marilyn Raff shows how ornamental grasses add beauty and function in any setting *Public Garden Management: a Global Perspective* BIJAN DEHGAN, 2014-04-15 Public Gardens Management A Global Perspective provides essential information about public gardens and what is involved in designing managing and maintaining one Although suitable as a textbook its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen It may also prove useful for homeowners for there is no fundamental difference between growing plants in a public garden or a home garden a fact reflected in the extensive reference citations The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he she was in a natural but well ordered garden environment Thus began the art of garden making Many volumes have been written on every applicable subject discussed in this and similar publications Indeed the voluminous literature on history design horticulture and numerous related subjects is nothing short of overwhelming Accordingly anyone involved in management of public gardens whether as a director or area supervisor and irrespective of the type and size of such facility would have to have familiarity with various aspects of garden organization and administration However despite the enormous number and diversity of such publications there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book These volumes provide the essential background information on plants animals management maintenance fundraising and finances as well as history art design education and conservation They also cover a host of interrelated subjects and responsible organization of such activities as creating a childrens garden horticultural therapy conservatories zoological gardens and parks hence administration of multidimensional public gardens Nearly 500 full color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management The 15 chapters begin with the need for public gardens types of public gardens historical backgrounds as well as design diversity Numerous quotations are included from many garden lovers landscape architects philosophers and others The authors primary aim in writing this book was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all

animals need plants for their survival Visitors of zoological gardens expect to see more than just animals zoos are landscaped grounds Moreover most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks A number of public gardens are currently referred to as botanical and zoological garden Population density and the publics desires and expectations as well as financial requirements are among the reasons for some major city parks such as Golden Gate in San Francisco Central Park in New York City and Lincoln Park in Chicago which integrate botanical or zoological divisions as well as museums and recreational facilities While this book attempts to provide basic principles involved in public garden management it does not claim to be a substitute for broader familiarity

Classical Taste in the Architectural World of Thomas Jefferson Alley Marie Jordan, 2025-06-12 Reaching beyond politics and law this book focuses on Thomas Jefferson as an aesthetic classicist Jefferson embraced the influence of antiquity through his adoption of classical architecture in his Virginia residences in order to establish Rome as an ancestor to America In a time of significant political and cultural change he aligned himself with a Greco Romano legacy that represented knowledge power and art Alley Marie Jordan studies the architectural and landscape spaces of Jefferson s classical taste which include the villas of Monticello and Poplar Forest as well as the University of Virginia An examination of these places exposes his deeply entrenched views of the importance of classics in Virginia and reveals them as expressions of admiration of classical antiquity Seeking to uncover an underexplored side of his character Jordan deconstructs his identity through a classical lens and illustrates his influence on American culture as well as his desire to reform it via the classics By dislodging Jefferson from American politics this study redefines his worldview and motivations for inventing an American virtue based on Horace s *utile dulci* Although his participation in acquiring classical taste was not unique for his time he did accomplish a unique aim with classicism the blending of the American landscape with classical culture to create a new American virtue

Topographic Memory and Victorian Travellers in the Dolomite Mountains William Bainbridge, 2025-10-01 Guided by the romantic compass of Turner Byron and Ruskin Victorian travellers to the Dolomites sketched in the mountainous backdrop of Venice a cultural Petit Tour of global significance As they zigzagged across a debatable land between Italy and Austria Victorians discovered a unique geography characterized by untrodden peaks and unfrequented valleys The discovery of this landscape blended aesthetic scientific and cultural values utterly different from those engendered by the bombastic conquests of the Western Alps achieved during the Golden Age of Mountaineering Filtered through memories of the Venetian Grand Tour the Victorian encounter with the Dolomites is revealed through a series of distinct cultural practices that paradigmatically define a Silver Age of Mountaineering This book shows how these practices are more ethnographic than imperialistic more feminine than masculine more artistic than sportive rather than racing to summits the Silver Age is about rambling rather than conquering peaks it is about sketching them in an intimate interaction with the Dolomite landscape

Locating Queer Histories Matt Cook, Alison Oram, Justin Bengry, 2022-10-06 Ranging from the mid 19th century to the

present and from Edinburgh to Plymouth this powerful collection explores the significance of locality in queer space and experiences in modern British history The chapters cover a broad range of themes from migration movement and multiculturalism the distinctive queer social and political scenes of different cities and the ways in which places have been reimagined through locally led community history projects The book challenges traditional LGBTQ histories which have tended to conceive of queer experience in the UK as a comprising a homogeneous national narrative Edited by leading historians the book foregrounds the voices of LGBTQ identified people by looking at a range of letters diaries TV interviews and oral testimonies It provides a unique and fascinating account of queer experiences in Britain and how they have been shaped through different localities *Global Ecologies and the Environmental Humanities* Elizabeth DeLoughrey, Jill Didur, Anthony Carrigan, 2015-04-10 This book examines current trends in scholarly thinking about the new field of the Environmental Humanities focusing in particular on how the history of globalization and imperialism represents a special challenge to the representation of environmental issues Essays in this path breaking collection examine the role that narrative visual and aesthetic forms can play in drawing attention to and shaping our ideas about long term and catastrophic environmental challenges such as climate change militarism deforestation the pollution and management of the global commons petrocapiatalism and the commodification of nature The volume presents a postcolonial approach to the environmental humanities especially in conjunction with current thinking in areas such as political ecology and environmental justice Spanning regions such as Africa Asia Eastern Europe Latin America and the Caribbean Australasia and the Pacific as well as North America the volume includes essays by founding figures in the field as well as new scholars providing vital new interdisciplinary perspectives on the politics of the earth disaster vulnerability and resilience political ecologies and environmental justice world ecologies and the Anthropocene In engaging critical ecologies the volume poses a postcolonial environmental humanities for the twenty first century At the heart of this is a conviction that a thoroughly global postcolonial and comparative approach is essential to defining the emergent field of the environmental humanities and that this field has much to offer in understanding critical issues surrounding the creation of alternative ecological futures
