Congress** United States. Congress. House. Committee on Science and Technology, 1988 The Art of the Bird Roger J. Lederer, 2019-09-25 The human history of depicting birds dates to as many as 40 000 years ago when Paleolithic artists took to cave walls to capture winged and other beasts But the art form has reached its peak in the last four hundred years In *The Art of the Bird* devout birder and ornithologist Roger J Lederer celebrates this heyday of avian illustration in forty artists profiles beginning with the work of Flemish painter Frans Snyders in the early 1600s and continuing through to contemporary artists like Elizabeth Butterworth famed for her portraits of macaws Stretching its wings across time taxa geography and artistic style from the celebrated realism of American conservation icon John James Audubon to Elizabeth Gould's nineteenth century renderings of museum specimens from the Himalayas to Swedish artist and

ornithologist Lars Jonsson's ethereal watercolors this book is feathered with art and artists as diverse and beautiful as their subjects A soaring exploration of our fascination with the avian form *The Art of the Bird* is a testament to the ways in which the intense observation inherent in both art and science reveals the mysteries of the natural world *A Passion for Birds* Mark V. Barrow, Jr., 2021-08-10 In the decades following the Civil War as industrialization urbanization and economic expansion increasingly reshaped the landscape many Americans began seeking adventure and aesthetic gratification through avian pursuits By the turn of the century hundreds of thousands of middle and upper class devotees were rushing to join Audubon societies purchase field guides and keep records of the species they encountered in the wild Mark Barrow vividly reconstructs this story not only through the experiences of birdwatchers collectors conservationists and taxidermists but also through those of a relatively new breed of bird enthusiast the technically oriented ornithologist In exploring how ornithologists struggled to forge a discipline and profession amidst an explosion of popular interest in natural history *A Passion for Birds* provides the first book length history of American ornithology from the death of John James Audubon to the Second World War Barrow shows how efforts to form a scientific community distinct from popular birders met with only partial success The founding of the American Ornithologists Union in 1883 and the subsequent expansion of formal educational and employment opportunities in ornithology marked important milestones in this campaign Yet by the middle of the twentieth century when ornithology had finally achieved the status of a modern profession its practitioners remained dependent on the services of birdwatchers and other amateur enthusiasts Environmental issues also loom large in Barrow's account as he traces areas of both cooperation and conflict between ornithologists and wildlife conservationists Recounting a colorful story based on the interactions among a wide variety of bird lovers this book will interest historians of science environmental historians ornithologists birdwatchers and anyone curious about the historical roots of today's birding boom
