Robert D. Craig

Samoan Medical Belief And Practice:

Samoan Medical Belief and Practice Cluny Macpherson, La'ava Macpherson, 1990 This is the first comprehensive study of Samoan medicine. Cluny and La'ava Macpherson have carried out intensive investigation into the practice and beliefs of contemporary indigenous healers or fof in Western Samoa to produce a fascinating and thorough study. They explain convincingly why traditional Samoan medicine and its skilled practitioners continue to flourish alongside Western medical practice both in Samoa and in Samoan immigrant communities. Back cover Faith and the Pursuit of Health Jessica Hardin, 2018-10-26 Salvation and metabolism. Ethnography between clinic and church. Discerning ambiguous risks. Freedom and health responsibility. Embodied analytics. Well being and deferred agency. Support synergies. Integrating faith into healthcare practice. *Reconstructing Obesity* Megan B. McCullough, Jessica A. Hardin, 2013-10-01 In the crowded and busy arena of obesity and fat studies there is a lack of attention to the lived experiences of people how and why they eat what they do and how people in cross cultural settings understand risk health and bodies. This volume addresses the lacuna by drawing on ethnographic methods and analytical emic explorations in order to consider the impact of cultural difference embodiment and local knowledge on understanding obesity. It is through this reconstruction of how obesity and fatness are studied and understood that a new discussion will be introduced and a new set of analytical explorations about obesity research and the effectiveness of obesity interventions will be established. **Introducing Medical Anthropology** Merrill Singer, Hans Baer, Debbi Long, Alex Pavlotski, 2019-03-20 The third edition of *Introducing Medical Anthropology: A Discipline in Action* provides students with a first exposure to the growing field of medical and health anthropology. The narrative is guided by unifying themes. First health oriented anthropologists are very involved in the process of helping to varying degrees to change the world around them through their work in applied projects, policy initiatives and advocacy. Second the authors present the fundamental importance of culture and social relationships in health and illness by demonstrating that illness and disease involve complex biosocial processes and that resolving them requires attention to a range of factors beyond biology. Third through an examination of the issue of health inequality this book underlines the need for an analysis that moves beyond cultural or even ecological models of health toward a comprehensive biosocial approach. Such an approach integrates biological, cultural and social factors in building unified theoretical understandings of the origin of ill health while contributing to the building of effective and equitable national health care systems. NEW TO THIS EDITION All chapters have been updated or expanded. NEW Chapter 8 The Biopolitics of Life: Biotechnology, Biocapital and Bioethics. Revised text style for crisper language and livelier phrasing. Added a brief signposting of chapter content at the beginning of each chapter and review questions about the key issues and concepts at the end of each chapter. Expanded discussion of Zika, Ebola, gender and health, PTSD and psychological anthropology, geriatric health, the contemporary vaccine controversy, the internet and health, and the health impacts of fracking and nuclear energy development. Concluding chapter examines anthropologically informed

strategies and visions for a healthier world *Whispers and Vanities* Tamasailau M. Suaalii-Sauni, Mauaiaivao Albert Wendt, Naomi Fuamatu, Upolu Luma Va'ai, Reina Whaitiri, Stephen L. Filipo, 2014-11-14 This collection of essays and selected poetry responds to an address on Samoan religious culture given by Samoa's Head of State His Highness Tui Atua Tupua Tamasese Le'olapsa Tu'ufuga Efi to the 2009 Parliament of the World's Religions The address challenges some fundamental aspects of and assumptions in modern Samoan indigenous religious culture The essays and poetry form a carefully woven critique from within and outside Samoa of aspects of Samoa's religious and cultural values Encyclopedia of Medical Anthropology Carol R. Ember, Melvin Ember, 2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world's cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world **Healing Practices in the South Pacific** Claire D. Parsons, 1985-01-01 Island Noni Woodland Publishing, Neil Solomon, 1998-09-07 The fruit of the noni plant *Morinda citrifolia* has been used for hundreds of years by the people of Tahiti In this booklet renowned physician Neil Solomon discusses how this amazing fruit has emerged onto the Western medical scene demonstrating powerful therapeutic capabilities for disorders such as high blood pressure chronic pain and autoimmune dysfunction **Biomedical Entanglements** Franziska A. Herbst, 2016-10-01 Biomedical Entanglements is an ethnographic study of the Giri people of Papua New Guinea focusing on the indigenous population's interaction with modern medicine In her fieldwork Franziska A Herbst follows the Giri people as they circulate within and around ethnographic sites that include a rural health center and an urban hospital The study bridges medical anthropology and global health exploring how the biomedical is imbued with social meaning and how biomedicine affects Giri ways of life *Cultural Memory* Jeannette Marie Mageo, 2001-02-01 How do foreign schemas and objects enter into indigenous ways of understanding the world How are the cultural self and the cultural other constructed in acts of remembering What is memory's role in the generation or degeneration of cultural meanings In contemporary Pacific societies these questions are not merely the subject of scholarly debate but speak to pressing life concerns This volume offers fruitful responses to such questions providing insights into colonial memory and its limitations and proposing explanations that illumine cultural memory processes These processes in turn elucidate ways of authoring cultural history and shed light on cultural identity which like other forms of identity is built from a remembered self Contributors explore valorizations of certain aspects of the remembered past amnesias about other aspects Both are part

of the rhetoric of colonizing cultures and of cultural identity and nationhood in many contemporary Pacific societies The provocative analyses and responses offered here are both academic and personal close engagement with individuals and their ways of life is evident These are at once intellectual journeys through the colonial landscapes of Pacific memory and attempts to understand the problems of politics and personhood cultural identity and meaning for real people in real places

Cultural Memory confronts many of the most central anthropological issues of our time **Historical Dictionary of Polynesia** Robert D. Craig, 2002 Alphabetically arranged entries ranging in length from a paragraph to several pages describe the important people food native animals politics history and culture of Polynesia which is made up of more than a dozen countries including American Samoa French Polynesia Hawaii New Zealand and Tonga The book includes a four page list of acronyms an extensive chronology and appendices with the names of Polynesian islands and lists of political rulers of the various states through history Author Craig emeritus history Alaska Pacific U has created several other dictionaries on Oceania Polynesian mythology and Hawaii Annotation copyrighted by Book News Inc Portland OR **Coconut Colonialism** Holger Droessler, 2022-01-11 Samoans had been engaged in economic and cultural exchange long before Germans and Americans arrived on the islands Holger Droessler shows how Samoans adapted their traditions to challenge the new globalization imposed on them by colonialism regaining agency through the efforts of farm workers nurses and traveling entertainers alike Historical Dictionary of Polynesia Robert D. Craig, 2011 The term Polynesia refers to a cultural and geographical area in the Pacific Ocean bound by what is commonly referred to as the Polynesian Triangle which consists of Hawai i in the north New Zealand in the southwest and Easter Island in the southeast Thousands of islands are scattered throughout this area most of which are currently included in one of the modern island states of American Samoa Cook Islands French Polynesia Hawai i New Zealand Samoa Tonga Tokelau Tuvalu and Wallis and Futuna The third edition of the Historical Dictionary of Polynesia greatly expands on the previous editions through a chronology an introductory essay an expansive bibliography and over 400 cross referenced dictionary entries on significant persons events places organizations and other aspects of Polynesian history from the earliest times to the present Appendixes of the major islands and atolls within Polynesia the rulers and administrators of the 13 major island states and basic demographic information of those states are also included Return Migration of the Next Generations Dennis Conway, 2016-12-05 There is renewed interest in return migration among researchers of global movement patterns Until recently it was overlooked regarded as the result of failure by emigrants or related to the return of retired elderly migrants This important study looks at the one and a half and second generation migrants the youthful contract workers and the prolonged sojourners and the consequences of their return to source communities **We are a People** Paul R. Spickard, W. Jeffrey Burroughs, 2000 As the twentieth century closes ethnicity stands out as a powerful force for binding people together in a sense of shared origins and worldview But this emphasis on a people s uniqueness can also develop into a distorted rationale for insularity inter ethnic animosity or as we

have seen in this century armed conflict Ethnic identity clearly holds very real consequences for individuals and peoples yet there is not much agreement on what exactly it is or how it is formed The growing recognition that ethnicity is not fixed and inherent but elastic and constructed fuels the essays in this collection Regarding identity as a dynamic on going formative and transformative process We Are a People considers narrative the creation and maintenance of a common story as the keystone in building a sense of peoplehood Myths of origin triumph over adversity migration and so forth chart a group s history while continual additions to the larger narrative stress moving into the future as a people Still there is more to our stories as individuals and groups Most of us are aware that we take on different roles and project different aspects of ourselves depending on the situation Some individuals who have inherited multiple group affiliations from their families view themselves not as this or that but all at once So too with ethnic groups The so called hyphenated Americans are not the only people in the world to recognize or embrace their plurality This relatively recent acknowledgment of multiplicity has potentially wide implications destabilizing the limited and limiting categories inscribed in for example public policy and discourse on race relations We Are a People is a path breaking volume boldly illustrating how ethnic identity works in the real world Author note Paul Spickard is Professor and Chair of Asian American Studies at UC Santa Barbara and is author of Mixed Blood W Jeffrey Burroughs is Professor of Psychology at Brigham Young University Hawaii

Theorizing Self in Samoa

Jeannette Marie Mageo, 2025-10-01 Theorizing Self in Samoa develops a new theory of the self in culture through a psychological and historical ethnography of Samoa As in many non Western cultures Samoan understandings of the self are more sociocentric accentuating the social roles that people play than egocentric emphasizing individual interior feelings and perceptions Yet in Samoa as in any culture aspects of the self that are not emphasized in cultural explanations of personhood continually reappear and must somehow be accounted for Jeannette Marie Mageo argues that all cultures attempt to encompass these stray experiences of the self within a discursive system She introduces a way of charting human development through cultural discourses which helps reveal how emotion gender and sexuality are constructed in Samoan society and other cultures including our own The second half of the book explores the effects of cultural contact and colonialization on the innermost experience of cultural subjects With its long ethnographic record Samoa provides a unique opportunity to consider the dialectic between historical change and personal experience opening a perspective on the ways in which cultural history is forever leaving its fingerprints upon human lives Theorizing Self in Samoa marks out important territory for psychological anthropology and students of Oceania and will appeal also to students and scholars in cultural studies women s studies and history Jeannette Marie Mageo is Associate Professor of Anthropology Washington State University

Home in the Islands

Jan Rensel, Margaret Rodman Critchlow, 1997-09-01 Ordinary houses have extraordinary stories to tell For more than a century anthropologists have been recording these sagas in an attempt to uncover humanity s relationship with the common dwelling Fundamental to the interaction of humans and housing is the way

people shape their living spaces even redefining their purposes and meanings their houses in turn influence how people live their lives and perpetuate the cultural structures that produced a given form of shelter The stories draw attention to colonial and missionary agendas local and global economies environmental disasters cultural identities social connections and family continuity as well as personal choices And as the chapter on homeless Hawaiians shows even those without houses have stories to tell Anthropologists architects environmental designers geographers and historians will welcome this diverse volume on a neglected yet important aspect of change in the lives of Pacific Islanders **From Hippocrates to COVID-19**

Dale A. Stirling, 2023-05-12 The COVID 19 pandemic provides stark evidence of the importance of medicine on a global scale However revisiting the influenza pandemic of 1918 provided a perspective as we searched for a viable vaccine and instituted public health measures This shows that medical knowledge is an accumulative process extending to the past and it is in the spirit of that legacy that this bibliography has been compiled The book is a one stop resource that cites literature related to the historical aspects of medicine It also acknowledges medicine s global reach and devotes significant effort in that respect Although the online world seems to dominate on both a social and educational level there is still a need for thoughtfully curated and focused reference works and this bibliography accomplishes that goal The book has 9 000 citations It utilizes the WHO s International classification of Diseases for the section on diseases and disorders and the U S Food Drug Administration s Product Code Classification Database for the section on medical devices equipment and instruments It includes detailed subject geographic and people indexes for an easy reference Spirits in Culture, History and Mind

Jeannette Mageo, Alan Howard, 2012-12-06 Spirits in Culture History and Mind reintegrates spirits into comparative theories of religion which have tended to focus on institutionalized forms of belief associated with gods It brings an historical perspective to culturally patterned experiences with spirits and examines spirits as a locus of tension between traditional and foreign values Taking as a point of departure shifting local views of self nine case studies drawn from Pacific societies analyze religious phenomena at the intersection of social psychological and historical processes The varied approaches taken in these case studies provide a richness of perspective with each lens illuminating different aspects of spirit related experience All however bring a sense of historical process to bear on psychological and symbolic approaches to religion shedding new light on the ways spirits relate to other cultural phenomena **The End of Magic** Ariel Glucklich, 1997 Basing himself in the Indian city of Banaras where magic is a familiar part of everyday life Glucklich reviews the major theories that have explained or explained away magic and offers a new approach towards defining and understanding magic
