Applied Computing Suresh Manandhar, Jim Austin, Uday Desai, Yoshio Oyanagi, Asoke Talukder, 2005-01-11 The focus of the Asian Applied Computing Conference AACC is primarily to bring the research in computer science closer to practical applications. The conference is aimed primarily at topics that have immediate practical benefits. By hosting the conference in the developing nations in Asia we aim to provide a forum for engaging both the academic and the commercial sectors in that region. The first conference Information Technology Prospects and Challenges was held in May 2003 in Kathmandu, Nepal. This year the conference name was changed to Asian Applied Computing Conference to reflect both the regional and the application oriented nature of the conference. AACC is planned to be a themed conference with a primary focus on a small set of topics although other relevant applied topics will be considered. The theme in AACC 2004 was on the following topics: systems and architectures, mobile and ubiquitous computing, soft computing, man-machine interfaces and innovative applications for the developing world. AACC 2004 attracted 184 paper submissions from around the world, making the reviewing and the selection process tough and time consuming. The selected papers covered a wide range of topics: genetic algorithms and soft computing, scheduling, timization and constraints solving, neural networks and support vector machines, natural language processing and information retrieval, speech and signal processing, networks and mobile computing, parallel grid and high performance computing, innovative applications for the developing world, cryptography and security, and machine learning. Papers were primarily judged on originality, presentation, relevance, and quality of work. Papers that had clearly demonstrated results were given preference. *American Book Publishing Record Cumulative 1998* R. R. Bowker Publishing, 1999-03
